User Manual Instruction

ES83AC

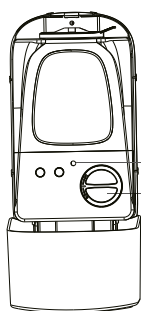

Auto Foam Dispenser

INSTALLATION AND REPLACEMENT OF BATTERY

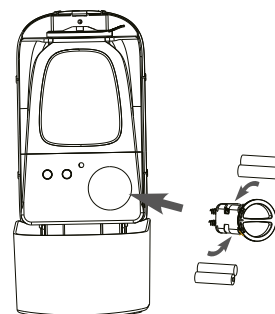

1.Keep the body upright, open the shell with the key.

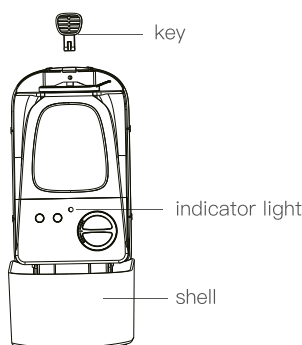

indicator light
battery
screw cap

2.Rotate the screw cap and remove the battery box.

3.Replace all AA alkaline batteries (4pieces) the battery, put back the battery box, pay attention to the orientation of the battery box spring.

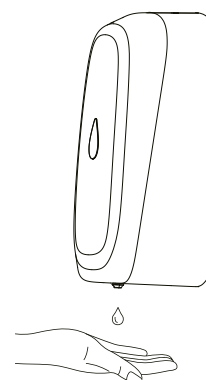

METHOD OF USE

1.Open the shell with the key, install the batteries.

2.Open the tank lid, pour in the liquid ,if there is any overflow, please wipe it clean.

3.Press the power button once, the indicator light will flash white once, the machine will be turned on, the indicator light goes out after the shell is closed. Place the hand under the sensor repeatedly until the liquid flows out normally.

ATTENTION

1. After the machine is powered on, it is in shutdown mode by default. Open the power button, the machine starts up and the indicator light is always on; Press the power button again, the machine powers off and the indicator light does not light up; closing the shell and the indicator light does not light up and the machine is in standby mode.
2. The indicator light is a white monochrome light. In standby mode, When the shell is opened, the indicator light is always on; if the shell is closed, the indicator light is off.
3. The machine had better be equipped with battery before use. In standby mode, the machine will automatically run once every half a month to prevent the liquid guide pipe from pressing and bonding.
4. The machine has power-off memory function. If power-off and power-on again, the gear of the machine defaults to the gear before power-off.
5. Low battery reminder: when the voltage is lower than 4.8V, the indicator flashes white three times every 30 seconds, and the batteries need to be replaced.
