SUMMER COLLECTION 2019

The Hague, 20 June 2018

inti ferreira launches the new Summer Collection 2019

We are excited to launch the new Summer Collection 2019!

Superior materials, high-quality workmanship, sophisticated cuts and longevity are the key characteristics of inti ferreira. Our designs celebrate the feminine and yet always remain versatile and comfortable. The fashion of inti ferreira can be subtle at times and fearless at others, but always remains chic. inti ferreira creates clothes for fashion-conscious individualists who have not only opted for wearable elegance, but are also committed to creating a healthier environment.

The Summer Collection 2019 is marked by liminality (a reference to ethnology) and the theme of departure. It is an examination of the threshold state, which stands between the detachment from the old and the beginning of the new. This handcrafted collection calls for a departure towards a new world, into a greener future and towards a more responsible use of resources.

Nature and the elements take center stage in this journey along the threshold. Strong reds and beige are used as referents for the mighty, dry and rough desert. The image of the mirage - fleeting, magical and playful- is captured by silver in interplay with sea green. It is an experience that is fragile, yet impressive and ultimately transcendental. Finally, the collection draws from the image of the oasis: refreshing and vital. Airy fabrics like tulle, as well as shades of green and blue. Tranquil water elements invite you to relax.

In true inti ferreira style, the Summer Collection 2019 epitomises fashionable eco-chic. It is an homage towards modern and world-conscious women, worldwide.
