Orma – Table
Design by Grégoire Maisondieu

An imprint, a trace, revealed by an infinite weave of perforations running through the tables.

A function and a visual symbol:

The function of the grid, which links the various table components (top / base / leg). The visual symbol of the latticework links the different models in the collection.

A grid as a playground:

A game, with the frame becoming the support for an almost infinite number of accessories, satellites that provide complementary functions and services. Candleholders, soliflores, trays, champagne buckets, etc. are grafted onto the tables, enriching the proposal. A play with materials, made possible by contemporary techniques, which allows us to propose a new use for marble.
