Bricks, Slips, Pavers and Quarry Tiles

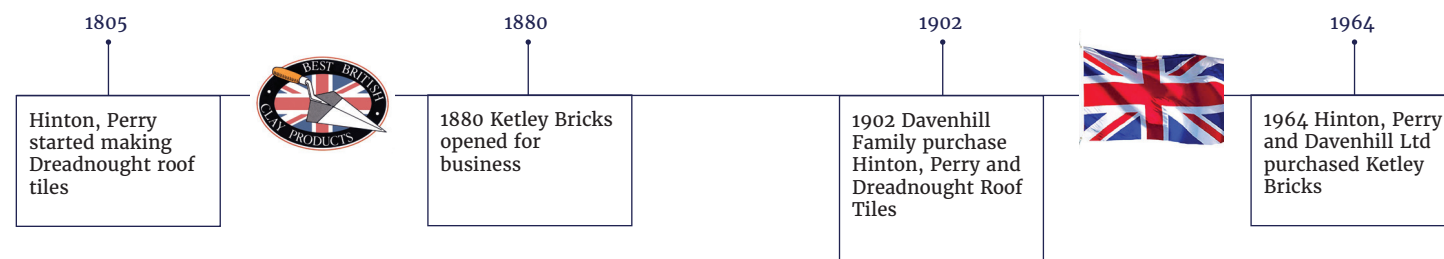

**NORTHERN
ROOF TILES**

NorthernRoofTiles.com

For the past 29 years Northern has imported the finest clay roofing tiles. One of our English tile suppliers, Dreadnought, is part of the Hinton, Perry & Davenhill Group, which includes Ketley Brick. Many of the products in the Ketley range fit Northern's niche markets. This year we are excited to add Ketley Brick to our portfolio.

Ketley was founded in 1880 and became part of the Hinton, Perry and Davenhill family of businesses in 1964.

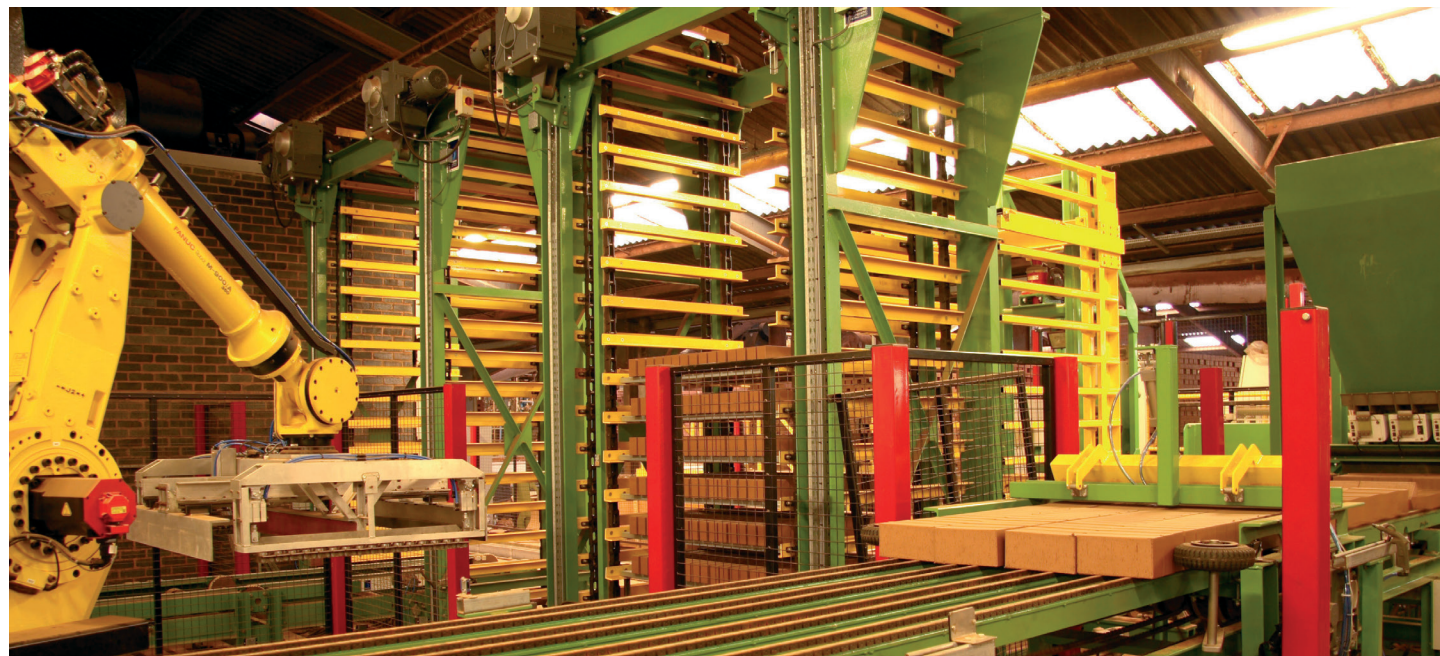

BACKGROUND TIME LINE

For the past 215 years the passion and tradition of making the finest clay building materials has been the focus of this group. All the clay used by both Ketley Brick and Dreadnought Tile is Etruria Marl, recognized as one of the finest clays available.

Ketley and Dreadnought are justifiably proud of their old fashioned and traditional skills. But today, when it comes to production and the firing environmental standards and energy efficiency, are a priority.

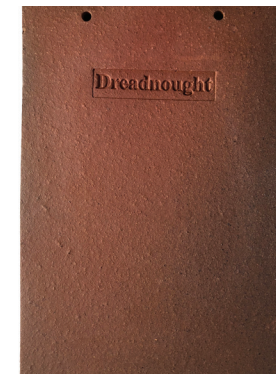

They might have 215 years of clay making tradition but their production technique today is state of the art!

