

TRESTON

Increase productivity and efficiency with the **TRESTON TOWER** storage and workstation unit

Being versatile and easily customisable for different environments and tasks, the Treston Tower storage and workstation unit is ideal for, for example, vehicle and machinery assembly lines, service and maintenance departments, and for any work that requires plenty of mobile storage and workspace near the product under work.

When the storage and/or load capacity of a wheeled service trolley or drawer unit is not enough and you need a unit that is easier to move than a fixed workstation and can be equipped in many ways, the Treston Tower storage and workstation unit is the correct choice.

The frame is made of powder-coated steel (grey, RAL7045). Accessories and add-on products are available in light grey (RAL7035, Treston colour code -49). Because the frame is equipped with the M750 upright frame module, almost all modular size M750 accessories are compatible with the Treston Tower storage and workstation unit.

- ✓ Up to 8 m² of versatile storage space and takes up less than 1 m² of floor space
- ✓ Ideal for facilities implementing LEAN and 5S philosophies because the open structure enables easy and quick visual review of the workstation
- ✓ Thanks to the 4-sided structure, more than one person can use the same workstation simultaneously
- ✓ Increases productivity and efficiency by saving time, since the tools and components are near the product under work and can be moved easily
- ✓ Enables proper ergonomics, since all tools and supplies can be placed at the correct height for the user
- ✓ Long lifetime, as it can be easily modified when the production needs change

Treston Tower storage and workstation unit

Name	Size W x D x H mm	Max load, kg	Code
Treston Tower frame	860 x 880 x 1960	1000	890 700-45
