

PERCEPTION

Sensory Walk

Directions: As you walk, record the things you see, smell, touch, and hear. Don't discuss it with your classmates—Just record your perceptions.

See	Smell	Touch	Hear

PERCEPTION

Sensory Walk Debrief

Directions: Discuss your observations with your group and answer the questions.

1. Which category contains the most information on average for your group?
2. Why do you think this is the case?
3. List one thing in each category that every member in your group wrote down (if possible).
4. List two things from each group member that only they wrote down (if possible).

Now participate in the whole class discussion.

We all took the same walk. Why do you think our observations were different?
