

Ola,

Cycling exporting and new fact sequence importer:

- 1) Open Cycling Ball A.prj project
- 2) Select Sphere group
- 3) With "Control" pressed in the keyboard choose Menu Bar / Object / Range Export Object / Native fact

- 4) Range from 0 to 90
- 5) Hit OK / Choose the folder and OK again
- 6) Select all 90 fact groups in the folder you created
- 7) Drop all facts on Animator Icon
- 8) Select all groups in Project Window
- 9) Unselect the first one
- 10) Select the remain groups in the first one
- 11) Go to Cycling tab of first Sphere group and enable child cycling
- 12) Start frame 0 / End frame 90
- 13) Turn off the Sphere Ubershape group animated
- 14) Press preview on any viewport window

You can take a look in the final prj, Cycling Ball B.prj

Thanks

Tomas Egger
