Tima – Lamp
Design by Luca Nichetto

In the roundness of their sinuous bodies and surprising transparencies, jellyfish illuminate the darkness of the seas as dreamlike creatures. Tima pendant lamp recalls that natural spectacle in the apparent lightness of the precious Murano glass. The structure composed by three separate stacked elements revolves around its core, made by an LED light source hiding inside a tubular diffuser. Propagating from the centre, the light interacts with the various textures on the glass.
