- Cursor

Results-driven Web Developer with 4+ years of experience in frontend and mobile application development, specializing in React, React Native, Angular, Next.js, and TypeScript. Proven track record of building scalable web and mobile solutions, integrating payment systems and third-party APIs, optimizing application performance, and delivering user-focused interfaces across multiple client projects. Brings strong expertise in responsive UI development, API integration, and Agile collaboration, helping organizations create high-quality digital products that enhance user experience, streamline operations, and support business growth.

WORK EXPERIENCE

FRONTEND DEVELOPER

Pixel Motion | April 2024 – Present

- Managed and optimized 300+ WordPress websites, resolved high-volume support and development tickets, implemented responsive pages from Figma designs, built reusable ACF-based content structures, and troubleshooted production issues across multiple client environments.

JUNIOR SOFTWARE DEVELOPER

Atis Software | December 2022 – December 2023 (1 Year, 1 Month)

- Designed and deployed a full-stack platform using React and Strapi, built RESTful APIs and content models, managed VPS deployments with Docker and CapRover, integrated AWS S3 and SES services, and maintained system stability through environment management and issue resolution.

WORDPRESS DEVELOPER

CriminTech | March 2020 – November 2021 (1 Year, 9 Months)

- Developed and maintained a WordPress-based e-learning platform, customized themes and plugins, supported quizzes and course modules, and integrated third-party services for content delivery and grading workflows.
