

The diagram illustrates the components of a die-cut template. It features a central white rectangular area. Surrounding this area are several lines and a measurement indicator:

- BLEED LINE:** Indicated by a dashed line extending from the edges of the white area.
- CUT LINE:** Indicated by a solid black line that defines the actual shape of the template.
- SAFETY LINE:** Indicated by a dotted line further out from the cut line.
- MEASUREMENT:** Indicated by a double-headed arrow at the bottom, showing the distance between the cut line and the safety line.

Text on the right side of the diagram provides additional instructions:

- Please note this is a die-cut template. Outer solid pink line is the actual cut line.
- All art should extend to the outer bleed lines.
- Keep all important text and logos within safety line.
- All measurements are in millimeters.
- All CMYK (no RGB) images must be 300 d.p.i. or higher.
- All text must be converted to outlines or rastered.
- Total ink coverage should not exceed 320%.
- Do not flatten template to artwork.

To prevent errors and ensure the fastest turnaround time of your product, it is essential that all artwork is prepared correctly. If you have any questions about the templates or how to use them, please contact your sales representative before designing.
