Your soul knows the way.

The big question: *Why do we come here?*

*THERE IS A
METHOD TO THE
MADNESS. .*

Before we incarnate, our souls create a plan for the lessons and experiences it wants to have during each lifetime. *This is our soul blueprint.* Our soul blueprint is encoded with all of the information that we need to fulfill our mission and purpose.

When you are on the path of your blueprint, you will KNOW that you are on the right track. Not that life will be perfect, but there will be an innate knowing that you are exactly where you need to be. Connecting to your soul blueprint is crucial – it signifies that you are ready to step into your purpose, soul gifts, and MISSION.

We all go through times of confusion and having access to your soul blueprint gives you the CLARITY to create the life that most aligns with your purpose.

You have the power and free will to create the life that you want. But first, you have to lean into who you really are on a soul level.

The good news is we didn't come into these lives blind sighted. We left clues for ourselves to discover—kind of like a video game.

The analogy I am shown is that of our higher selves playing the video game of Life on Earth. And our higher selves left clues or information that can be accessed through our Akashic Record, our birth chart, and soul code number.

If you have been struggling to find your purpose in a world full of noise, don't worry, you *can* manifest that life that you've been dreaming about. But first, you have to lean into who are on a soul level and discover your blueprint.

Ready to dive in?

01 The Akashic Records

The Book of Life

The Akashic Records are a vibrational record of your souls' journey. You can think of the records as a library with each book representing an energetic record of every thought, feeling, and action from every lifetime you have ever lived.

Known in the Bible as "The Book of Life," the Akashic Records can be equated to the universe's super-computer system.

The Akashic Records are a repository of every thought, word, and deed of every living being, good, bad, and everything in between, in all times, past, present, future. Whew! That was a mouth full. But essentially, you can think of it as an etheric ticker tape that records your soul's journey and life lessons. As such, your records have a tremendous influence on your everyday life, your relationships, feelings, belief systems, and potential realities you draw towards you.

If you are familiar with Near-Death Experiences' accounts, when people have NDE's they all report a similar sequence of events, a white tunnel, meeting loved ones and guides, and then a visceral life review that feels like a 3D movie. What they are experiencing in this life review is their Akashic Record.

*The meaning of
life is to find
your gifts.*

*The purpose of
life is to use
them in service
to others.*

Think of your records as a tool to help your soul fulfill your purpose and live your most aligned life.

One thing to always remember is that our records are continually changing and being reorganized.

We live in a free-will universe, and it is always possible to change the trajectory of your life. The quantum field holds multiple timelines, as our choices and actions determine which path we follow.

We are the architect of our soul's journey. And like any great architect, we have a blueprint that we can reference to help us create our most aligned life.

The Akashic Records and the birth chart align together to show us the path that our soul chose for this lifetime. And the soul code number gives additional insight into our gifts, talents, and inner drives.

It's all there waiting for us to discover. We just have to know where to look.

Now let's look at the birth chart, which is the soul's road map to uncovering aspects of your personality, the gifts you came in with, and the lessons you chose for this lifetime.

02 The Birthchart

Your roadmap

Most of us know our sun sign, but there is so much more that we can learn from the birth chart. To start, let's look at the big three, which is your sun, your moon, and your rising. You will be surprised at how much information you can glean from understanding how these three chart aspects flavor your personality.

*Astrology is a science
in itself and contains
an illuminated body
of knowledge.*

–Albert Einstein

No two charts are the same—even twins will have completely different chart aspects. The reason being is the exact time that you are born is a gateway in time that pinpoints the flavor or energy of your entire chart.

The way it's been shown to me is at the exact time that you incarnate, a portal opens up, and your unique personality is imprinted on your chart based on where all the planets were the minute you were born.

"The birthchart has to be understood as the archetype or seed pattern of one's destiny."

-Dane Rudhyar

The Three Most Important Parts of Your Chart

1. **Your sun sign** symbolizes your overall "self," ego, and how you express your soul.
2. **Your moon sign** highlights your emotions, your hidden self, and who you were as a child.
3. **Your rising sign** reflects how you relate to other people and the personality you project.

Every planet landed in a sign when you were born, and each one represents something unique within you.

Your Sun Sign reveals what motivates and drives you.

Your sun sign highlights what is likely to motivate you and why. Knowing your sun sign can give you great insight into the themes or lessons that your blueprint holds.

As you express the positive qualities of your sun sign, you step into your purpose and follow your passions with ease and confidence.

Your Moon Sign describes your instinctive and emotional make-up.

Your moon sign reflects your immediate reactions to circumstance and sheds light on your early home life. Your moon reveals how you are likely to react emotionally and what you need to feel comfortable.

A good rule of thumb is that your sun sign describes qualities you are learning to develop, and your moon sign reflects what you already are.

Your rising sign reveals the ways in which you present yourself to the world and how others see you.

Your rising sign/ascendant describes how you project yourself out into the environment, and the kinds of experiences that you draw in to create a meaningful life.

You can think of your rising sign as the mask that you wear as you encounter something new.

So again, the sun sign represents how you express your *soul purpose*, the moon determines your *emotional instincts*, and the rising sign points to *how others see you*.

Soul expression + emotional instincts + physical appearance = sun | moon | rising

My hidden self likes to (moon sign)

I relate to people through (rising sign)

03 Your Soul Code Number

The Soul Code number is calculated from your birth date. It's like the sun sign in astrology.

Numerologists call it the life path number, but I like to think of it as *the soul code number*, because it can shed more light on your gifts, talents, inner drives, and abilities, as well as your challenges and how you process emotions.

It can also help you discover why you have experienced some of your life's circumstances. The Soul Code number is a tool to help you understand your innate tendencies and talents, and the obstacles you'll face as you continue to master the lessons to be learned.

Find your soul code number:

Step 1: Write down your month, day, and year of birth numerically.

For example, if your birthday is June 12, 1992, you write: (06) (12) (1992)

Step 2: Reduce each month, day, and year to a single digit.

For example, for 06/12/1992: Reduce the month $0+6=6$ Reduce the Day: $1+2=3$ Reduce the Year: $1+9+9+2=21$ (*Keep adding until you get a single digit: $2+1=3$*)

Step 3: Add each of the single digit numbers for the month, day and year together and reduce that until you get a single digit.

For instance, using the example above: Month=6, Day=3, Year= 3 ($6+3+3=12$)

If you were born on June 12, 1992, your life path is 3

If your final number for either the month, day, year, or life path is **11, 22, or 33** those are Master Numbers, and we don't reduce them.

Martha Marlton

SPIRITUAL MENTOR

Martha is a spiritual mentor, *modern mystic* and founder of Dora's Apothecary. Her mission is to help others wake up to the truth of their soul's purpose.

Martha stems from a lineage of Curanderas on her paternal side, and psychic intuitives on her maternal side, with values rooted from the same source: earth and light. Her practice fuses the ancient with the modern and incorporates the teachings of astrology, metaphysics, shamanism, and the Akashic Records. Her holistic approach is client-centered, honoring that no two journeys are the same.

Martha's spiritual philosophy is to keep an open mind and cultivate healthy discernment so you can choose your own unique spiritual path.

We all have different missions, but we share the same purpose: To come back to truth and unity.

We are spiritual beings having a human experience, and it can be one spectacular ride. The caveat is that each of us is responsible for our own journey. One that is circular, not linear. The journey can be filled with love and joy, or fear and pain. The choice is ours. **Be kind. Know your truth. Aim for the light.**
