

Navigation inside the app

How to start

Preparing devices for the first lesson

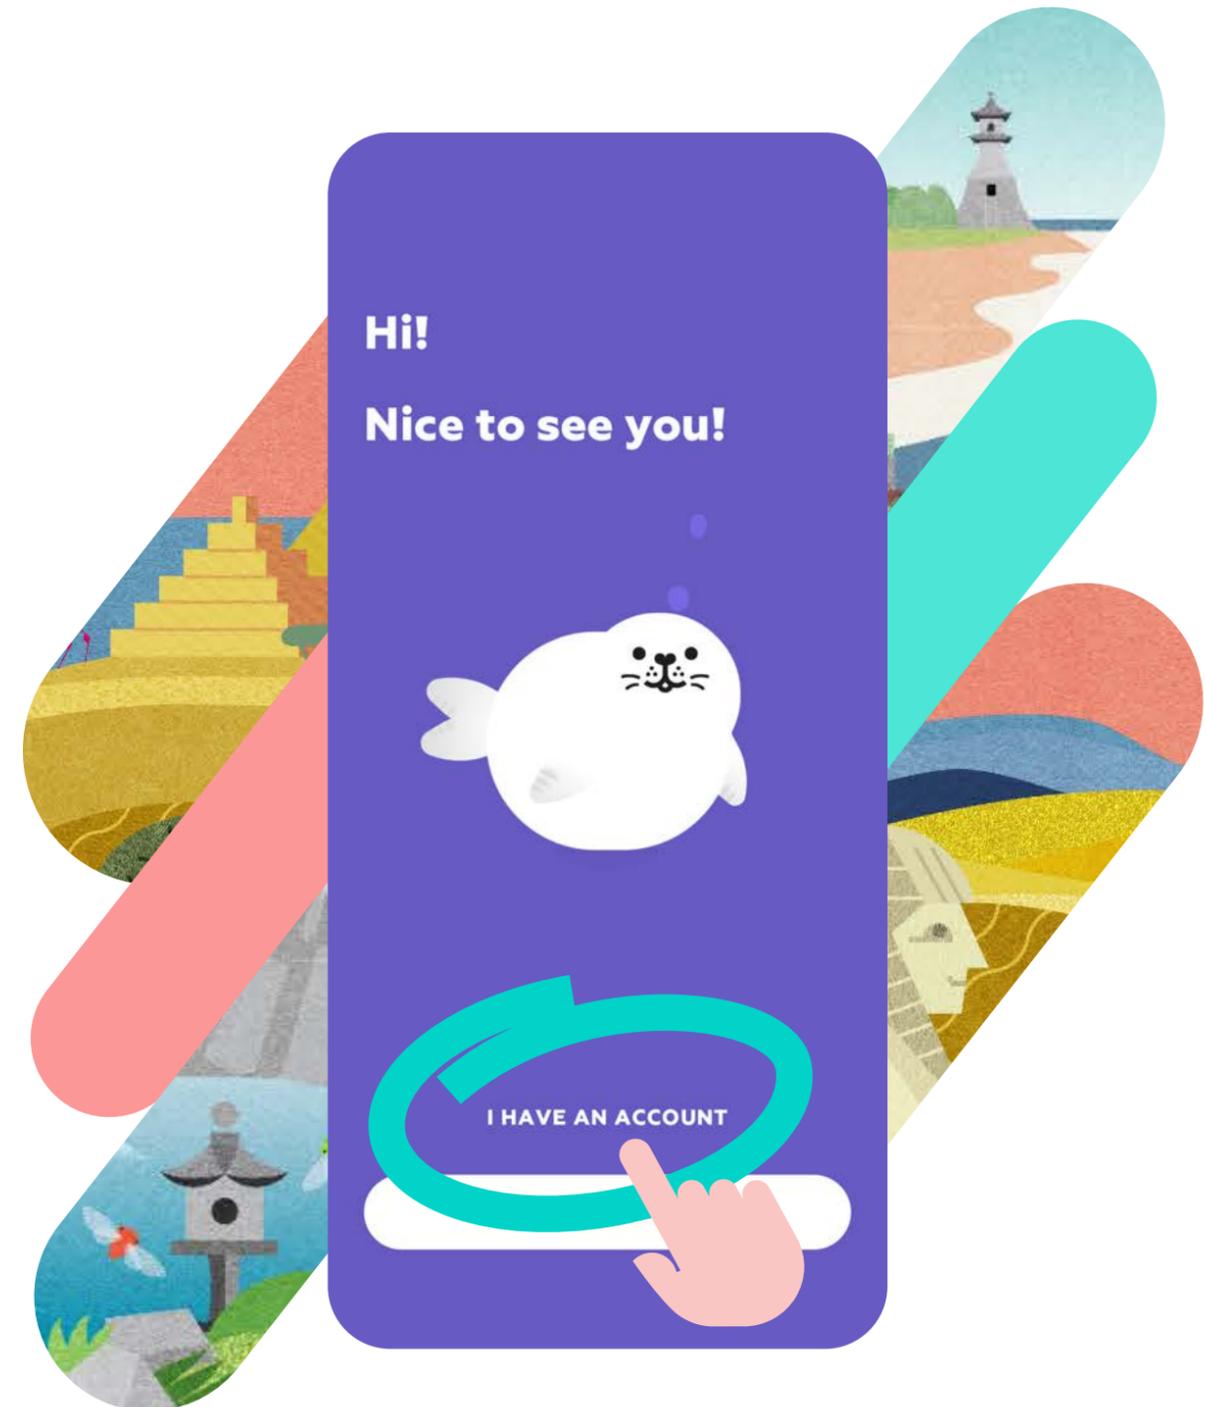

- Download the Funexpected Math app on all students' devices.
- Log into your Teacher's account through each device.