Ketley products are made to engineering brick specifications

Ketley and Dreadnought create their natural shades by delicate control of the kiln atmosphere known as 'reduction firing'.

They do not add any surface staining or pigments. Colors are created by controlling the burn, just as they have for the past 215 years.

The depth of experience of Ketley's workforce, which has been gained over decades, enables them to tackle even the most demanding requirements for specialty bricks and fittings.

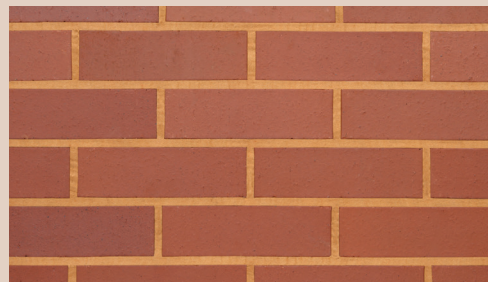

BRICKS

COLORS AVAILABLE

BLUE GREY

RED

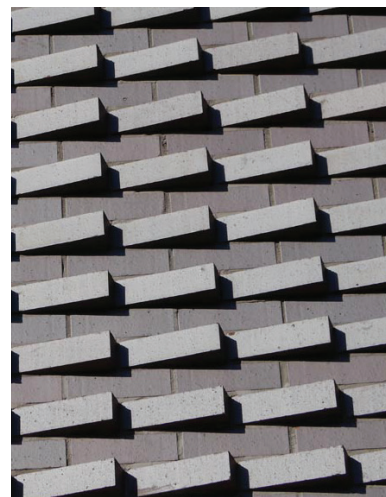

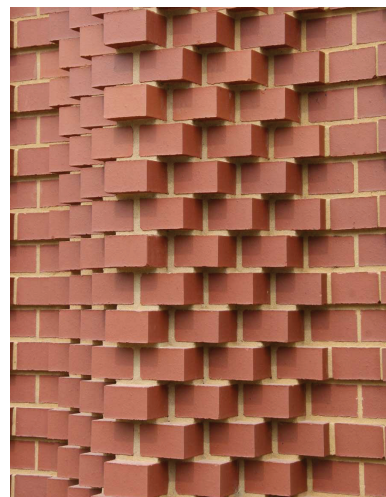

BROWN BRINDLE

Ketley's Staffordshire Bricks are an excellent choice where quality and durability are paramount. Ketley Bricks have been made for the past 140 years and shown they can stand up in some of the toughest environments and have shown long term durability and strength.

Engineering Quality that looks amazing and performs....long term.

Bricks can be used to create all sorts of patterns and decorative panels.....let your creative skills run wild!

SPECIFICATION *Solid or Perforated*

8 1/2" x 4" x 2 1/2"
(215 x 102.5 x 65 mm)
x 7.2 lbs solid or
5.7 lbs perforated

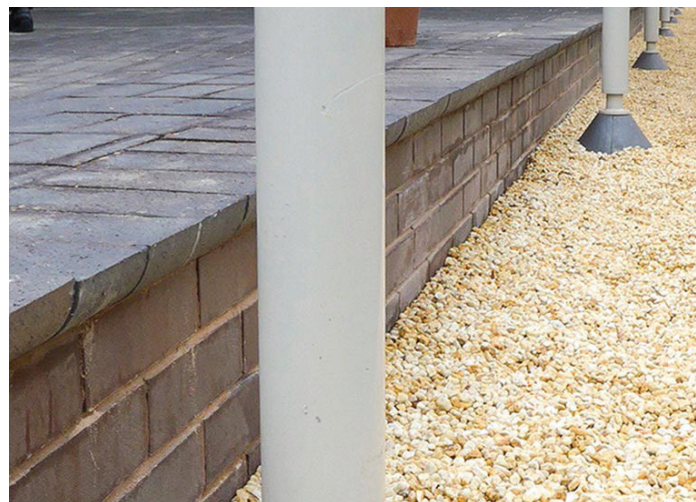

8 1/2" x 4" x 2 3/4"
(215 x 102.5 x 73mm)
x 7.6 lbs solid or
6.3 lbs perforated

BRICK SHAPES USED AS EDGINGS

Ketley offers a complete range of special shapes and they also undertake the manufacture of 'non-standard' specials to customer's specific requirements. The specials are fired alongside the regular bricks so ensuring consistency of color.

Ketley bricks and edgings have high resistance to acids and alkalis, making them ideally suited for foundations, bridges, retaining walls, steps, walkways and all landscaping projects

COLORS & SURFACE FINISHES AVAILABLE:

