

Exploring Creation with Physics, 2nd Edition – Errata File

This file contains the corrections for the 17th Printing of the **Textbook**. The printing for your Textbook and Solutions and Tests Manual might not be the same. Corrections for the Solutions and Tests Manual are in a separate file. (Updated March 2026)

Clarification:

Page 270 – Steps 8 and 9 were revised for clarity as follows:

Step 8. Measure the distance **along the floor** from the edge of the table to **where** the ball hit the floor.

Step 9. Repeat steps 6-8 four more times, so that you have five total measurements of the distance **along the floor** between the edge of the table and the spot where the ball hit the floor.

Corrections:

Page 293 – in the first paragraph Equation (9.1) is referenced. Change 9.1 to **8.1**.

Page 314 – In the final equation, the first term should be **r_{after}** instead of v_{after} .

Page 322 – In the last paragraph under Example 10.1, the fourth line from the bottom should read: "...force equal to but opposite the weight of the **object**." (change spring to object).

Page 542 – The definition of Direct current, should say "Current that always flows..." (add s to flow).

Page 546 – Near the end of question #15, change 'are' to **'is.'**
