

# How to Use Backgrounds from the Pack

A simple guide to getting the most from your download

Backgrounds can be used for a variety of things – websites, Chrome themes, etc. These backgrounds, however, we optimized for your desktop. Each pack contains three at four sizes for a total of twelve images. To use a background from this pack on your desktop, follow these instructions:

- Open your pack by selecting “Extract All Files”
- Select the background you wish to use and the size that best matches your desktop (If you don’t know, proceed to the next step)
- If you do not know your resolution (Desktop size), right click on the desktop and choose “Screen Resolution” – it should tell you there
- Right click on your Desktop and choose “Personalize”
- Options may vary, but you should see one for Desktop Background
- Find the button that says “Browse” and click it
- Locate your chosen background and double click to select it
- Confirm that you’d like this image to be your new background
- Choose the way it fills the screen – Fill, Fit, Stretch, Tile, or Center
- Because these should be very close to your resolution size, I recommend “Stretch” to fill your entire Desktop area

Congratulations! You’re using a custom background from this pack! If you have questions about using backgrounds, Google is a great resource. If you have questions specifically about backgrounds from this pack, email me at [swordroll@gmail.com](mailto:swordroll@gmail.com), and I can answer your questions there!
