Solutions for special environments!

Why use an automatic discovery tool ?

Save time

You don't need to figure out details manually!

Accurate informations

Your data is up to date and reliable!

Know your environment(s)

Are there new assets? Was there a change?
Where is it running? Did we need that?

Feed your processes

Reliable data is the base for a lot of your
processes.

Why use an automatic discovery tool?

How does Insight Discovery works?

Solutions for special environments!

How does Insight Discovery works

Windows Management Instrumentation

Fetch data from your Windows-Systems

Secure Shell

Fetch data from your Unix/Linux-Systems

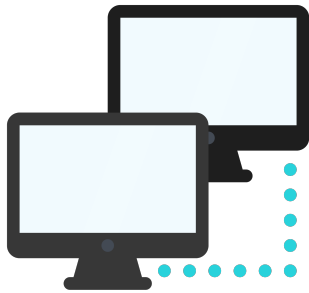

Simple Network Management Protocol

Fetch data from Network-Devices

Extend Discovery for your needs

Create pattern for special needs or applications

Agenda

Why use an automatic discovery tool?

How does Insight Discovery works?

Solutions for special environments!

Solutions for special environments

Collector

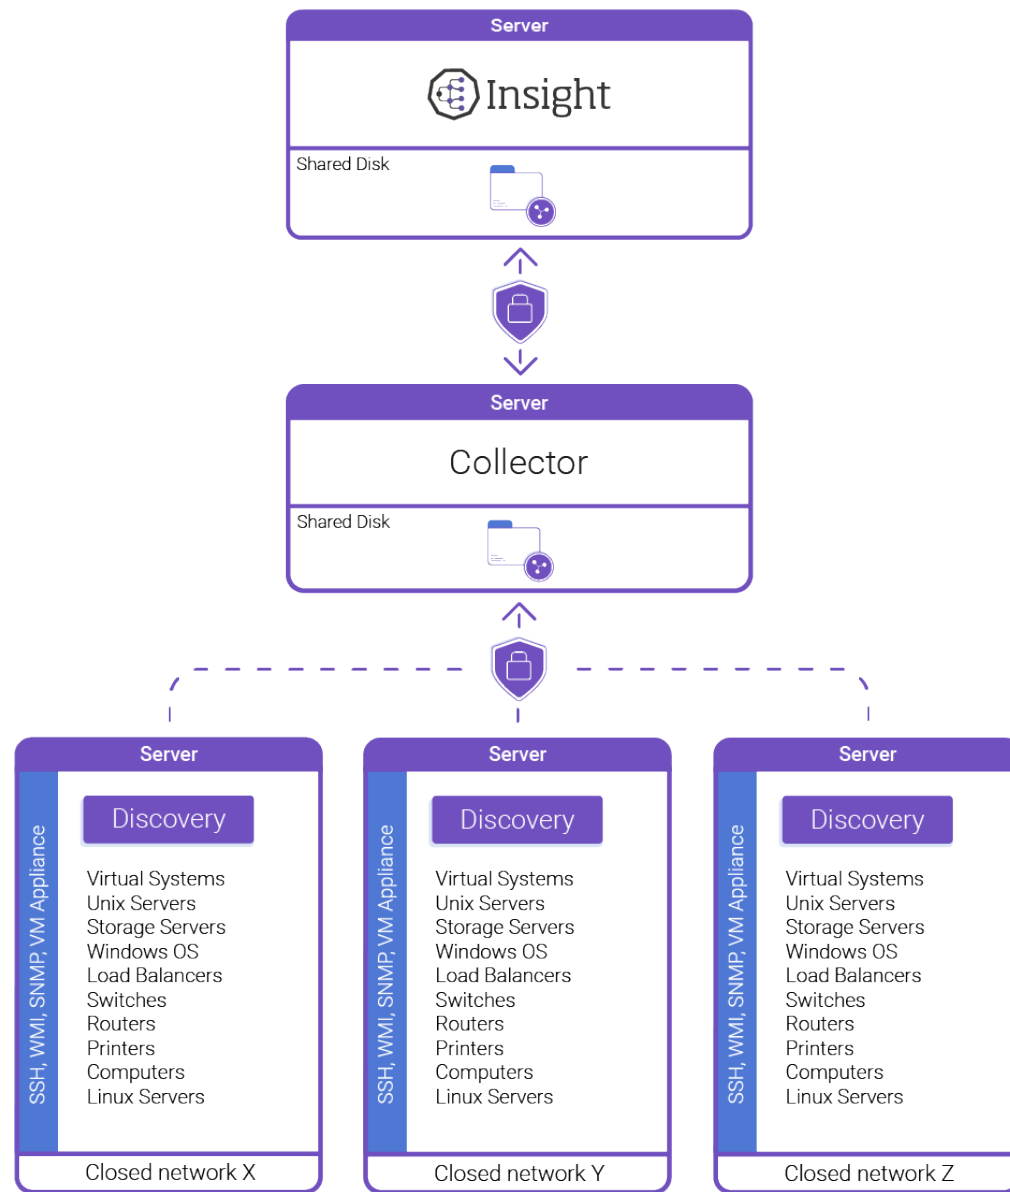

Solution for separated networks

Windows Agent

Solution for Office-PC or Windows-Server that cannot open dynamic port ranges for WMI

Encrypt data for the transport

Transport the results AES256 encrypted
