Beer-to-Beer Technology

Biznek runs on a disorientated beer-to-beer ETH communication technology with massive scaling opportunity but very slow transactions and network congestion.

No worries...
No rug pulls

Because we
love carpets!

Seriously...

I mean look at this beauty!

Why use wallpapers when
good old rugs are much
better! Not bad huh?

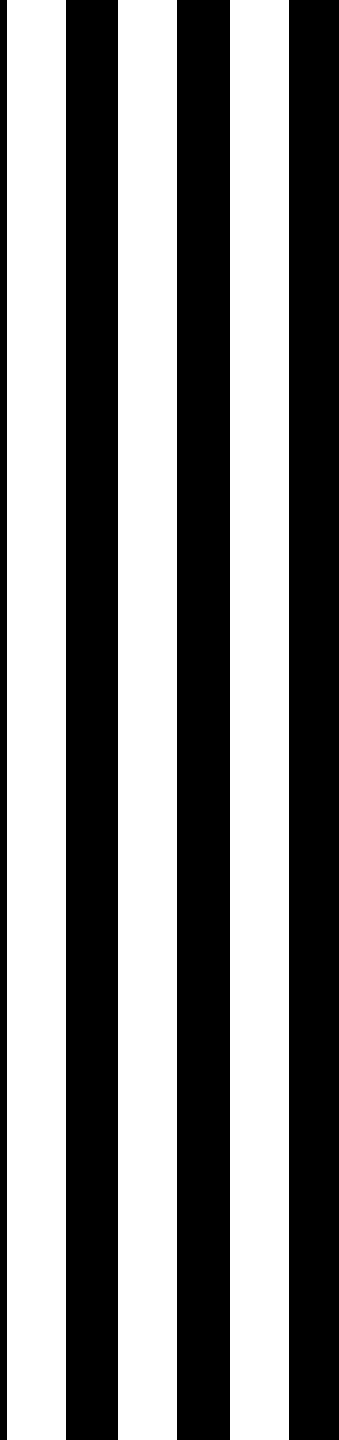

**Just squat
and HODL on
your rugs!**

Like we do

**So you
may ask...**

When Lambo?

But we say only idiots buy
expensive and fancy
sportscars

#WhenLada

Big biznis gopniks buy
cheap cars and invest
rest of the money...

Let's Ride

Hop on, we drive

Roadmap

None... as we don't want the pressure of actually doing something!

We'll just squat and see where it goes!

**6 Boring Reasons
why Biznek
will succeed:**

1) Born in USSR, Raised in EU

We are gopniks and capitalists at the same time. We've lived under the laws of both Boris Jeltsin and Babushka Merkel. Our Diplomat Dima speaks both languages!

2) Original content creation

Real models and in-house
content production with
cheap studio equipment
bought from Poland.

3) Strong design and storytelling backgrounds

We gave Alex a laptop...

Now he works day and night!

