For free, expert car care advice

PROFESSIONAL

SURFACE PREP

M122

- ▶ Spray & wipe to prepare surface for paint correction, touch-up paint, or coatings
- ▶ Removes dust, polishing oils & compound residue for maximum bonding
- ▶ Reveals true paint condition for defect inspection

**FOR PROFESSIONAL USE ONLY.
NOT INTENDED FOR RETAIL SALE.**

BODY SHOP SAFE

DILUTION: Ready to use. **DIRECTIONS:** ALWAYS APPLY IN THE SHADE ON A COOL SURFACE. (Not for heavily soiled finishes).

PAINT CORRECTION: Prior to paint correction, mist M122 Surface Prep onto one panel at a time, allow to dwell for up to 2 minutes, then wipe panel clean with microfiber towel. This will reduce pad clogging from existing contamination or wax. While performing paint correction, simply mist & wipe to remove compound or polish residue without marring. Inspect paint with proper inspection light, such as the Meguiar's® MT103 Sunlight 3+ before proceeding.

COATINGS or TOUCH-UP: Before applying any coating or touch-up paint, spray M122 Surface Prep onto cool surface & use a clean microfiber towel to wipe away remaining residue, turning to dry side of towel for final wipe. Be sure to wipe adjacent areas to ensure no undesired transfer occurs. Repeat mist & wipe process a second time to ensure removal of contaminants.
