Subject: Increasing Number of Crimes Committed by Teenagers

Respected sir,

Through the columns of your esteemed newspapers I want to highlight the serious issue of increasing number of crimes committed by teenagers in the streets and other public places.

Unlawful acts committed by the young criminals are on a surge these days. More and more number of teenagers nowadays are involved in various offences such as mobile snatching, robberies and even murders. This causes a serious concern for the society as well as the parents.

The main reason as to why there has been a sudden increase in the teenage crime rate is that today's young population is getting exposed to crime and violence on television, news media which encourages them to follow the path of crime. For instance, newspapers are flooded with negative news such as murders, robberies, and teens playing violent video games, etc. Secondly, an alarming rise in the unemployment and poverty rate prevailing in the country also becomes one of the major reason for increased crime count among teens these days.

I request you to publish a column on this serious issue to create awareness in the public and draw the attention of the concerned authorities to take remedial measures.

Thanking you in anticipation.

Yours sincerely,

XYZ.

### **Importance of English**

Nobody can deny the importance of English language in the present time as global language. It is clear that the English language has become more dominant around the world. In some countries it is used as the mother tongue and in other countries it is taught as second language in their schools. This makes English widespread. In addition, it is used for communication between people around the world, as well as, it is the language of modern times. On other hand, English is the language of science and technology. There is no doubt that, the English is language of communication between the people with different culture. It is also the languages of computers that help to communicate with the people around the world through Internet technology and e-mail.

Races, nationalities and countries speak English in both the hemispheres especially in those non-European countries where the British sun never set once upon a time. English is a very prominent channel of communication in the fields of medicine, technology, architecture and business.

Today, in Pakistan, English is the link language of different semi-educated and educated groups. It is the language of opportunities. Most jobs require knowledge of English. In most of the interviews, a candidate is questioned in English as he might be required to work anywhere in our multilingual country or could even be posted in a foreign country.

Hence the place of English language as a communicating language is well established, whose speakers are found all over the world.

**OR**  
**Role of Media**

The mass media mean the sources of information and entertainment which are available to the public or masses of a country. These media play an important role in building public opinion in a democratic country. There is a famous saying:

“Whoever controls the media, controls the mind” (Jim Morrison)

Media are a great source of information and entertainment for all types of people. Nobody can deny their influence. Everybody looks to them to get information about their country, nation, religion and culture. They build our knowledge and strengthen our opinion about different things.

The mass media control our mind. We believe whatever they propagate. We come to know about the life of our villages, cities and towns through mass media. We come across the rise and fall in business, agriculture and industry through mass media.

The electronic media have governed and dominated the mind of the public in a very forceful manner. The mass media are a great source of building public opinion. They build our knowledge and educate our sentiments. We form our own opinion about politics, religion, and business under the influence of mass media.

The mass media educate a domestic woman about cooking, medicine and elementary nursing of children. The children have an informative and entertaining program of their mental standard. They can build their knowledge about different branches of knowledge at a very early stage.

In my opinion the role of media in the society is very positive provided it is used positively.

**OR**  
**Benefits of Digital Technology**

Digital technology has modified nearly every aspect of modern life. It's now rare to find an electronic device or piece of machinery that doesn't consolidate digital technology in some way.

Digital technology means that devices can be more compact, faster, lighter, and more versatile. Huge amounts of knowledge can be stored locally or remotely and moved around virtually immediately. Even the term “information” has expanded to include media such as photos, audio, and video, and no longer refers to just words and numbers.

Digital technology makes it easy to stay in touch with friends, family, and work remotely, even if you are in another part of the world. You can express through words, video, audio, and exchange other media. Websites, apps, and software have all been designed to help users to socialize. With social media, messaging, texting, laptops, tablets, and mobile phones, nobody needs to feel isolated in the digital world.

Internet speeds have developed exponentially since the early days of dial-up. Anybody with access to the internet instantly has access to a huge proportion of the world's knowledge over the web. Lessons and courses can now be delivered virtually online.

Digital technology enables the storage of massive amounts of information in relatively small spaces. Large amounts of media, such as photos, music, videos, contact knowledge, and other reports can be carried around on small devices like mobile phones.

Hence we have seen that there are a lot of benefits of digital technology in every field of life.