BLUE / GREY SMOOTH

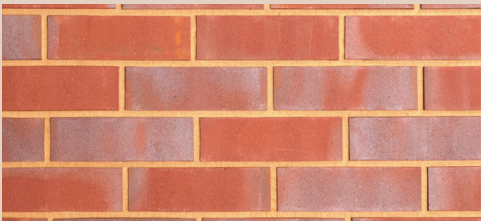

BROWN BRINDLE SMOOTH

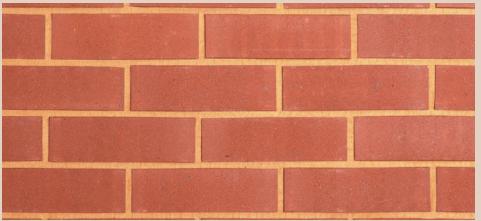

DARK MULTI TEXTURED

LIGHT MULTI TEXTURED

RED /BLUE GREY BLEND SANDED

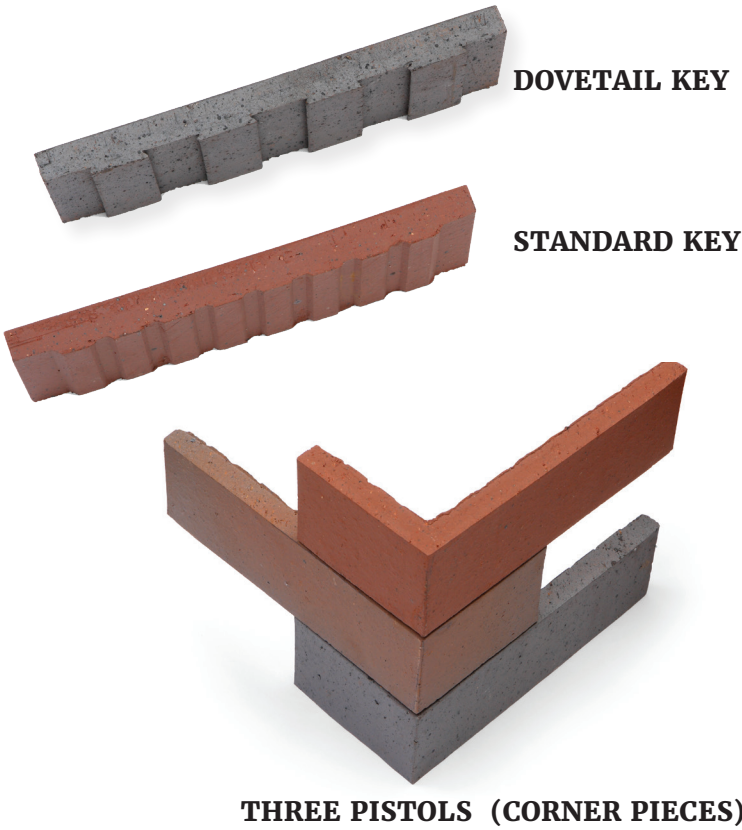

RED SANDED

BRICK SLIPS

Ketley Brick’s range of extruded brick slips eliminate the need and the cost to cut down regular bricks and are perfect for pre-fabricated panels of cladding situations. They also have only 30% of the embodied carbon of a traditional brick but remain highly durable, sustainable and cost effective for construction.

Ketley Brick Slips are made from the same clay, using the same processes as Ketley’s Class A Engineering bricks and Dreadnoughts Roof Tiles, giving you the same low water absorption, high strength and unrivalled weather protection.

Terrific for the authentic brick look in both external and internal applications. The colors are created in the firing without the use of surface pigments or artificial stains.

SIZES & WEIGHTS

8 1/2” x 2 1/2” x 3/4”
(215 x 65 x 18mm)
x 1.25 lbs

8 1/2” x 2 1/2” x 1/2”
(215 x 65 x 15mm)
x 1 lbs

PAVERS

Ketley Pavers colors will not fade over time

Ketley have been making pavers for over 100 years and have passed the ultimate test....the test of time.

8" x 4" x 2" (200 x 100 x 50 mm) x 5 lbs

**8" x 4" x 2 1/2" (200 x 100 x 65 mm)
x 6.6 lbs**

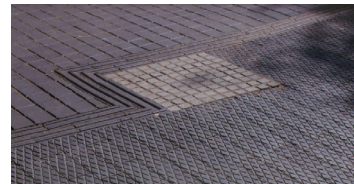

Ketley pavers are available in a wide range of patterns.

