Rhymes & Songs
For Babies and Toddlers
Financial support for the printing of this booklet is provided by a generous grant from the Literacy for Life Fund held at The Winnipeg Foundation (www.wpgfdn.org).
Sharing rhymes with your child is a wonderful way to share the joy of learning new words and sounds! Teaching your baby or toddler the movements to act out a rhyme will show your child that learning and fun can happen at the same time.

You are your child’s first and most important teacher. When you spend time together repeating rhymes, you are helping to develop important language skills: talking, listening, asking questions, giving answers, guessing the next word and predicting the next action are skills necessary for growing children to be successful learners.
Even if your baby is too young to speak words, they will learn to communicate by watching and listening to you. Over time, hearing the same rhymes repeated often, babies will respond with sounds, facial expressions, and body movements. Your child will delight in being the focus of your attention and affection!

Discover new rhymes and stories by participating in the library’s Baby Rhyme Time and Toddler Time programs. For information about locations, schedules, and registration, please visit the library website at winnipeg.ca/library or pick up a copy of the library newsletter, AT THE LIBRARY, available at all branches.

Please note: All actions (rocking, bouncing, tickling, etc.) should be performed in a gentle manner that is appropriate for the individual child’s personality and stage of development.
Tips for Rhyming and Reading with Your Child

• Carry this rhyme booklet with you on errands and to appointments. Rhymes can be done anywhere from the grocery store line up to the doctor’s office.

• Repeat the rhymes your baby likes best! Repetition leads to learning and one day your child will be saying the rhymes back to you.

• The actions in the rhymes (clapping, bouncing, dancing, etc.) help children develop motor skills that are important for healthy physical activity.

• Songs and rhymes introduce young children to many new words, building their vocabulary, and their knowledge of the world.
• Read books with your child every day. Praise them when they babble and “read” too.

• Point to words in books as you read them. This will help your child make a connection between the words they hear you say and the words on the page.

• When you read together, encourage your child to turn the pages. Take turns pointing and identifying objects in the pictures.

• Don’t worry about finishing a book at one sitting. Let your child’s attention span tell you when it’s time to move on to another activity.

• The more you enjoy the reading experience, the more your child will enjoy it.
• Read throughout the day: recipes, food labels, schedules, maps, instructions, traffic signs, store signs. Your baby or toddler may not understand the meaning of your words; but they will absorb how you are using language to communicate. They will also begin to learn that being able to read is a useful life skill.

• Children learn best by having fun with the people who love them the most.

• Ask library staff for book suggestions! Staff can recommend many titles that are appealing to young children including popular books used in library story times.

Talk, Sing, Read, Write, Play!

Surround your baby or toddler with these five activities every day to create a language-rich environment in your home.
TALK!
Talking with babies and toddlers is a brain-building activity! Before young children have words, they communicate in their own language using babbles, coos, laughter, smiles, looks, and gestures. Talk to your child and reply to their language. Be sure to use many different words and model how to ask and answer questions.

SING!
Babies and toddlers love music! Music enriches brain development and can be used to teach new words and concepts. In addition to sharing traditional songs, make up silly versions to go along with daily routines such as diaper changes, meal time, and bath time. When your child has words, stop during a song and let them fill in the blank. Include songs and rhymes in your home language.
READ!
Reading to babies and toddlers helps build their early literacy skills and helps them get ready for school. For young children, the most important part of reading together is interacting about the book: pointing at and talking about pictures, asking questions, making comments to connect the story to the child’s life.

WRITE!
Babies and toddlers may not be writing yet but they can begin to learn about this important skill. As you read with your child, pointing to letters and words, you are helping them learn to recognize the shape and sounds of letters. This will help prepare them to learn to print letters, words, and sentences. Rhymes and songs that include finger actions and hand gestures help to build fine motor skills required to hold a crayon or pencil.
PLAY!
Play is fun and it is also how children learn. When they play, children connect imaginative ideas with real objects; for example, pretending a cushion on the floor is a boat on the ocean. This helps them understand that a letter can represent a sound and a printed word can represent an object or idea. Playing with young children takes a lot of energy so remember to include some time for quiet activities and resting.
