## **Real Alliance Network – The Guide**

Internet Marketing in its simplest terms refers to the marketing and selling of goods and services using the Internet as the sales and distribution medium.

What started as a cottage industry in the early nineties has grown into a global multibillion-dollar industry that has been embraced by industrial giants such as Microsoft and General Electric.

The Internet has reduced the world into a global village, has made distance irrelevant and time zones little more than an inconvenience. Businesses in the remote parts of India can easily service clients in the bright cities of UK or USA, while goods produced in China are sold to consumers in all parts of the world.

Internet Marketing offers anybody over a certain age with access to a computer and access to an Internet connection, the opportunity to go into business for themselves with little or no start-up costs.

If you want to succeed in the 21st century, then learning how the internet works and how to make money off of it is crucial.

There are many things you can offer online whether its your products or services. It could be physical products or digital products. The Internet has made all this possible and made internet marketing a reality.

These days, making money online isn't just about generating passive income; it is also about finding ways and means to create an active income through the conveniences afforded to us by the internet that will not only help us with our debt obligations, but also empower us to save, invest and get really rich in the future.

## **How to Learn Internet Marketing**

When you know how to make money online, the road to financial freedom and quitting your job becomes a possibility. The road to financial freedom is open for all. If you are willing to make the effort to explore new opportunities and execute them, you can become a self-employed professional or an online entrepreneur.

If you do not have the basic computer and Internet skills required to accomplish buying, selling and navigating the Internet, then you should learn how to search for information on the web or sign up for internet marketing classes.

But the problem with free internet search is that, there is always low quality material on the web. Information on some marketing topics are just not widely available online, most of it is of poor quality, provided for commercial reasons or hard for lay people to understand.

The best way to learn internet marketing would be to enroll in online classes, buy marketing courses or join a membership website. If you are really interested in business and marketing, then this is most likely the best path for you. Research marketing programs that focus on Internet marketing and learn the basics one course at a time.

However, problem with buying online courses or enrolling in online classes is that some of the courses are expensive, focuses on one topic and are also designed to sell you more. A lot of the courses from big Internet marketers are designed to "up sell" you on something more expensive.

You buy the \$197 program but on the way to check out you're taken to a page offering you 50 percent off the \$1,000 program, promising it's 20 times better than the one you're thinking about buying (even though for the price it ought to be 20 times better).

These courses are expensive because they are served by individual marketers that want to make money with their training programs.

In addition to these training courses, you also have to buy software, templates, graphic packs and other tools separately. That could run into thousands of dollars.

The best way to learn internet marketing if you don't want to spend a lot is to join a membership program. You get lots and lots of training books, training videos, software, themes, plugins and other tools all in one place at a very cheap price.

## **Taking Advantage of Membership Programs**

Membership sites are great internet marketing places to get quality internet marketing resources on any area of internet marketing. They are essentially a site with paid access to training programs, tools and resources.

Membership sites do help serious marketers wanting to achieve online success, that are on a budget, so the price is dirt cheap for a wealth of information that is priceless.

Multiple online courses are available to teach and explain the many different components of digital marketing. Instead of buying individual courses and tools, you get all these all in one place for a one time fee or monthly fee and you also get continuous products from time to time.

With a little research, it won't take you long to find some Internet marketing membership sites.

## **Internet Marketing Challenges for Small Businesses**

Once entering this new playing field, there is a set of unique challenges your business will face.

Building a quality website, creating valuable content, growing an audience via social media, generating new leads, converting leads into sales, growing with time and making quick returns etc. are some of the challenges every internet marketer faces when they come online.

Even though you have lots of info at your disposal and the world and the internet move at a blistering rate, it can seem that your efforts take a long time to come to fruition.

And guess what? They do! There's no magic button to press, there's no shortcuts. Creating a business from scratch takes time. For some people though this isn't acceptable and they either quit or move onto a different area and try that, and then get impatient and move to something else and so on.

So unless you have a program that will ensure you are learning and earning almost immediately, 95% of newbies are known to give up after the first few months.

Getting a program that will ensure quick success is not always easy because most of the programs out there are created for the owners to make money.