EIGHT PANEL PAVER

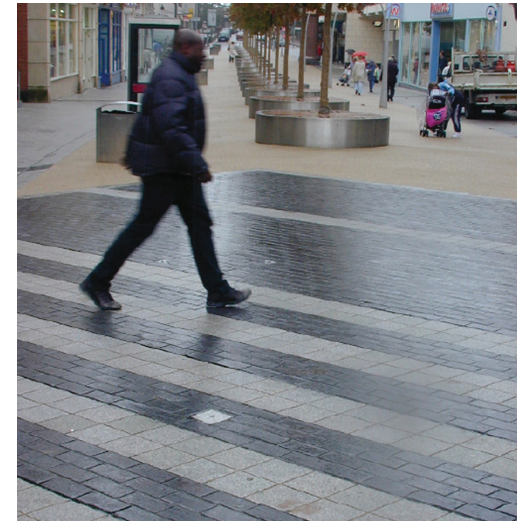

TWO PANEL PAVER

DIAMOND PAVER

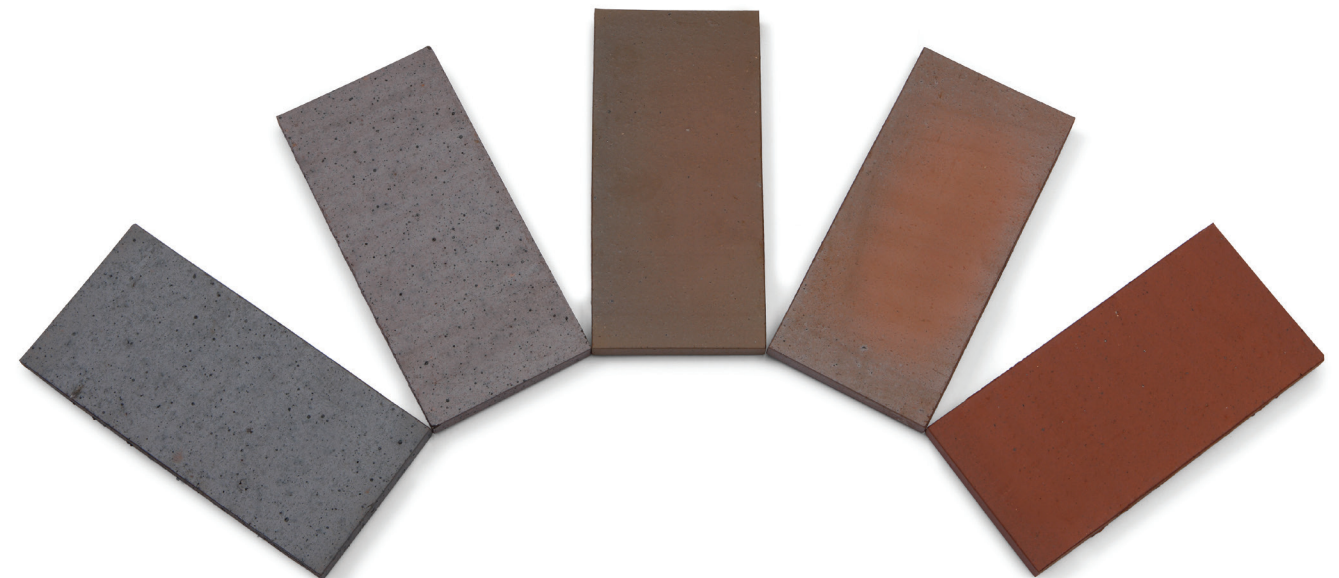

STAR PATTERN

Ketley Pavers are highly durable and perfect for heavy traffic areas.

Ketley Pavers are available with a huge range of special shapes and fittings and if you can't find what you need in our standard range...we will make it for you.

QUARRY TILES

Ketley Quarry Tiles are available in a range of natural colors. They offer excellent slip resistance and suit most flooring and wall cladding applications indoors or externally, in commercial premises or the home.

The 3/4" (18mm) thick quarries are manufactured from the same Etruria Marl Clay as all Ketley and Dreadnought products. When fired they become dense and very hard wearing. Resistant to acids, alkalis, oil, grease and fats.

When tested against the British and European standard for slip resistance these tiles averaged 63 on the dry test and an average of 55 on the wet test. These results indicated they have an excellent slip resistance in both wet and dry conditions.

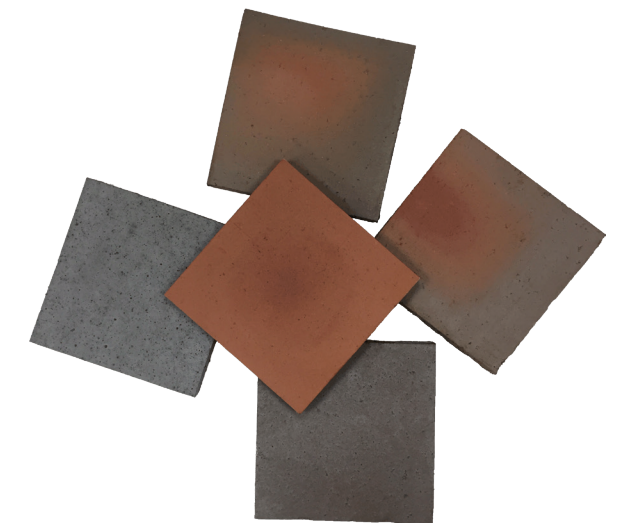

QUARRY TILE SPECIFICATIONS

8 1/2" x 4 1/2" x 3/4" (215 x 102.5 x 18mm)

8 1/2" x 2 1/2" x 3/4" (215 x 65 x 18mm)

