

INTERCONNECTED ROLLING RECESS ALUMINIUM MATTING

Recessed interconnected rolling Aluminium Matting adds to your 'Business' overall appearance, cleanliness, customer satisfaction and safety. Our Recessed interconnected rolling Aluminium Matting is ideally suited for high traffic areas and also keeps floors clean & dry by providing exceptional wiping/scraping action.

Durable open construction aluminium frame matting for interior recessed well applications.

Aluminium profiles assembled with stainless steel rope to allow matting to be rolled back for cleaning. These aluminium profiles are Antirust and can be concealed inside the flooring, which gives an excellent look to the entrance area.

Cushion Backing (rubber) to enhance durability.

Space between profiles allows soil to fall through (suitable for high heel traffic)
