

WITH THIS NEW TECHNOLOGY,
THE OUTCOME MIGHT HAVE BEEN DIFFERENT.

WHEN AN OFFICER IS DOWN, EVERY SECOND MATTERS. UNTIL NOW,

technology that sends an alert when an officer is motionless, or goes beyond a designated distance from their police vehicle, has not existed. Nor have officers in distress had the ability to press a panic button, located on their uniform, allowing other officers to know their location and respond immediately. U.S. Gate Supply is proud to announce that we are the exclusive supplier of this lifesaving technology, in the state of California.