IMAGINATIVE USE OF KETLEY BRICK SLIPS & QUARRIES

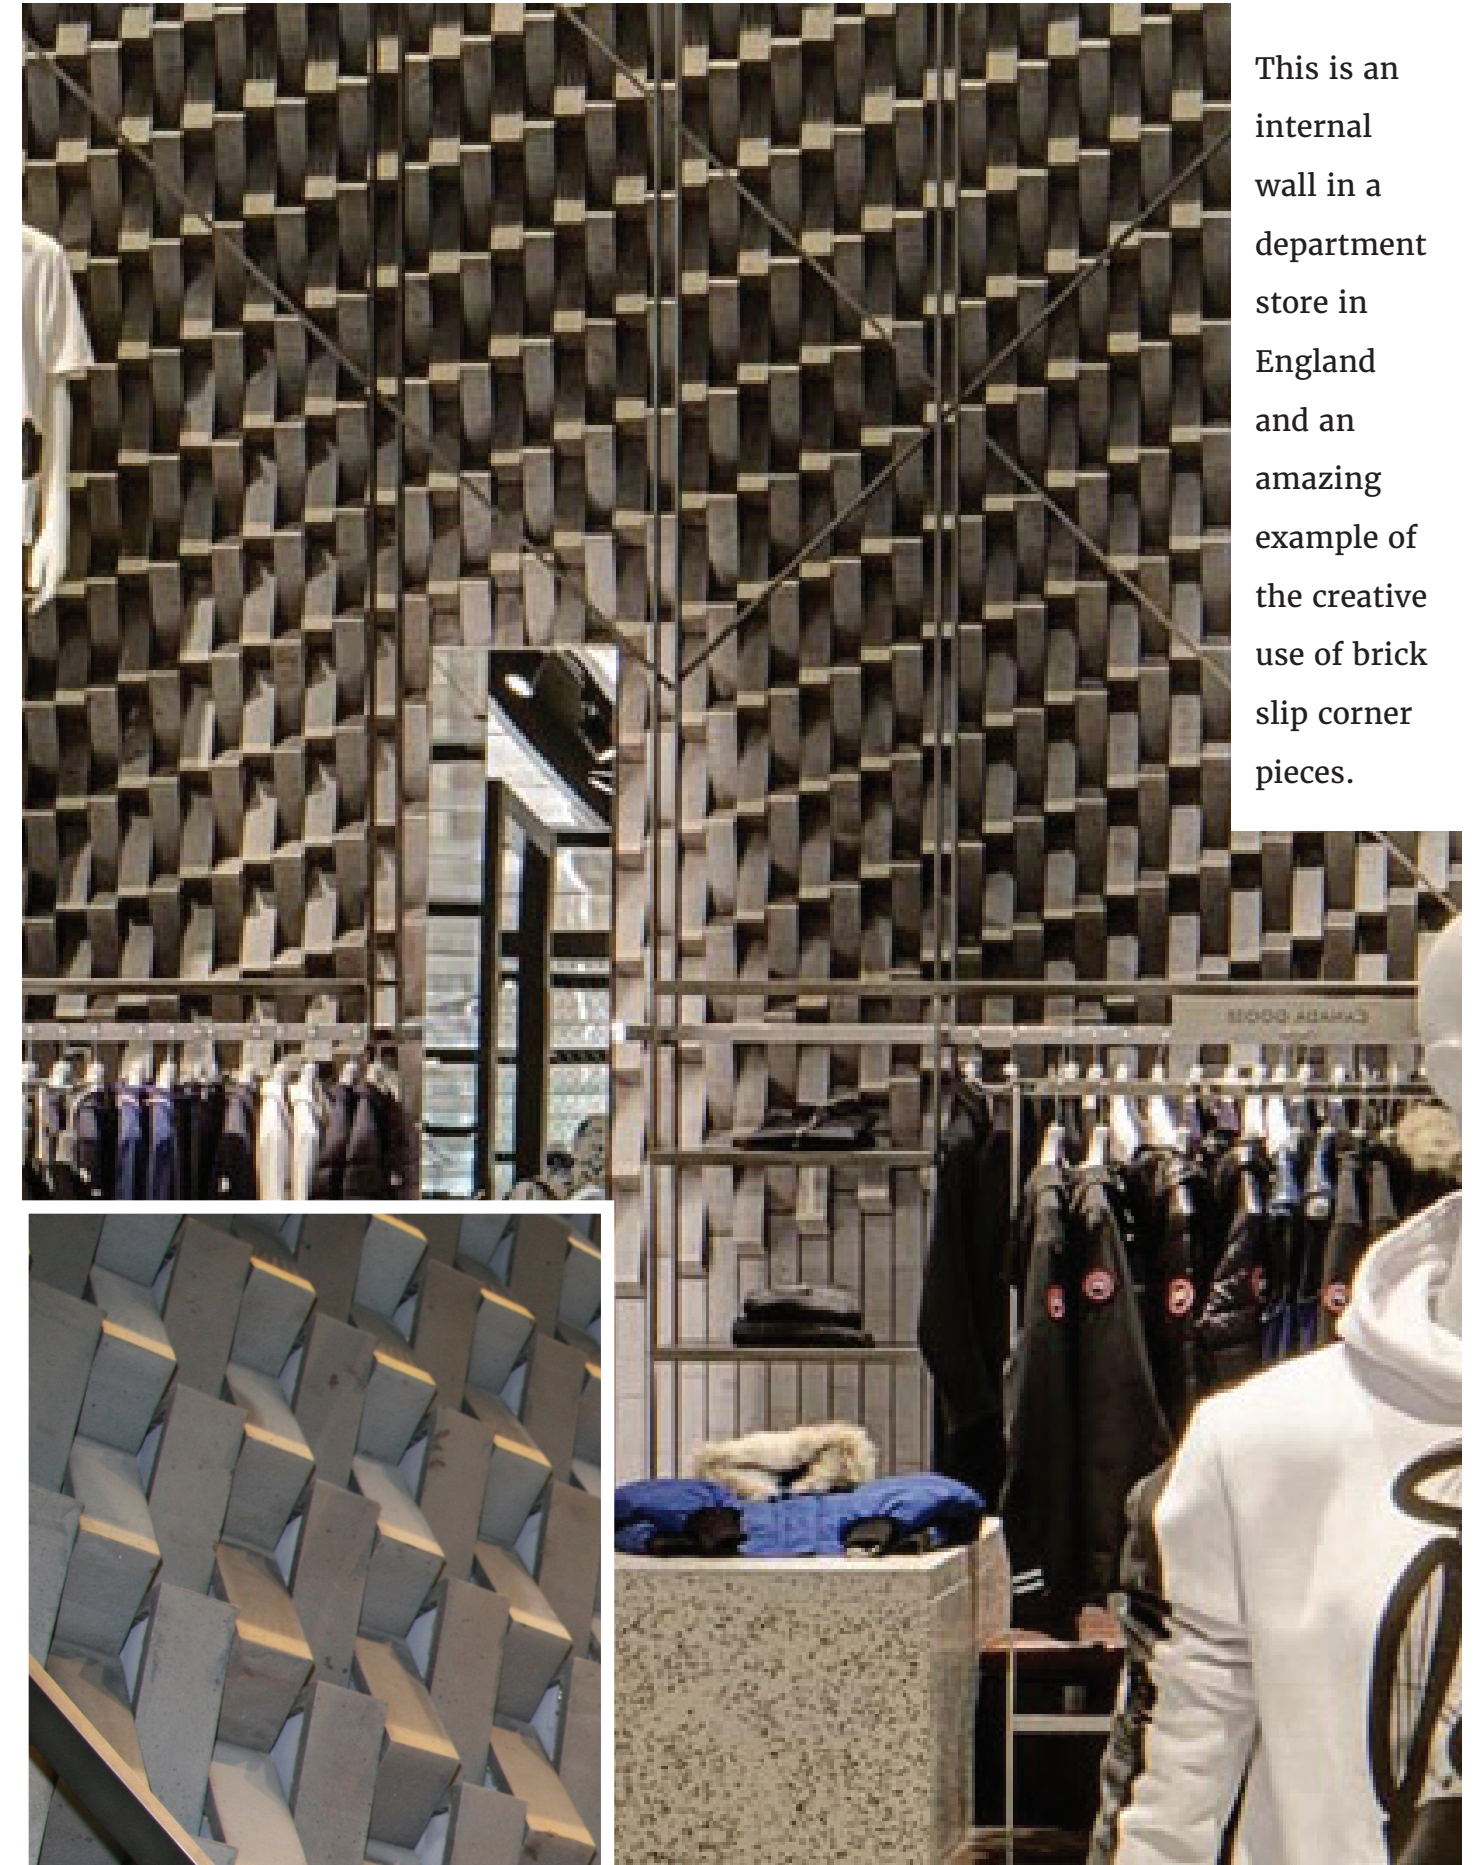

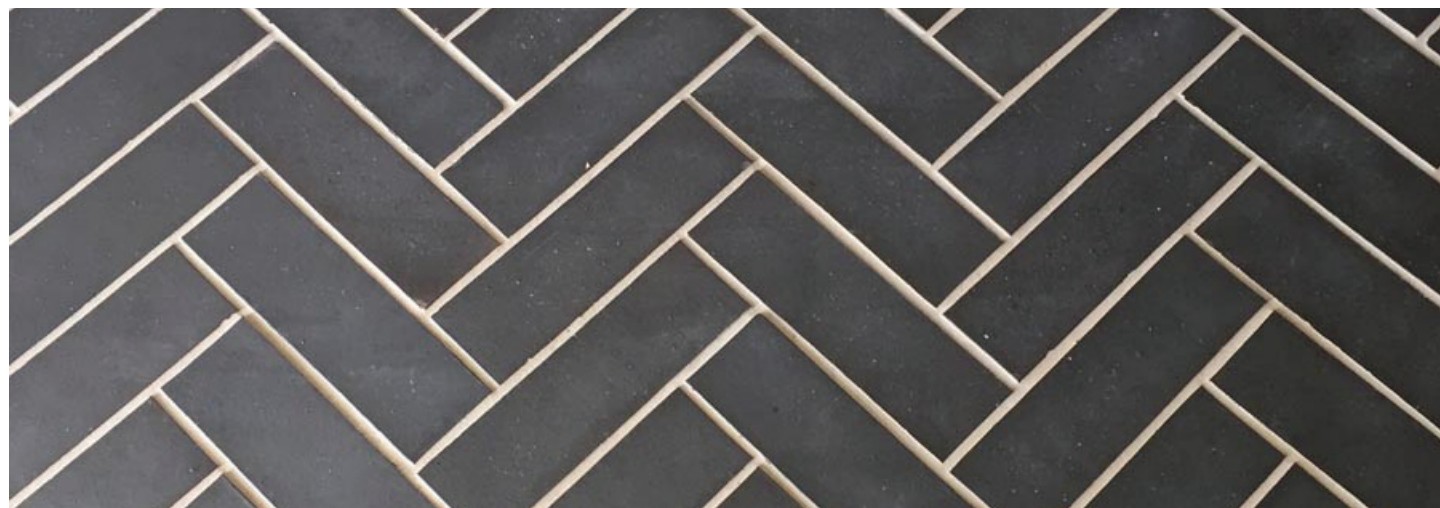

How about covering all available surfaces, walls, floor and even the ceiling?

Ketley Brick Slips used on the walls and ceiling of the entrance to the Ace hotel in London with Ketley Quarries on the floor

IMAGINATIVE USE VERTICAL

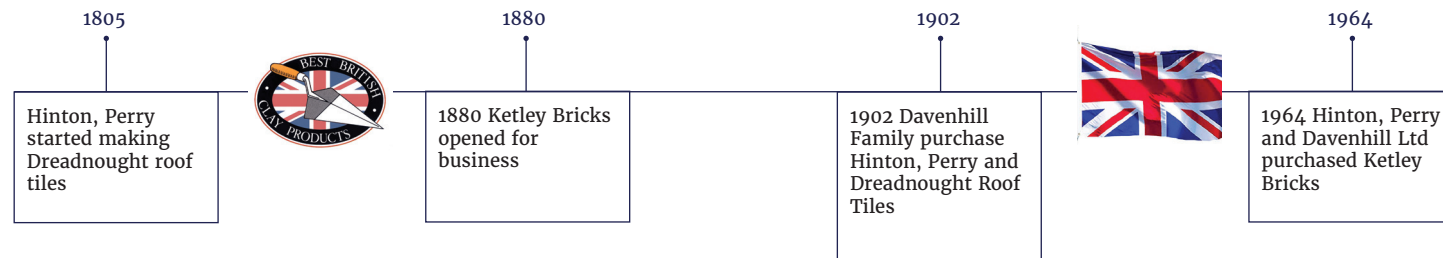

The Ketley & Dreadnought range of tiles and bricks can, of course, be installed vertically inside or out.

This is an internal wall in a department store in England and an amazing example of the creative use of brick slip corner pieces.

ALSO AVAILABLE FROM KETLEY'S OLDER SISTER COMPANY... DREADNOUGHT ROOF TILES

215 YEARS OF HISTORY & TRADITION BACKGROUND TIME LINE

In 1805 Mr. Hinton & Mr. Perry started making roof tiles in Brierley Hill in the West Midlands of England, just like they make today.

