

1. Hey Siri

Enable with "Hey Siri" command, in **Settings/Siri & Search/**, or hold down the Home button until you hear an ascending double beep. Speak an instruction and Siri will give you a response. **To dismiss Siri**, press the home button.

2. Speak Screen (recite app content)

To enable, go to **Settings/Accessibility/Spoken Content/**. You can adjust the voice's dialect and speaking rate, and have words highlighted as they're being read.

To activate Speak Screen, ***swipe down from the top with two fingers***, or just ***tell Siri to "Speak Screen"*** and have all the content of the page read back to you.

3. Voice Over (touch, listen, and multi-tap)

To enable, go to **Settings/Accessibility/VoiceOver/**. (use with caution)
When the iPhone is used with VoiceOver, *it will operate differently.*

startup

A. **To activate VoiceOver**, enable VoiceOver with **Triple Click**. When Triple Click is configured with VoiceOver, press the Home button three times to toggle VoiceOver on or off. To activate VoiceOver Triple Click, go to **Settings/Accessibility/Accessibility Shortcut/** and select VoiceOver.

B. **To turn the iPhone on**, hold the power button in the top right of the phone for 2 seconds and then release. In about 15 seconds, the unlock screen will appear. VoiceOver will announce the time. If you do not touch the screen within 10 seconds, the screen will lock again.

C. **To unlock the screen** after the time is announced, drag 1 finger up from the Home button in the bottom middle of the device. VoiceOver will announce "slide to unlock" and "slide or double tap". Use **1 finger to double tap** on the screen to unlock it. You will be at the Home screen.

phone calls

D. **To answer a call**, use **2-finger double-tap** on the screen. This action will also end a call.

E. **To place a call**, activate the phone app. VoiceOver will announce "blank phone number." Drag 1 finger on the screen until you find the number and then double tap on the number. You can also ask Siri to dial a phone number or a contact.

navigation and sound

F. **To activate an app**, drag 1 finger around around the screen to hear what is under your finger. When the desired app is located, use **1-finger double-tap** to activate the app. Once in the app, drag 1 finger around the screen to explore the app.

G. **To move between screens** of apps, use **3-finger swipe** left or right.

H. **To exit to Home screen** at any time, press the Home button.

I. **To silence VoiceOver** at any time, use **2-finger tap** on the screen.

J. **To adjust the volume**, use the volume up and down buttons on the left side of the iPhone when the VoiceOver is talking.

K. **To silence the iPhone**, flip the silence switch on the top left edge of the iPhone toward the back of the phone, allowing you to still feel the vibration if the phone rings.

privacy (silent and/or black operation)

L. (caution) **To mute VoiceOver** for *privacy*, use **3-finger double-tap** on the screen. This will turn VoiceOver speech on or off.

M. (caution) **To toggle Screen Curtain** for *privacy*, use **3-finger triple-tap**. This will cause the screen to go black.
