FUELING YOUR PASSION

DW100iL

125LPH In-Line Fuel Pump

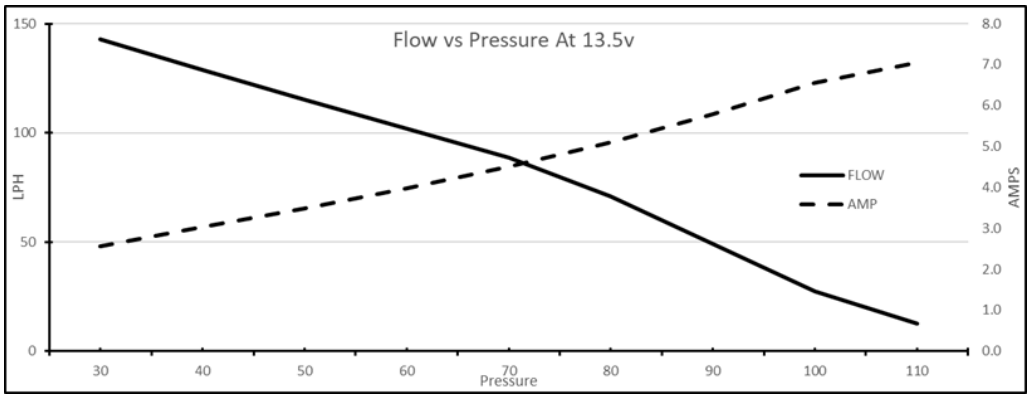

125LPH IN-LINE FUEL PUMP

The DW100iL In-Line Fuel Pump delivers dependable fuel flow for OEM replacement, EFI conversions, and mild performance builds without the electrical demand or excess capacity of a larger performance pump. Its positive-displacement roller-vane design, compact external mounting, and low current draw make it an easy solution for early EFI vehicles, engine swaps, and applications without an in-tank fuel pump.

- 125 LPH @ 43.5 PSI
- Supports up to 300 HP gasoline / 250 HP E85
- Low 3.3A current draw @ 43.5 PSI
- Positive-displacement roller-vane design
- 4 fitting options: 5/16", 3/8", -6AN & -8AN

$109