In the fall of that year they branded the tiles **Dreadnought**, after HMS Dreadnought, a 98 gun ship of the line that fought at the Battle of Trafalgar under Admiral Nelson.

But it is the raw clay that is at the heart of a good tile and Dreadnought's clay is Etruria Marl...recognized as the very best.

The clay used for both Dreadnought Tiles and their sister company Ketley Bricks is drawn from their own Hollybank Quarry, just down the road.

Today's Dreadnought tiles are not that different from those made by the company over 200 years ago. They might be delivered to your site on a diesel powered truck, or

possibly electric powered in the not too distant future, as opposed to a horse drawn cart with the tiles

packed in straw, but the pride in the tiles and the quality is just the same.

COLORS

STAFFORDSHIRE BLUE

BLUE BRINDLE

BROWN BRINDLE

Dreadnought tiles have a smooth flat surface, square cut sides and butt to give a sharp clean look to any roof.

Dreadnought create their natural shades by the delicate control of the kiln atmosphere process known as reduction firing.

Unlike most tile makers today Dreadnought **does not** add any surface staining or pigments, colors are created by controlling the burn, just as they have for the past 215 years

RED

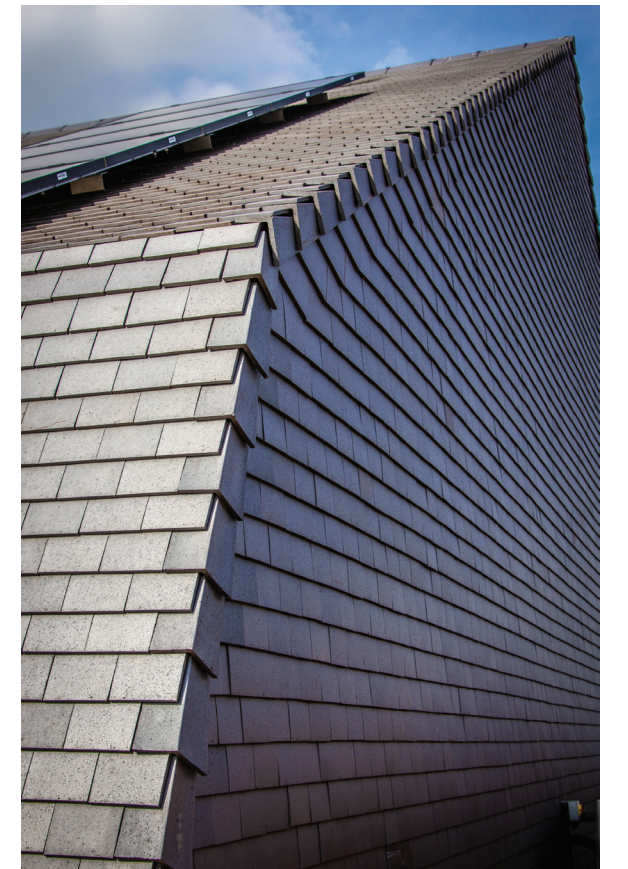

COUNTRY BROWN

DREADNOUGHT ROOF TILES

Dreadnought tiles have a flat surface, square cut sides and butt to give the roof a sharp clean look.

They create their colors, just like Ketley Brick, WITHOUT the use of surface staining or the addition of pigments. They carefully control the kiln atmosphere using a process known as 'reduction firing'

DREADNOUGHT ROOF TILES

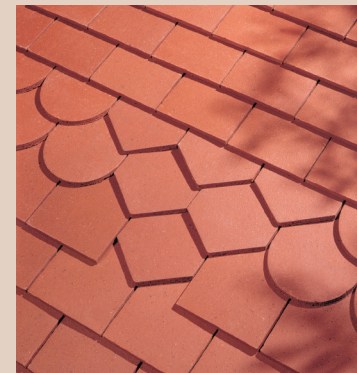

Dreadnought's smooth clean lines work perfectly with curves and blends.

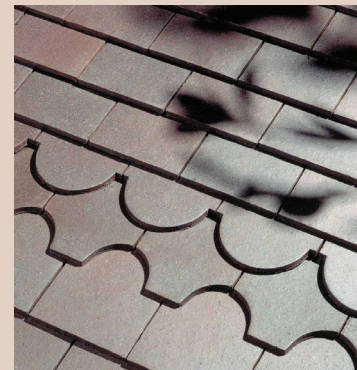

ORNAMENTAL TILES FROM DREADNOUGHT

The Victorians loved ornamentation and Dreadnought have always offered the complete range of traditional shapes.

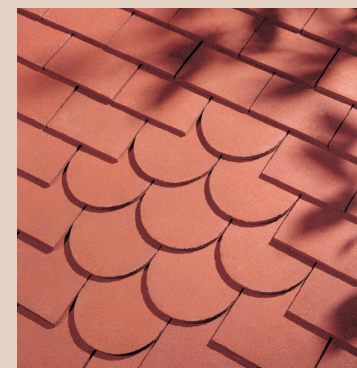

Ornamental shapes are available in all the regular Dreadnought colors and finishes.

CREASING TILES

Creasing tiles are basically regular Dreadnought field tiles but they are flat, and do not have nail holes or nibs. They are the same high quality and are available in Blue / Grey, Red and Brown Brindle.

Creasing tiles are used to form arch over garage door and topped off with regular field tiles with their nibs showing to form a decorative edge.

SIZES & WEIGHTS

10 1/2" x 6 1/2" x 1/2"
(265 x 165 x 11)
x 2.3 lbs

10 1/2" x 3 1/4" x 1/2"
(265 x 82 x 11)
x 1.15 lbs.

A really different use for Ketley Creasing Tiles....good enough to eat off of!

