The Hawaii legislature has directed the Department of Business, Economic Development & Tourism (DBEDT) to undertake a study on the future of utility ownership models in Hawaii. As a part of this study, London Economics International and Meister Consultants Group invite you to share your thoughts and input on the future of electricity utility ownership and the role a utility plays in achieving state energy goals, including achieving 100% renewable energy and minimizing rate increases.

We welcome everyone's participation and request that you to RSVP at the link below. Light refreshments will be served.