Download on
the App Store

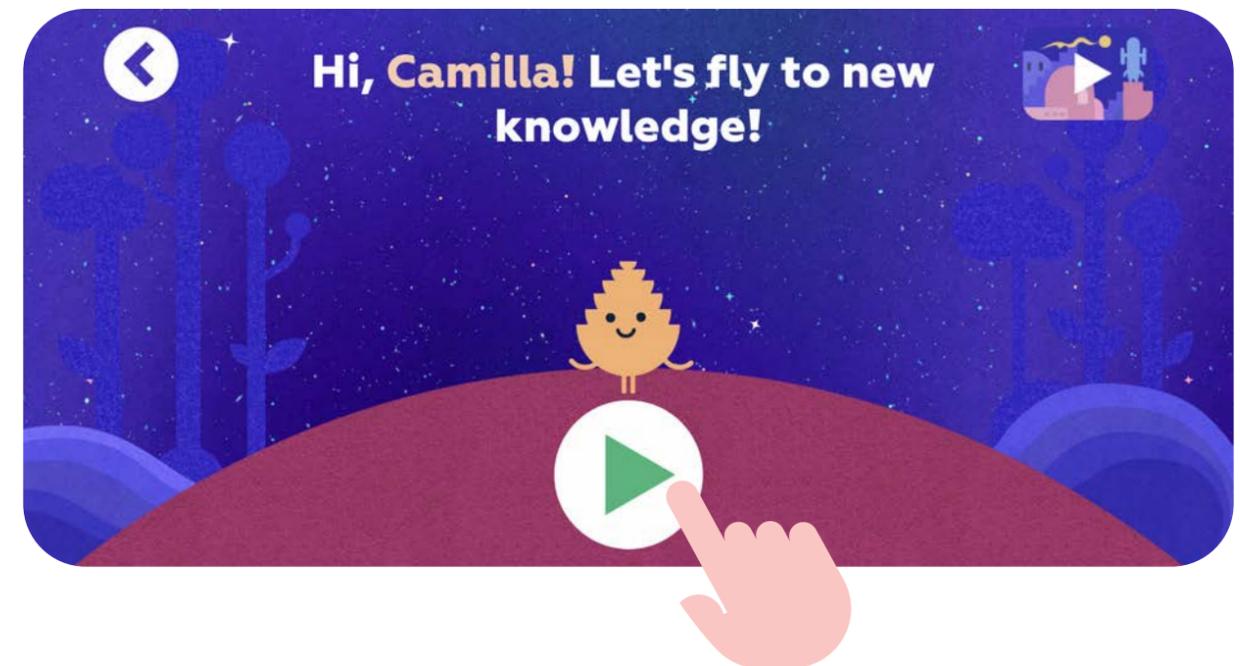

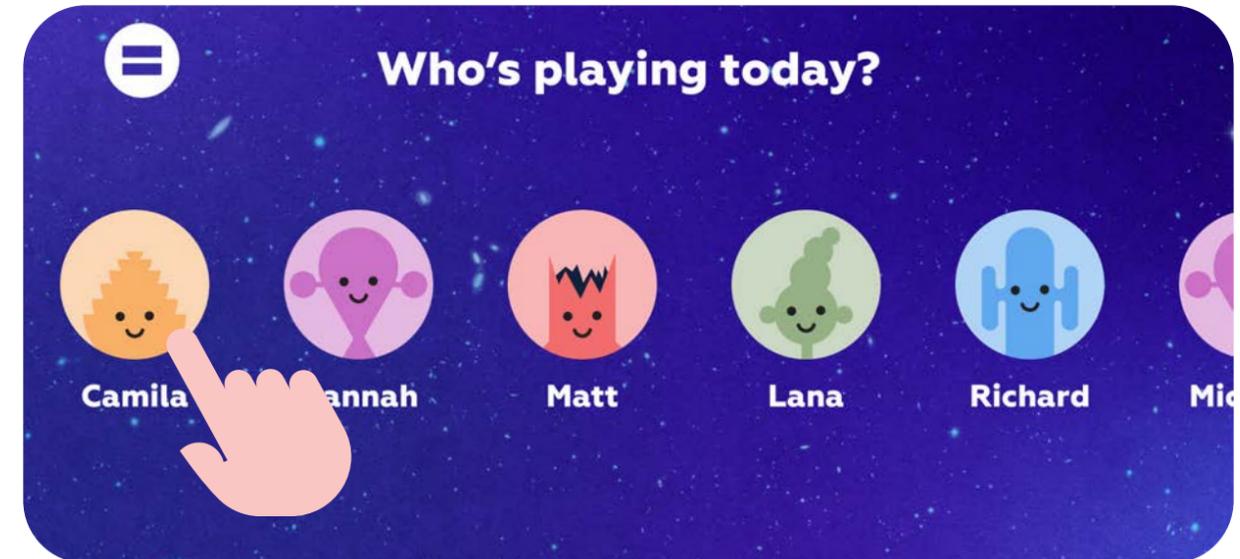

Get it on
Google Play

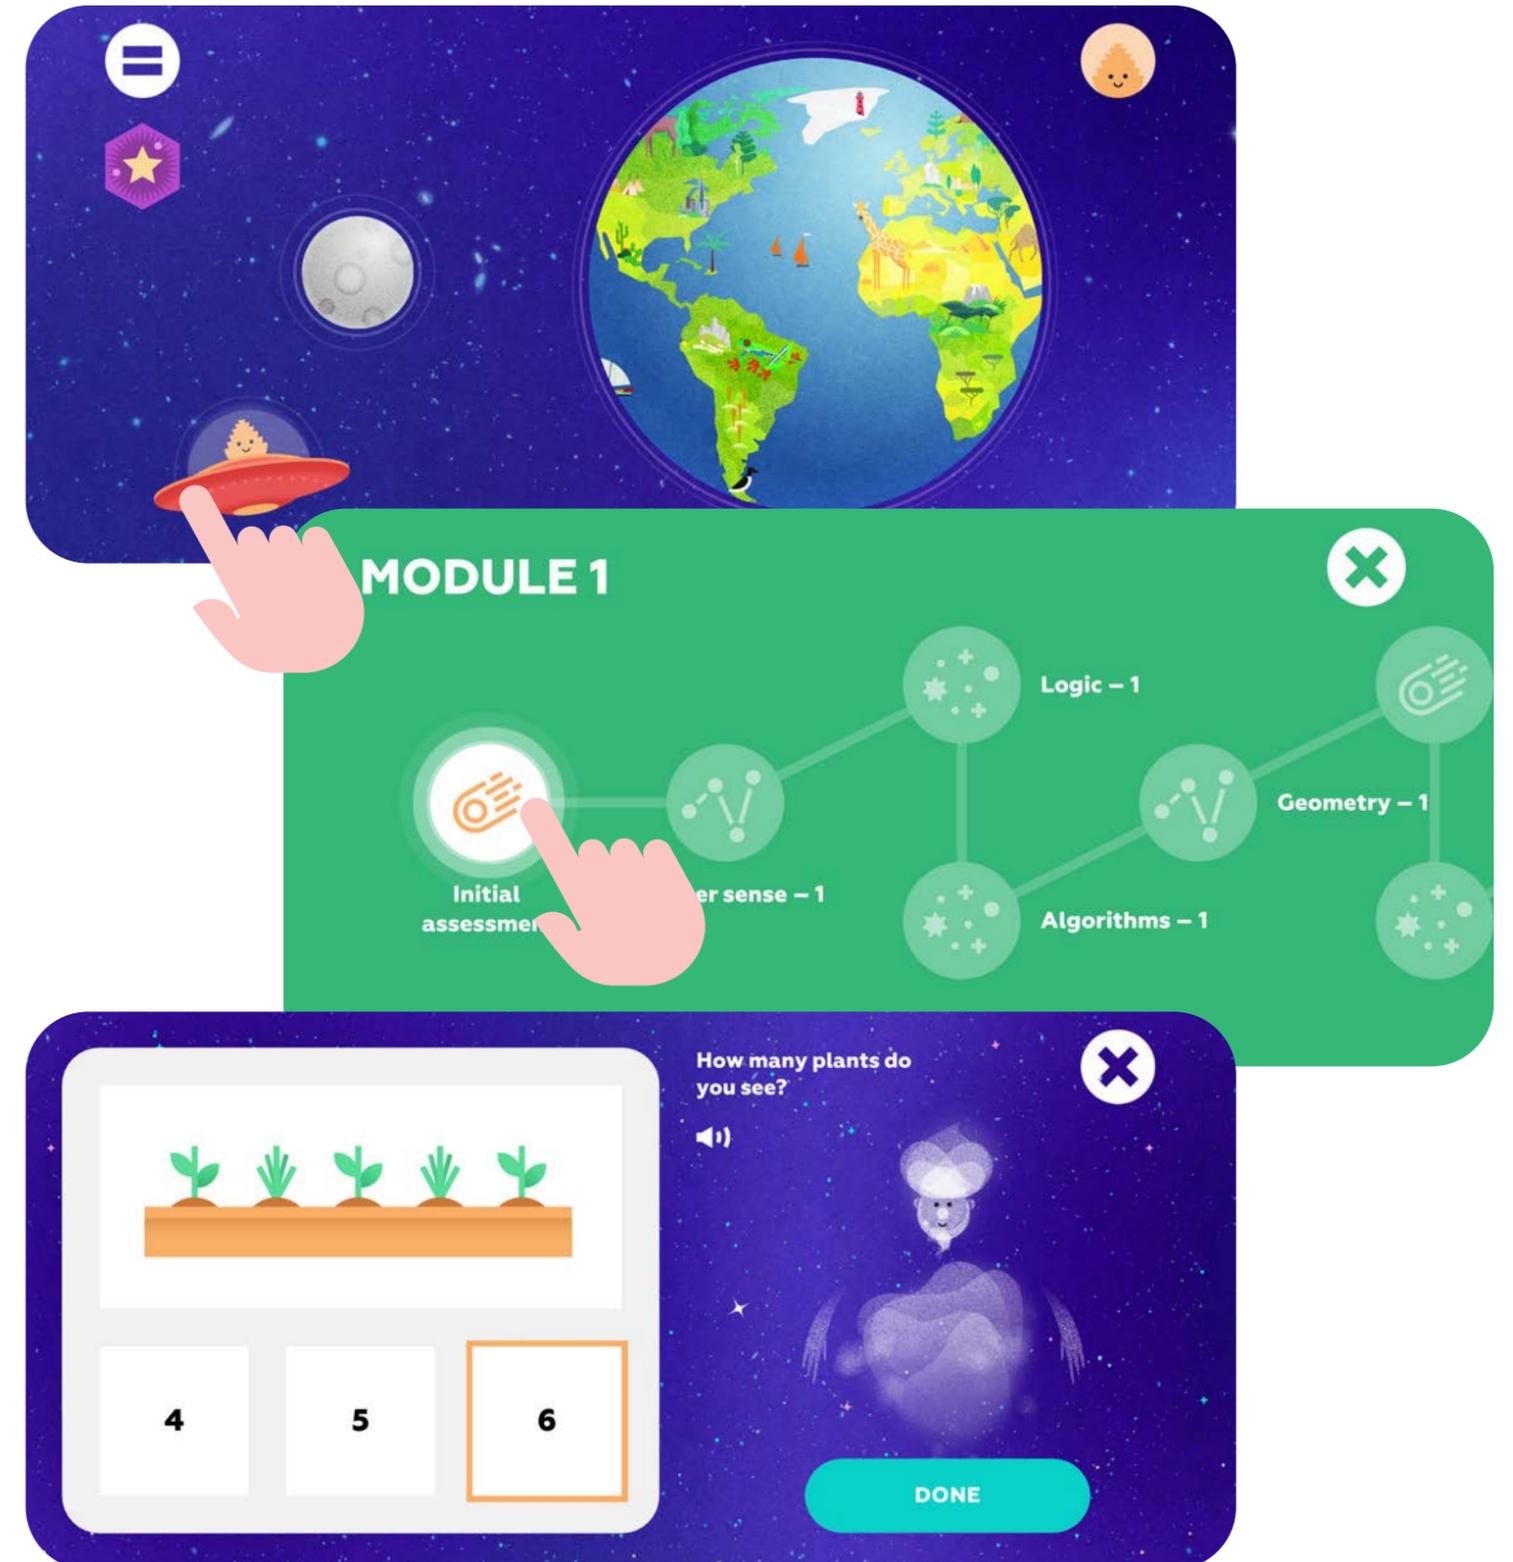

How to start the first lesson

- Using a student's device, tap on their name to select who's playing today.
- If there is a Star Mission available, students will be automatically redirected to it after seeing the Welcome screen.