FIREPLACES

A creative use for creasing tiles is to form both a decorative and very functional back to fireplaces as well as the hearth and surround.

We can offer a special size 10 1/2" x 3 1/4" x 1/2" tile that can be laid, on edge, to form any number of decorative patterns.

Please note that these tiles are formed by firing in a kiln at temperatures in excess of 1000 deg C, so they are perfectly suitable for domestic or commercial hearths etc.

CUSTOM & HERITAGE

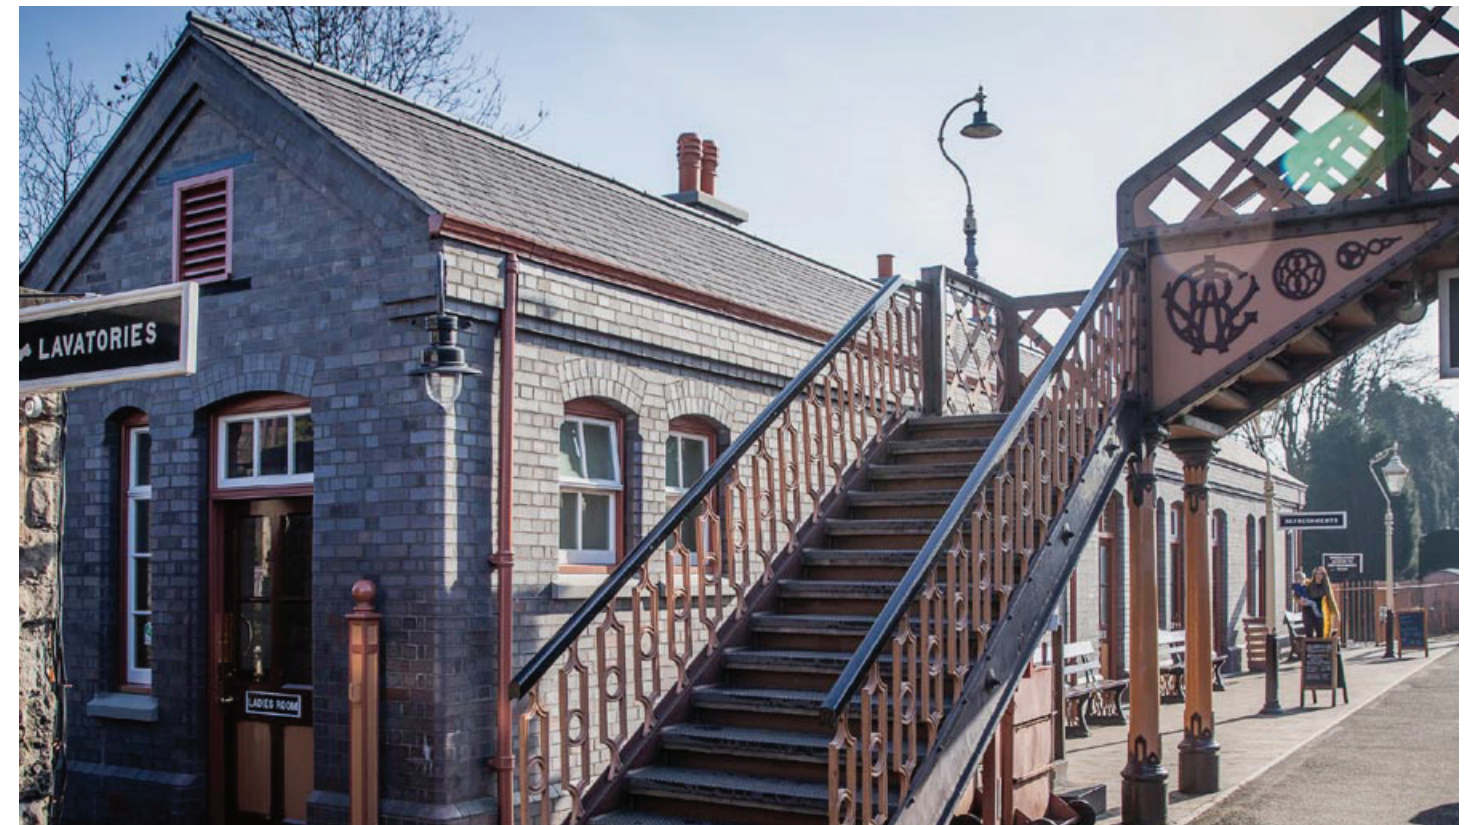

As you can imagine, a company who have been making roof tiles and bricks for 215 years has the craftsmen and women with the knowledge and experience to provide a 'CUSTOM / HERITAGE' service.

They can replicate an existing shape, make a specific shape or shapes to suit a certain condition, or if you can draw it they can probably make it.

Ketley Bricks have been used on many historic restoration projects over the years. In this case for the re-creation of a Victorian Railway Station.

*Just in case you may be asking yourself,
who in the world is Northern Roof Tiles?*

WE ARE

- family owned and operated since 1991
- importers and distributors of all things clay

AND WE

- prefer working with traditional family owned and managed companies such as Ketley Brick & Dreadnought Tiles.
- specialize in sourcing and importing of quality clay tiles and bricks, especially from England.
- can provide guidance and suggestions on period / regional detailing if required.
- do material take off, quantities and estimates.
- provide samples and, when necessary, site displays
- provide a very personalized service to each and every one of our clients
- commission one off or have made out of production items. Call us to discuss exactly what you are looking for.

AND BEFORE YOU ASK

- we have the experience and knowledge to serve the Architectural and Design Community.
- All our tiles, bricks, pavers, etc. are independently tested and are suitable for installation anywhere in North America.
