

Exploring Creation with General Science, 3rd Edition – Errata File

This file contains the clarifications and corrections for the 9th Printing: January 2025 and the 10th Printing: January 2026 of the Textbook.

You can find which printing you have by going to the publications page in the front of your book. The printing for the Textbook, Solutions and Tests Manual, and Student Notebook may not be the same. Corrections for the Solutions and Tests Manual and Student Notebook are in separate files. (Updated March 2026)

Clarifications:

In our effort to provide families with accurate science that glorifies God, this course went through thorough and detailed editing. Yet, although scientific accuracy is a major goal, as with any large instructional work there will be places where information can be clarified.

Carbon-14 dating, pages 104-105 and 180-181 – no edits made.

Carbon-14 could *technically* allow scientists to identify dates that could be tens of thousands of years old. However, to *accurately* date an item, it has to be calibrated with dendrochronology (discussed on pages 102-104). That just means that the carbon-14 dates are supported by dates confirmed using dendrochronology.

Corrections:

There are no known corrections to be made in these printings.