Star Missions. Yearly course

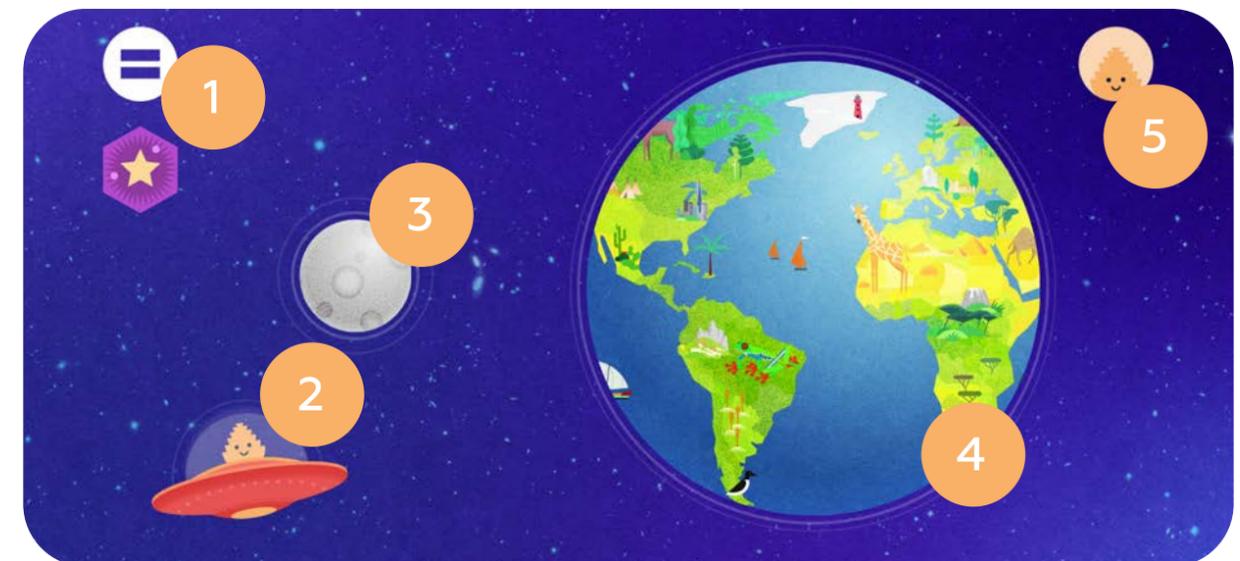

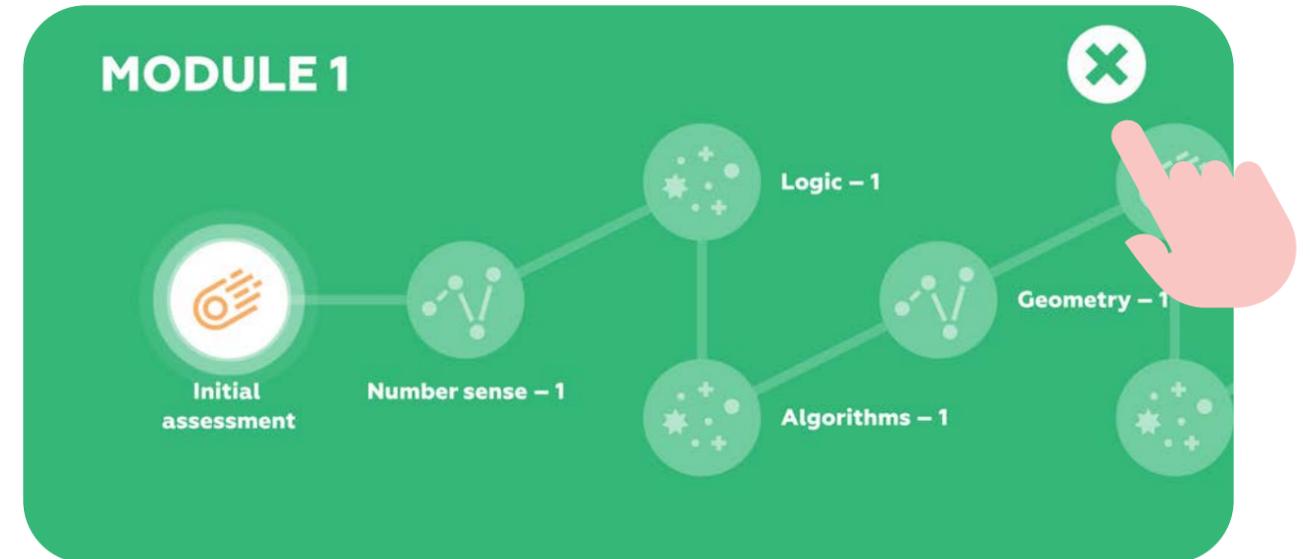

- If there is an available Star Mission, students will be automatically redirected to it after viewing the Welcome screen.
 - The Star Missions can also be found on the app's main screen under the Spaceship icon.
-  The Star Missions is a yearly program led by a magical tutor with 4 modules and 12 blocks per module. Each block consists of math manipulative games, interactive skills training and oral tasks.

