NoStik[®]

Reusable alternative for disposables
Fat free cooking
Keep your kitchen clean

NEW!

About ICB

ICB is the innovative producer of NoStik®, a brand that offers a guarantee of quality and innovation. NoStik® represents a wide range of non-stick products, such as reusable baking and protective sheets, shelves, trays & bags. To the consumer, NoStik® represents quality and innovation and it is the reference in the consumer market when it comes to reusable alternatives for DISPOSABLES.

Since 1990 our products are manufactured proudly in Belgium. Our unique fully automatic production facility allows us to control quality in all stages of the production process. On top, we can guarantee our clients short lead times thanks to our stock holding capacity in our 4000m² large warehouse.

NoStik® Goals

Fat Free Cooking

Thanks to their non-stick properties our products don't require added butter, oil or cooking fat during the cooking process. Therefore our products are a handy help for consumers who want to start up or continue a diet or who just want to maintain a healthy lifestyle.

Reusability

Several products manufactured by NoStik® are a reusable alternative for disposable products such as parchment paper, wax paper, aluminum foil and trays. Therefore our products are a handy help for consumers who want to save money and help to reduce waste.

Keep it Clean

Several products manufactured by NoStik® are made to keep your cooking appliances clean. Avoiding mess in your kitchen reducing time needed to clean after cooking.

NoStik® Materials

All products manufactured by NoStik® are made out of fiberglass fabric coated with PTFE or SILICONE.

Fiberglass fabric is made by interweaving threads crosswise (Weft) and threads lengthwise (warps). Interweaving can be done in different ways resulting in several types of fabrics. The most visible difference in fabrics is the one between closed and open mesh fabrics. In closed fabrics a further deviation can be made between 0.07mm, 0.12mm and 0.22mm fabrics. In open mesh fabrics a deviation between 1x1mm, 2x2mm, 4x4mm and 6x6mm can be made.

PTFE (Polytetrafluoroethylene) is produced by the polymerization of tetrafluor-oethylene. PTFE used to produce NoStik® products is traditionally a milky white dispersion. Key features of PTFE are its non-stick properties, chemically inertness and high heat resistance up to 260°C (500°F).

SILICONE is a natural element that makes up for 25% of the earth's crust.

NoStik® legal compliance

Our products are subject to several migration tests per year, performed by accredited third party laboratories. Therefore we can state our products are compliant with regulations such as EU legislation 1935/2004, 10/2011, LFGB, FDA and all their relevant updates. Subsequently all our products can come in contact with food and are for example free from substances such as PFOA, BPA, peroxide and phthalate free guaranteed.

NoStik® Europe and overseas

Our products can be found in more than 40 countries around the globe. Out of our manufacturing and warehouse facilities in Belgium we can deliver to each continent. All products in this catalog are available in our manufacturing facilities in Belgium.

NoStik® USA

We had a dream, bringing NoStik® to the USA consumers. In order to match the needs of US retailers interested in our products, we concluded we had to set up a US company which would be considered as a domestic vendor with registered offices, bank accounts, insurances, EDI capabilities, and stock on land in order to guarantee shipment with short lead times.

In 2016 we completed our mission by means of starting our company with registered offices in Manassas, Virginia. On top we started a cooperation with a well-established 3PL with warehousing facilities enabling us to meet vendor compliances requested by the biggest retailers in the USA.

Whether you need less-than-truckload (LTL) and truckload (TL), drop shipping, small package, collect or prepaid delivery, UCC-128 labelling,... ICB can organize and streamline your transportation needs to give you the cost-effective delivery of goods to meet your business needs.

Made in Belgium, ships domestically!

Reusable Parchment Paper Liner

- Silicone coated
- Reusable on both sides (Replaces meters of baking paper)