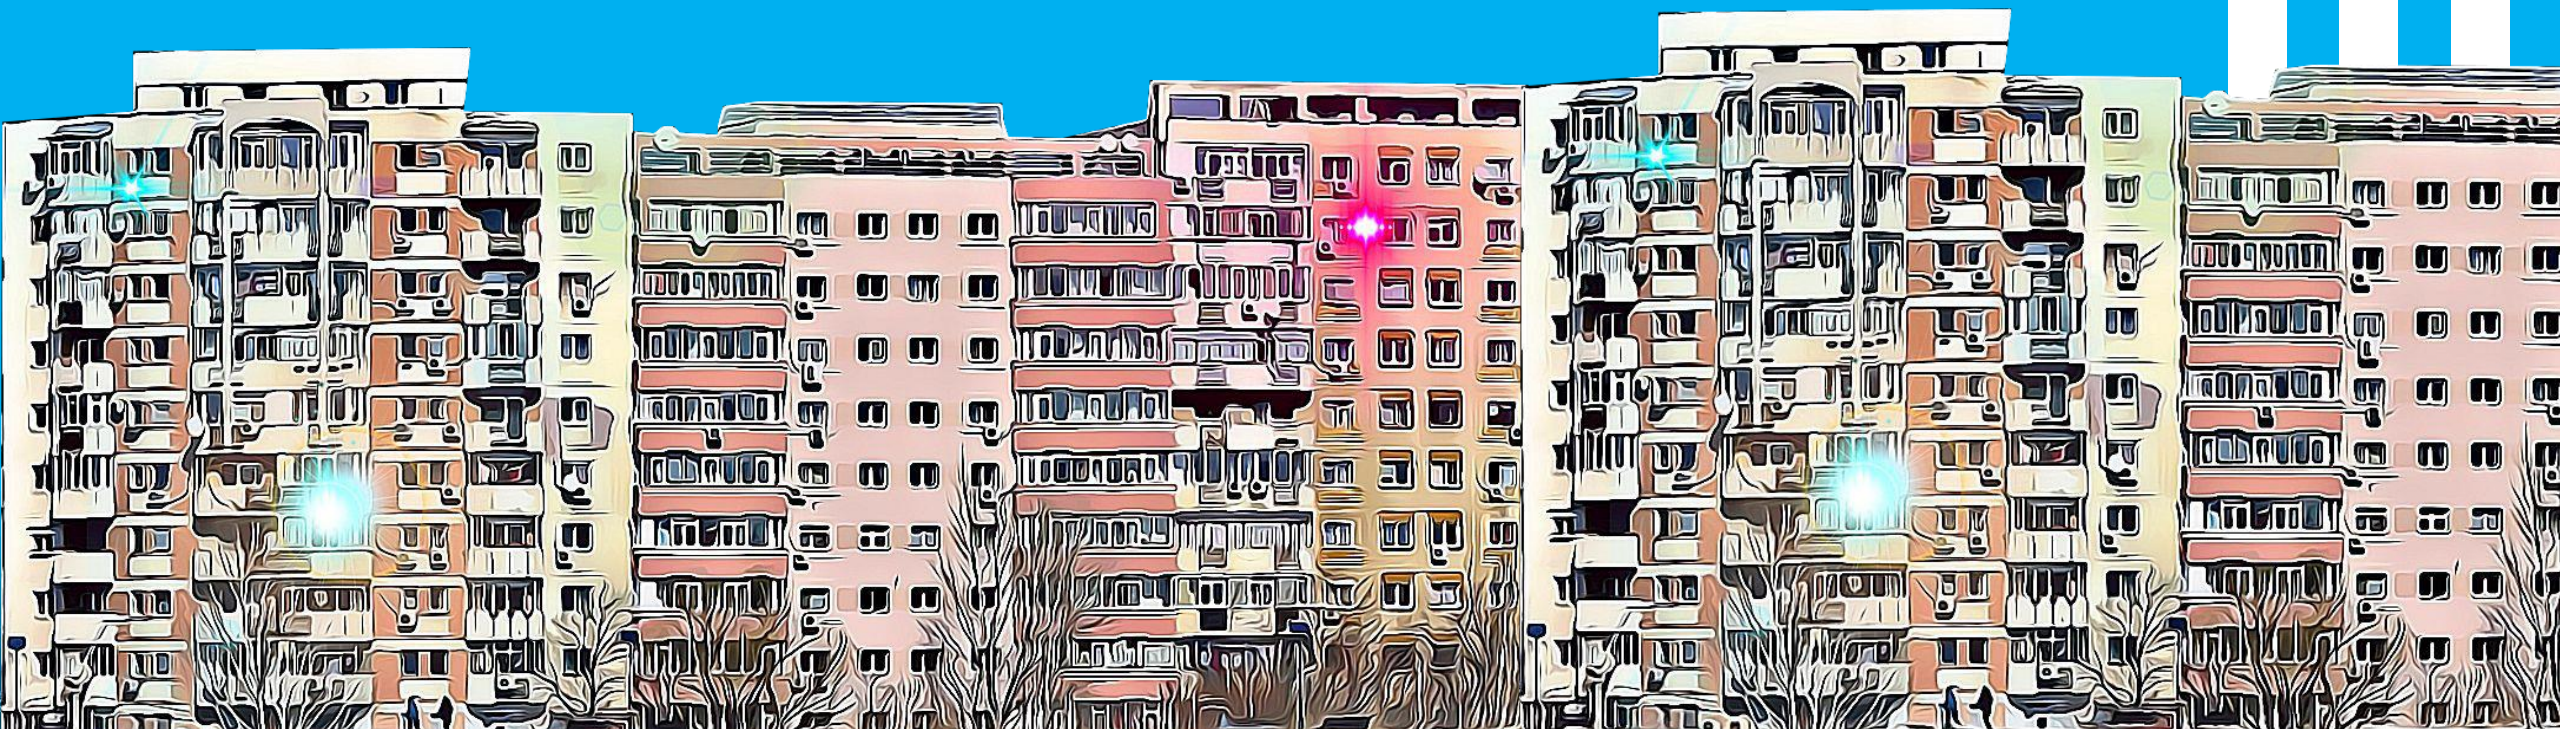

4) It's all-in family biznis

Nobody is left out,
everyone has their
own tasks...

5) Strong Biznis Network

All Gopniks in our apartement building unite for this big biznis

**and most
importantly...**

6) We have the blessing from Babushka!

Babushka is also a blockchain expert
thanks to her grandson Vitalik.

Having reviewed our crypto project,
she gave us her blessing
and lots of kompot.

**and don't
forget...**

we want to
build our own
metaverse
too...

Actually some of us
are already there!