Main Menu

Close the Star Missions screen to reach the Main Menu, where you will find:

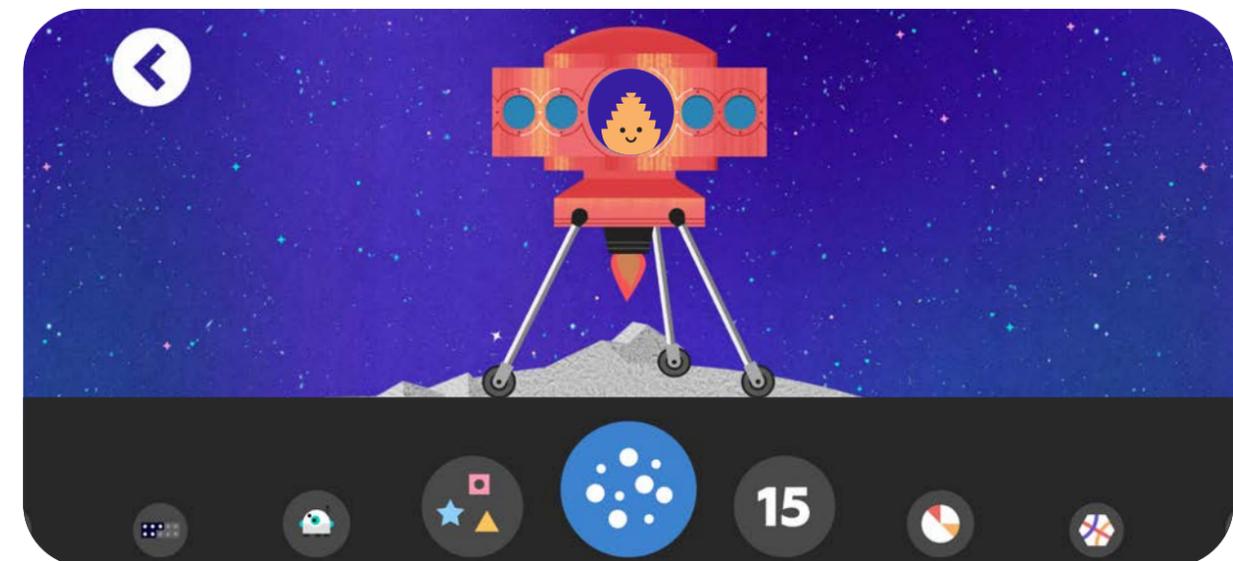

- 1 Adults menu (game descriptions, statistics and reports)
- 2 Star Missions
- 3 Moon Races
- 4 Earth Games
- 5 Change/Add student

Moon Races. Freeplay mode

- Tap on the Moon icon in the Main Menu to access the Moon Races.
- These tasks can also be found in the Star Missions course.

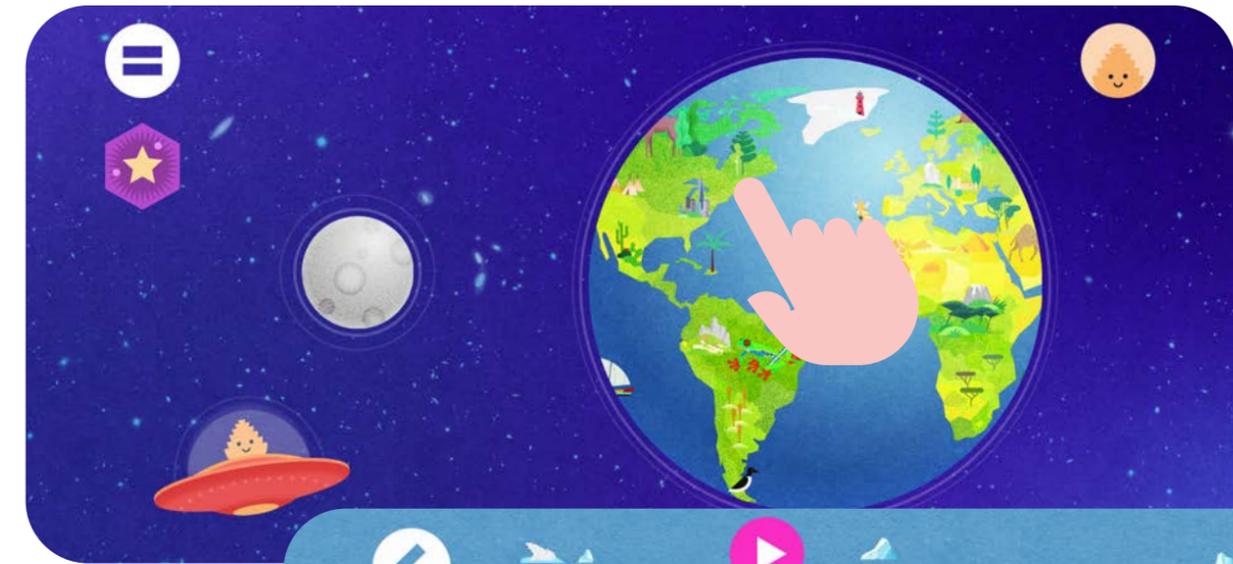

🎓 Moon Races help students achieve mastery and confidence in typical tasks across various math subjects.

Earth Games. Freeplay mode

- Tap on the Earth icon in the Main Menu to access the Earth Games.
- These tasks can also be found in the Star Missions course.

🎓 Earth Games are math manipulative games for kids to experiment in specially designed environments and develop a hands-on understanding of new concepts.

