Multi flash photorejuvenation working mode to boost the collagen production to the maximum level with longer and safer energy spread

FAST & SAFE

Large spot area of 7cm² for fast and easy treatments with USB connected cartridges for better and safer performance

2 TREATMENTS

POWERFUL ♦ FAST ♦ EFFECTIVE

After 14 years of experience in the production of professional IPL devices for specialized clinics and research in the IPL treatments, we developed D Light™ Pro, a next generation home use IPL device that combine Permanent Hair Removal (HR) and Photorejuvenation (SR) in a single device with professional features. D Light™ Pro is built in high performance capacitors and at maximum power can deliver 50 Joules of total energy on a spot area of 7cm² (7-8J/cm²), much more than many home use devices on the market, that ensures an extreme effectiveness for fast and great results.

D Light Pro allows to choose between 10 different level of energy, much more then many home use devices on the market that normally have a range between 1 and 5, this makes possible to perfectly customize the treatment in according with the phototype and the skin sensitivity.

Patented technology	Intense Pulsed Light
Power supply	Dual Voltage: AC100-240v, 50Hz/60Hz
Spot Area	7 cm ²
HR Wavelength	530 - 1100 nm
SR Wavelength	650 - 1100 nm
Spot HR cartridge	20.000 (x2)
Spot SR cartridge	30.000 (x3)
cm ² Output power	1 ~ 7j/cm ²
Total Output power	50 Joules
Nominal power	150w
Cartridge connection	USB
Number of pulses	2(HR) - 5(SR)
Net weight	1.75 Kg
Device size	L270mm x W230mm x H120mm
Packaging size	L300mm x W300mm x H135mm.

- LED Status Indicators**
- ▶ Flash ready
 - ▶ Cartridge life
 - ▶ Power ON/OFF
 - ▶ Energy level
 - ▶ Operating mode HR/SR

Touch Keyboard
The touch keyboard allows a simplified use and an easier cleaning of the device

Multi Flash Professional System
Each pression of the firing button delivers 2 flash in HR mode and 5 flash in SR mode. This technique allows to gradually maximize the absorption of light energy without skin damages

10 Levels of energy
10 different levels of energy, much more in comparison with the others home use IPL devices which normally range from 1 to 5. This important feature makes able to perfectly customize the treatment in according with the phototype and the skin sensitivity

Flash ready and Skin touch indicator
The handpiece LED indicator gives a real time status about the flash charge and the right contact with the skin

Large spot area
The D Light™ cartridge can deliver 7 Joules/cm² on 7cm² of spot area, this is the minimum technical requirement for a professional IPL device, D Light™ is the only home use device on the market that can satisfy that standard.

Hair Removal & Photorejuvenation Bulbs – 7cm²

20.000 spot x 2

30.000 spot x 5

USB Connection
