Introduction Slides with editable text boxes

When you see the word

READY

get ready to listen and read
the problem. You can get
your white board and
marker ready. This is your
signal to erase your board
if needed.

© wanttobesuper teacher.com

When you see the word

SET

you can start working
out the problem and
showing your answer on
your white board.

© wanttobesuper teacher.com

When your
answer is
ready, put
the white
board under
your chin with
your writing
facing you.

© wanttobesuper teacher.com

When you see the word

SHOW

hold up your white board
and show off your
answer. Make sure your
teacher can see it.

Practice question with step-by-step instructions

Let's Practice!

Ready

Erase your board if needed and read the question.

Round 57 to the nearest 10.

Set

Now work out the problem on your white board. When you have your answer ready, put the white board under your chin with your work facing you.

Round 57 to the nearest 10.

Show

Show off your answer! Hold up the white board so your teacher can see your work. Don't worry if it's wrong. Mistakes are proof that you are trying!

Round 57 to the nearest 10.

Round 39,953 to the nearest 100.

Editable Slides + Instructions for Easy Customization

Editable
Slides
Below

Editable Slide Instructions

If you would like to create additional slides for this show, the text boxes on the slides below are **editable** and can be copied and pasted into the existing show as many times as you would like.

To edit the slides, just click on the text box and edit away! The fonts used on these slides are embedded into this PowerPoint so they should show up on your computer just like they do on mine. However, if something isn't looking quite right, you can also download these fonts for free at TpT and download them to your computer.

The fonts used are:

[KG Miss Kindergarten](#) (questions)

[KG Blank Space Sals](#) (answers)

To follow the links, **right click** on the link above and choose "open hyperlink".

Once you have created your own slides, you can copy, paste, and move them wherever you would like in the show.

To do this, go to the left-hand side of the screen where you see all the slides.

Click the first slide you want to copy (probably the Ready slide).

Now hold down the **Shift** key and click the last slide you want to copy (probably the Answer slide).

Now hit **Ctrl+C** to copy.

Go wherever you want to put the selected slides in the show and click between the slides where you want to insert your slides.

Now hit **Ctrl+V** to paste the slides you copied.

If you want to move the original slides, you can do this using the same process above, but when you paste them the slides will appear blank. Don't worry! Just hover over the first slide you pasted and choose "Keep Source Formatting" from the pop up clipboard menu. Then the slides will look like the originals.

If you make a mistake, stop... breathe... And hit **Ctrl+Z**. This will undo the last action so you can retrace your steps. (This strategy works very well for kids in the computer lab too.)