Game and Mission Mechanics

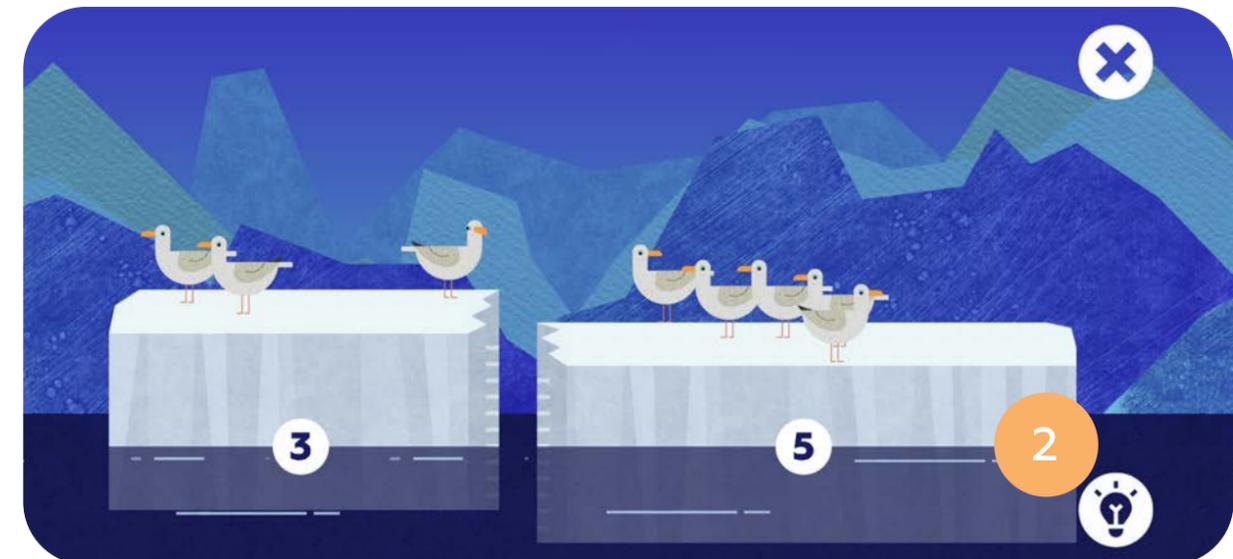

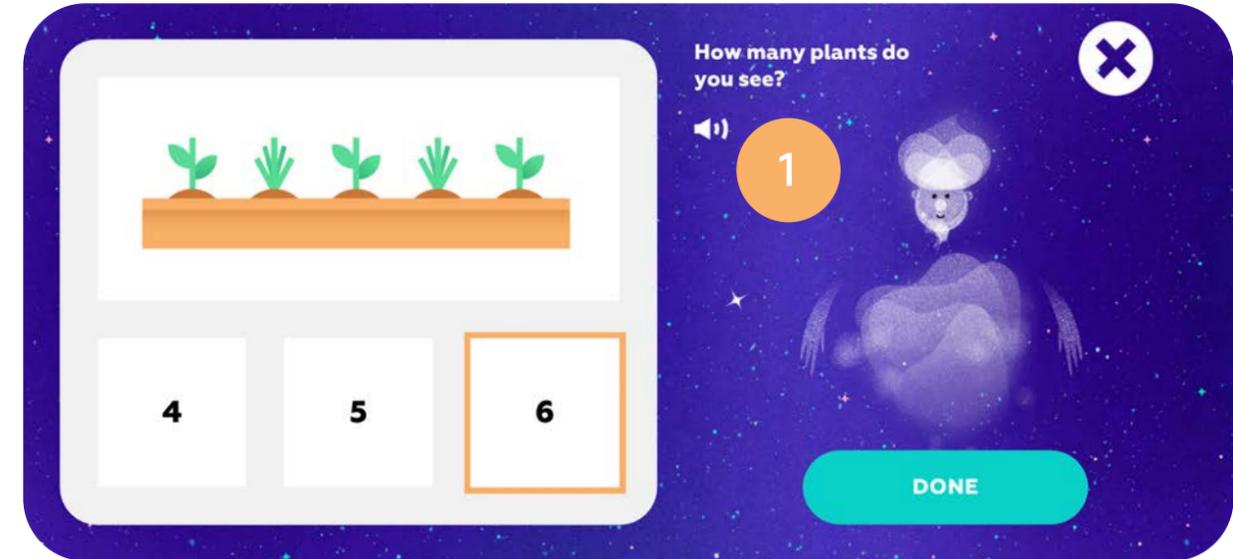

- Tap on the Adult Menu icon in the Main Menu, then tap the Puzzle icon.
- Here, you will find detailed descriptions and examples of all tasks, games and missions.

Quick tips for best use

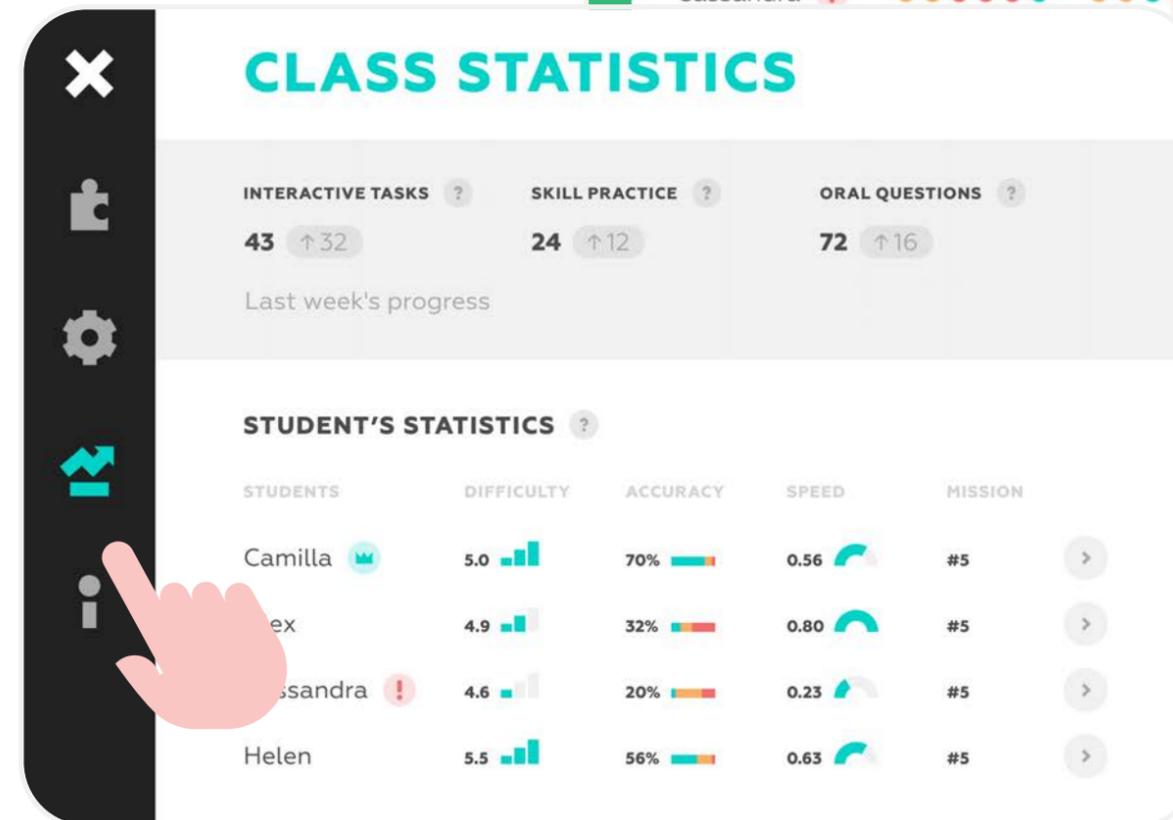

- 1 Any task spoken by a magical character in a mission can be repeated aloud – just click on the speaker icon.
- 2 More complex puzzles have a hint feature. Just click on the lightbulb and you'll receive a handy hint!

Remember: The lightbulb appears 10 seconds after a new task starts.

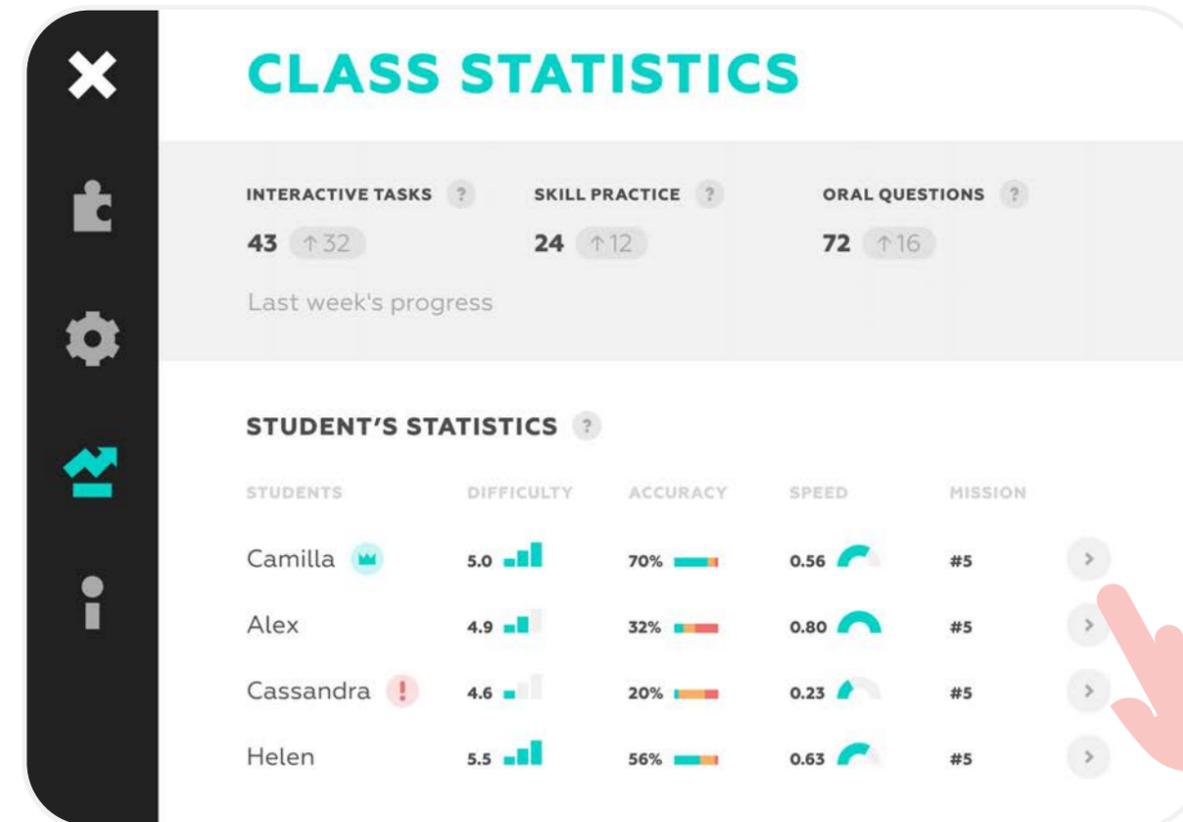

Statistics and Reports

- To check your students' progress, tap on the Adult Menu icon in the Main Menu, then on the Statistics icon.
- Discover detailed class reports highlighting the strengths and weak spots of each student.
- Comparative statistics of completed missions (grouped by topic) can be found in the Course Progress block (below the Student's Statistics block).

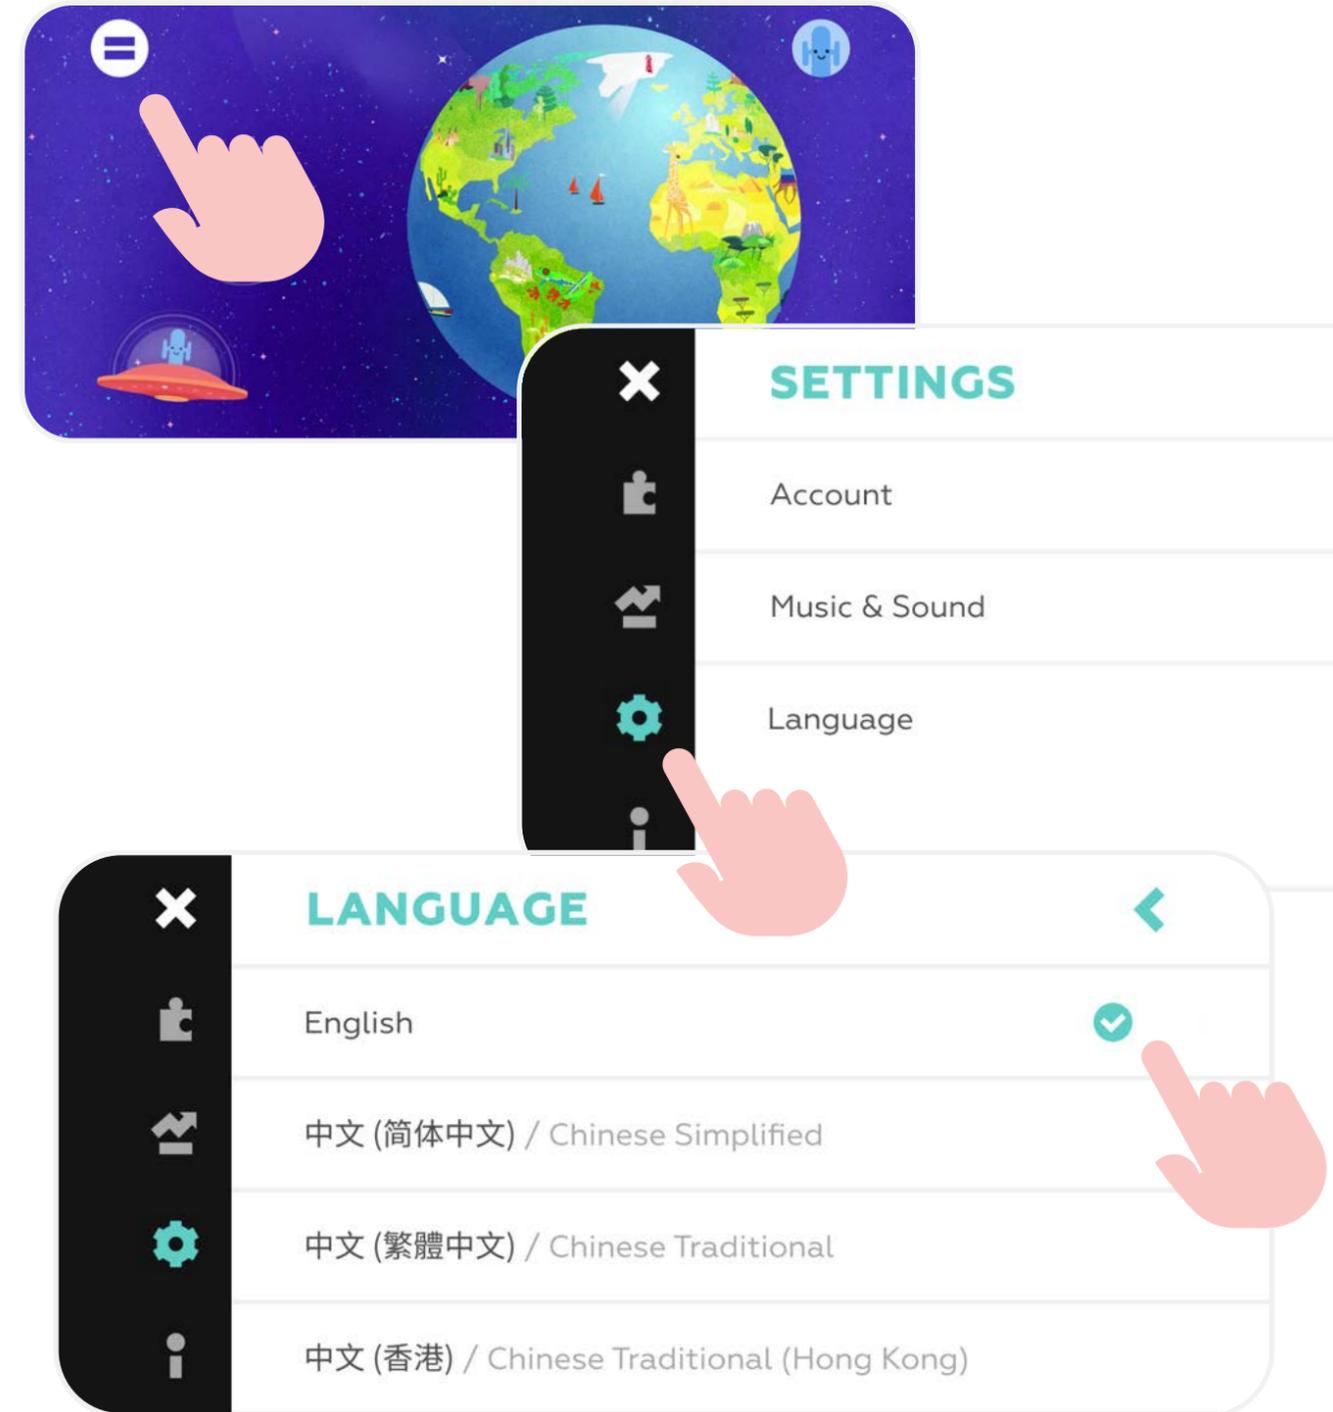

Child's Statistics

- Tap on the arrow next to the Child icon to discover detailed child's statistics.
- Detailed statistics represent a visual display of each student's progress, difficulty level, speed and accuracy.
- Detailed reports for each course module and mission (grouped by theme) can be found in the Course Progress block (below the Current Difficulty Level block).

Got ELL students?

- No problem! Just create another teacher account and add ELL students to it:
<https://funexpectedapps.com/teachers>
- Funexpected Math has been adapted for 17 languages! The language will be the same for the entire teacher account.
- Set your teacher account to your preferred language in your Account settings.
