The main tab on this spreadsheet, the one that drives all the others, is the one where you list all the rentals. You can categorise each one, state the supplier, and then complete the start date and agreed rental period. You can also set a price for the initial period, and then a price for each period there after. So as an example, you can set the rental period as 7 days, and then state that each day there after will cost an extra fee. You have the flexibility to set a fix fee or a fee per number of days for the initial rental, and then a fee per number of days for any extended period. This will then monitor what you are paying. The only other thing you need to do is enter an extension date (if required) and a return date when you finally return the product and end the rental.

This tab is not only for data entry, as the green-headered data will automatically calculate based on the data entered.

There are 5 figures shown there. 1. What you have planned to pay for the item if you take it back when initially planned. 2. Extended planned price. If you extend a rental, it then looks at how much you will pay based on the extension date. 3. To date shows how much you have paid up until today, so it you take it back now, how much will you end up paying. 4. Actual paid, this populates once you have returned an item so it is an actual figure. And finally 5. This is how much you are over or under budget. This takes any one of the other figures (2 - 4) depending on where you are in the rental process, and shows you how it compares to the budget. Positive figures here show how much you are OVER budget.

No. Items	Supplier Name	Contact	Landline	Mobile	Email	Initial Plan	Budget/Actual	Difference
4	Supplier 1					£390.00	£1,677.00	£1,287.00
3	Supplier 2					£640.00	£727.00	£87.00
3	Supplier 3					£210.00	£376.00	£166.00

You can also keep a supplier list. This has space for you to put in some contact details for each supplier, and any suppliers added here will appear on the dropdown list for selection on the data entry tab.

This also has some calculated data. It shows how many items are listed with each supplier, as well as the initial prices, budget or actual prices, and then the difference. This helps you to see if you are regularly going over budget with any particular supplier.

This is a very useful feature of this spreadsheet, the dashboard. At any stage, you can visit this tab to see an overview of what is going on. You can see all of the totals based on each status (initial time, extended time, returned) as well as a count for each one. Not only this but is shows the overall value for how much you're over (or under) the initial budget.

Another handy feature of this page are the warnings. If you have any items overdue for renewal, or any other missing data, it shows up here to warn you.

The dashboard is not the only reporting, there is also a report tab. This shows all sorts of data. For example, it shows all the values based on the relationship between the current status of the items and the various calculations (the monetary values calculated on the first tab. It also shows two graphs which compare the breakdown of money which should have been spent on each category of rental compared to what is now going to be spent. You can see at a glance if any category is to blame for massive increases in cost.

Values Over Budget between Categories and Current Status

Categories	Current Values based on Active Rentals		Final Values based on Returned Rentals		Final Values based on Archived Rentals	
	Ave % over Initial Budget	Value over Initial Budget	Ave % over Initial Budget	Value over Initial Budget	Ave % over Initial Budget	Value over Initial Budget
Cat 1	867.65%	£1,475.00		£0.00		£0.00
Cat 2	23.64%	£130.00		£0.00		£0.00
Cat 3	900.00%	£270.00	42.86%	£60.00		£0.00
Cat 4	-25.00%	-£25.00	100.00%	£80.00		£0.00
Cat 5	-25.00%	-£25.00	42.86%	£30.00		£0.00

Not only that, but you can also see the relationship between how much you go over budget and the category of each rented item (which you can decide on, so you can categorise them how you wish). This could be very useful, as you can see how much over (or under) budget you go for each type, showing you any potential issues which need to be addressed. This shows for current items, returned items, and archived (old) rentals.
