

The PostGradDC Cervical Artery Dissection Certification Program

Program Overview

This educational program offers advanced certification for doctors who want to elevate their clinical competence in pursuing chiropractic excellence.

Qualifications

The American College of Chiropractic Orthopedists, the International Academy of Neuromusculoskeletal Medicine, NCMIC, and PACE uniquely approve and recognize PostGradDC coursework.

Our primary instructor is Dr. James Demetrious. He is a nationally distinguished board-certified chiropractic orthopedist and an internationally recognized expert in cervical artery dissection. Dr. Demetrious was the first doctor to correlate fluoroquinolone antibiotics with a pre-existing iatrogenic risk factor for cervical artery dissections.

The Cervical Artery Dissection Certificate

We are offering a new 10-CE Hour PostGradDC Certification Program entitled **Cervical Artery Dissection**. We seek to provide advanced insight into the differential assessment of CAD and improve its recognition for expeditious medical referral when clinically indicated.

Requisite Coursework

To achieve this advanced certification, chiropractic doctors must complete at least 10 CE Hours of CAD-eligible PostGradDC online recorded and/or live coursework.

Getting Certified

Upon completing 10 CE hours of eligible CAD coursework, respective doctors will submit their completed coursework to PostGradDC for verification and certification.

Maintenance of Certification

This certification is valid and recognized for two years. After the initial two years, you may complete two CAD-eligible CE hours annually and pay a \$50 annual fee to maintain your certification.

The PostGradDC Cervical Artery Dissection Certification Application

To qualify and receive your Cervical Artery Dissection (CAD) certification, you must complete a minimum of 10 CE hours of eligible PostGradDC coursework.

I have completed the following eligible coursework to achieve the requisite 10 CE hours toward CAD Certification:

- **Online Recorded CE:**

- _____ Clinical Risk Management: CAD (1 CE Hour)
- _____ CAD: Diagnosis (2 CE Hours)
- _____ CAD: Risk Factors (1 CE Hour)
- _____ CAD due to Fluoroquinolones (2 CE Hours)
- _____ Differential Diagnosis (1 CE Hour)
- _____ Clinical Risk Management: Informed Consent (1 Hour)
- _____ Vertebral Artery Dissection – Grand Rounds (2 Hours)
- _____ Neurologic Deficits Due to Vertebral Artery Dissection (1 CE Hour)
- _____ Spontaneous VAD-Grand Rounds Recording (1 CE Hour)

- **Live Interactive Zoom and Grand Rounds Webinars:**

- _____ The \$75 Million CAD Case (1 CE Hour)
- _____ Vertebral Artery Dissection Due to Self-Manipulation (1 Hour)
- _____ Spontaneous Vertebral Artery Dissection (1 CE Hour)
- _____ Neurologic Deficits Due to VA Dissection (1 CE Hour)
- _____ Vertebral Artery Dissection (1 CE Hour)
- _____ CAD Standard of Care? (1 CE Hour)
- _____ Medically Caused CAD: Fluoroquinolones (1 Hour)

I attest and certify that I have completed the above coursework.
