

local2u Installation Permission Form – For Renters and HOA Residents

Thank you for choosing local2u for your internet services. If you do not own the property where the service is being installed, we kindly ask that you obtain your landlord's or HOA's approval prior to installation.

Our installation process may require minor modifications to the property, such as drilling holes to run cable and securely mount equipment on the exterior of the structure. These types of modifications may be restricted by your lease, rental agreement, or HOA rules, and in some cases may require written approval beforehand.

Please review your lease or HOA agreement carefully to determine whether you're permitted to make these modifications. If written approval is required, we ask that your landlord, HOA, or their authorized representative complete Section 1 below. If approval has been given verbally, or if it is not required based on your agreement, please complete Section 2 below.

By providing this signed form, you grant local2u permission to proceed with the installation. You also acknowledge that local2u and its technicians are not responsible for the removal of equipment post-installation and are released from any liability for damages or claims made by your landlord, HOA, or property manager due to the installation.

In cases where your landlord or HOA places conditions on the installation that result in added time, labor, or materials beyond our standard installation, you may be subject to additional charges, to be agreed upon between you and your installer prior to proceeding. Please note that in some cases, technical limitations such as poor line-of-sight or grounding issues may prevent us from completing the installation. If that occurs, we will refund any payment you've made.

PLEASE COMPLETE SECTION 1 OR 2 BELOW (Please print)

SECTION 1 – Written Approval

I, _____ (landlord or authorized representative of property/HOA), hereby authorize

_____ (tenant/local2u customer) to install local2u service at:
