In mobile view editor, PDF file is displayed but not on my own mobile
It works well enough on my Ipat and a home page also appears on my mobile.

The left screenshot shows a Samsung smartphone displaying a mobile version of a Wix website. A red box highlights the text "In mobile view editor, PDF file is displayed but not on my own mobile". Below the phone is a larger image of the same phone screen, showing a PDF document titled "da06_37c80045276b454681cff630ad788b44.pdf" with a blue "Åbn" button. At the bottom, it says "Deltag med os på Wixapp" with a download icon. The right screenshot shows a computer browser window displaying the same mobile site. It shows a PDF document with the same title and content, and below it, a message: "Denne hjemmeside er designet med hjemmesideværktøjet fra WIX".

The screenshot shows a Wix website with a red header containing the logo and menu items: Hold og tilmeldinger, Aktiviteter, Medlemskontingent, Oplysninger, Foreningen, and Sponsor/Annoncer. Below the header, there's a banner with a green circular icon and the text "SVSI". On the left, there's a sidebar with links: Krocket?, Omkring Klubben, Kalender, and Billeder. The main content area has a heading "Doc nr. 3" with "Download" and "Wix Link" buttons. A large red arrow points down from the "Wix Link" button. To the right of the main content, there's a "Developer Console" tab and a "Standardvisning" tab. The main content area contains a PDF document with sections like "Beskrivelse af punkterne 1 – 6", "Punkt 1, 1 A og 1 B vedr. holddata", and "Punkt 2". Red arrows also point down from the "Standardvisning" tab and the "Developer Console" tab.

```

    console.log("name = " + name);
    console.log("url = " + url);

    $w("#html20").src = `https://docs.wixstatic.com/ugd/${url}?`;
    $w("#html21").src = `https://www.svendborgkrocketklub.dk`;
  })
})

export function button3723_click(event, $w) {

  let url = source.split("/")[3];
  console.log("02 name = " + name);
  console.log("02 url = " + url);