Here we are going to introduce you to one program that not only has lots of products for you to develop your online skills, its created to help you start earning right away by taking advantage of its affiliate program.

For those who don't know what affiliate program is, let's enlighten you a little.

## **How Does Affiliate Marketing Work?**

Affiliate marketing is a type of performance-based marketing in which a business rewards affiliates for each visitor or customer brought by the affiliate's own marketing efforts.

Affiliate marketing is probably one of the quickest and cheapest ways to start making money online as you don't have to create any products yourself. You simply link up a buyer and a seller, and you take a commission on the sale that has been referred by you.

Most affiliate programs will offer ready made text links, banners and other forms of creative copies whereby you only have to copy the code and place it on your website or other channels to start referring traffic. You can post it on social media, YouTube channel, via email etc.

When interested visitors click on these links from wherever you have it, they get redirected to the product site and if they purchase a product or subscribe to a service, you as the referrer make a commission.

When you join an affiliate program like ours, you help promote our program to other people and when that person buys the product, you qualify for commissions.

Our affiliate program is a unique one. You don't get paid once after you get others to join our program, you get paid over and over again.

We have a unique compensation plan in place that ensures you get commissions as you and your downline members go from one membership level to the next one.

Real Alliance Network uses the affiliate marketing formula used by the MLM industries. With this affiliate marketing plan and what we call spillover, you can find yourself with downlines of hundreds in no time.

Spillover refers to the ability to have new customers placed under you by your upline (Someone who refers you). You in turn have the ability to place customers under people in your downline (people you referred) team.

It's the best way to earn money with affiliate marketing. Our compensation plan is the best and we will show what it looks like below.

## **Real Alliance Network Compensation Plan**

We have a forced matrix system built upon the binary marketing system of 2 X 2, 2 X 3 and 2 X 5 matrix plan.. Its a follow me set up where your down link members are following you as you progress from stage 1 or your first membership level to stage 6 or your final membership level.

The Starter Membership level or Stage 1 is a 2 X 2 matrix system while the Stage 2 to Stage 5 have 2 X 3 matrix plans and Stage 6 has a 2 X 5 Matrix plan..

- Every member is required to invite 2 members each and any additional members introduced will spillover making the matrix fill faster.
- The program has spillover effect as members invite other members
- The system has no break away or splitting. Every downline follows you to the next stage as they fill their matrix
- Whenever you complete a rank or stage, you are rewarded with great BONUSES.
- Members have access to products that cover their membership level.
- You only pay for your first membership level registration. That is you pay only \$30 out of your pocket. You pay for your next level membership with the commissions earned.
- The fees for each membership levels from 1 to 6 are \$30, \$30, \$100, \$250, \$500 and \$1,000. You only pay for first level membership. Just \$30
- The membership fees are automatically deducted from your commissions after you have completed a matrix and are upgraded to the next membership level.
- Members have access to new sets of products that cover their membership levels as they upgrade.

- Members are paid commissions whether the downline is from direct referral or from spillover..
- In addition to commissions, members also get bonuses after completing each matrix stage or membership level..

As soon as you as a member makes payment you are placed to the first available place under the direct sponsor (following sponsor), which means a matrix (Matrix#1) is opened for you. Lets assume your ID number is 1.

Then when you invite or bring two new referrals and your referrals bring two referrals each. They are placed under you since you are their sponsor and the first line of the matrix is completed.

You and your referrals continue to invite new members and as soon as the second line of the matrix is full the Matrix #1 for you is considered to be completed. You are paid commissions for this level.

So whether you invite all 6 members or you invite 2 and your referrals also invited two each, they all count towards your downlines and their downlines.. You form a team.

You are also automatically cycled - reenters at the same level, which means a new place in this level is opened for the you on (Matrix#2 or Second membership Level) and this place is the first available place under recycled member's sponsor..

You get your commissions for the first membership level and the upgrade fee for the new membership level is subtracted from your inner wallet.

You are also automatically upgraded after completing matrix. It means that a new place on the higher level is opened for you and this place is the first available place under your referral if referral is already upgraded to this level.
