The function of this spreadsheet is to forecast future donations, when you have people donating by debit order. You can input the giving amount, how often they give (every month, once a quarter, twice a year, or once a year), and the giving period. You can then view a chart for any given 12 months, and forecaste how much money will come in each month. This spreadsheet also serves as a database of you donors, with their contact details.

This spreadsheet can be used in various countries, you can select the currency symbol and date format below.

Currency Symbol: £

Date Format: dd/mm/yyyy

If you get stuck at any stage, we have a demo video for this product. You can choose if you'd like to watch it on our website, or on YouTube. Both are the same demo video.

This spreadsheet is created with various countries in mind, so we have various currency symbols to choose from. £, \$, R, or €. It won't convert anything, just assign your preferred symbol to all of the currency values. Also, if you're in the States, you can opt for the 'mm/dd/yyyy' date format.

As usual, we have a demo video, which you can view on our website or YouTube if you get stuck.

This spreadsheet consists mainly of one database, where you can track your debit orders. Simply add the details for each debit order. You are able to put in a start date and end date (if applicable) for each donor, and also the amount and how often it is given. Every month, quarter, twice a year, or once a year, the choice is yours.

As you enter this data, the spreadsheet is able to track what you can expect in the months/years to come. This particular database will be a good place to keep all of this data in one place, but will also allow you to sort the data, and track how much has been given by each person.

The best part of this spreadsheet, is the next part!

All of the data in the database, will go through some interesting formulas, and automatically produce a very handy report. The main reason of this spreadsheet is to forecast what income you can expect per month, of any 12 month period. Does this sound like something that will be of use to you? If so, take a look below.

Enter any date in the month with which you wish to START this 12 month period.  
Leave the space blank to start with the current month.

That report above is created at the touch of a button! All you need to do is keep your database up to date, and then select which 12 month period you want to view (default being from the current month for the next 12 months).

As you may have donations ending at some stage, other starting later, some every month, others less regularly, this is a very handy report to have. Take a look at what income is projected for any 12 month period in the future, based on the info on the database.

How will that help your charity?
