

Tapware

GENERAL CLEANING NOTES

- Surfaces should be regularly cleaned with mild soapy water and a clean microfibre cloth.
- Do not use undue pressure and wipe in one direction only.
- Where your tapware remains dry, a soft non-abrasive cloth can be used to remove surface dust.
- In highly polluted or coastal locations, we recommend cleaning 2-3 times per week.

CLEANING SOLUTIONS

Use mild liquid detergent or soap and water only. Do not use harsh detergents, bleach, cream cleaners or citrus based cleaners. These substances are abrasive and will damage the surface.

CHEMICAL DAMAGE

Spills of some products such as hair lacquer, after-shave lotion, nail polish and remover, mineral turpentine, white spirit, kerosene, aerosol propellants and insecticides should be removed immediately by cleaning the product with a soft cloth.

WARRANTY

Use of unsuitable cleaning cloths or agents may scratch or otherwise damage the surface. Any damage caused in this way will not be covered by the warranty.
