KISS CUTLINE ————

- Place your artwork into the ARTWORK layer and resize accordingly.

- Create your cutline as a 1pt outline stroke.

- Please allow 3mm bleed past your cutline to ensure the design cuts correctly.

- Make a 2mm safe zone inside the cutline to stop important elements cutting off.

- Turn all of your text into outlines in the menu. TYPE > CREATE OUTLINES

- Save your file as an .ai / .pdf / .eps file
