

WORD LADDERS

WHAT ARE WORD LADDERS?

Word ladders are designed around one key skill... phoneme manipulation! Phoneme manipulation increases students' phonemic awareness and can be achieved by:

- Adding phonemes (start with 'for' and add a 't').
- Deleting phonemes (start with 'pink' and remove the 'k').
- Substituting phonemes (change 'hat' into 'hot').

These word ladders include cards focusing on substituting phonemes and they feature a mix of initial, final and combo sounds.

They can be used with mini-whiteboards, magnetic letters or even other sensory items like letter beads or sand trays.
