Product Engineer · India

EXPERIENCE

Aitaxx

Sep 2025 – Present

Cofounder

Remote

- Building tax intelligence platform that processes IRS documents and financial data using retrieval augmented generation to interpret complex tax code accurately
- Designed multi-agent system that discovers deductions and verifies compliance requirements across federal and state filing systems
- Shipped production API delivering real-time tax optimization recommendations with full citation tracking to primary legal sources

Meyvan Australia

Dec 2024 – May 2025

AI + Frontend Engineer

Remote

- Built AI-first product with retrieval workflows integrated directly into core features, enabling fast user feedback cycles
- Delivered scalable frontend architecture connected to AI services with clean state management, error boundaries, and latency-aware UX

Hamad Bin Khalifa University

Dec 2023 – Dec 2024

Product + AI Research

Doha, Qatar

- Led design and development of MARSAD, a social data intelligence platform deployed by HBKU and partner institutions for large-scale analysis
- Investigated link and citation hallucinations in large language models, building focused evaluation harness to measure factual accuracy
- Researched cross-model safety bypasses by chaining outputs from less-aligned systems to systematically probe guardrails

Various Startups

Jun 2021 – Nov 2024

Full Stack Engineer

Remote

- Delivered production systems for early-stage startups and established companies across fintech, healthcare, and developer tools
- Built end-to-end features from specification through deployment using React, Next.js, Node.js, Python, and PostgreSQL
- Established CI/CD pipelines, monitoring infrastructure, and cloud deployments with clear handoff protocols

PROJECTS

Murmar

murmar.vercel.app

- Multilingual journaling app with voice-first interface that learns individual writing patterns and surfaces evolving personal insights

Bookies

bookies.lovable.app

- Voice-driven reading companion with hybrid search enabling conversational page navigation, summarization, and email highlights

Amaze

amazehq.vercel.app

- Agentic cloud security tool for AWS that generates actionable remediation workflows with clear execution steps

EDUCATION

AMS Engineering College

July 2022 – May 2026

B.Tech AI & Data Science
