# dofine

Dofine is a creative designstudio specialized in wall- and floorfinishes. She works in the upper segment of the interiorworld and therefore she works with very well known Dutch (interior) designers /architects and suppliers from Europe.

Dofine designs her own products and supports the architects with material- and colouradvice.

Therefore the Dofine - collection consists of unique textures, colours and prints.

Besides the floor- and walldesigns Dofine also designs complete interiors. Interior design with a radical twist and always with the love for materials in mind. Renovation, remodeling, custom design and total design for business and residential projects.

## METALLIC PLASTERS

### Perle

Perle is a glossy paint based stucco technique. Perle has a luxurious appearance due to the subtle metallic shades in it. Due to its subtle appearance, Perle is extremely suitable for use on large wall surfaces.

Appearance: Metallic  
Material: Plaster / paint  
Thickness: 1 mm  
Usage: Only inside  
Wet area: Only indirectly

### Smell of metal

Smell of metal is a glossy stucco technique. Smell of metal has a luxurious appearance due to the subtle metallic shades in it. The extra strong surface makes it ideal for higher traffic areas.

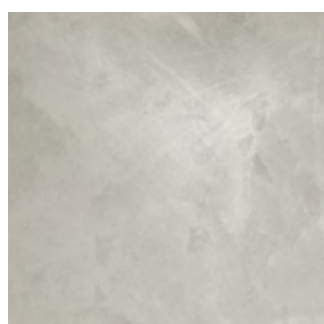

Appearance: Metallic  
Material: Plaster / paint  
Thickness: 1-1,5 mm  
Usage: Only inside  
Wet area: Only indirectly

### Perle striato

Perle striato is in a glossy stucco technique. Perle striato has a luxurious appearance due to the subtle metallic shades in it. The vertical lines in perle accentuate the height of your walls.

Appearance: Metallic  
Material: Plaster / paint  
Thickness: 1-2 mm  
Usage: Only inside  
Wet area: Only indirectly

### Metalwax

Dofine metal wax is a special product for application of metals on objects. Metal wax creates a sturdy, aged metallic effect.

Appearance: Mat  
Material: Wax  
Thickness: 1 mm  
Usage: Only inside  
Wet area: No

# TERRA BY MATTEOBRIONI

## Terravista

Terravista is a fine clay plaster that is made of clays from different Italian regions. The natural colors are a reference to these regions. Terravista can be applied as a smooth, textured or weathered finish. With the right addition of terra plus polymers Terravista becomes more damp resistance. Available in: Smooth, structured and wabi.

Appearance: Mat  
 Material: Clay  
 Thickness: 1-1,5 mm  
 Usage: Only inside  
 Wet area: No

## Multiterrra

Multiterrra is a coarse clay plaster that is made of clays from different Italian regions. The natural colors are a reference to these regions. Multiterrra can be applied as a smooth, textured or weathered finish. With the right addition of terra plus polymers Multiterrra becomes more damp resistance. Available in: Smooth, structured and wabi.

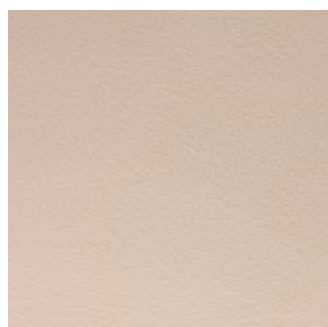

Appearance: Mat  
 Material: Clay  
 Thickness: 1-2 mm  
 Usage: Only inside  
 Wet area: No

## Terracalix

The clay-based finishing plaster TerraCalix, inspired by Moroccan tadelakt, is more resistant than other clay finishes for the presence of lime in its composition and it's ideal to create a non-homogeneous natural color effect. Available in: Smooth, structured and waxed.

Appearance: Mat  
 Material: Clay  
 Thickness: 1 mm  
 Usage: Only inside  
 Wet area: No

## Terrasilk

The natural clay-based paint TerraSilk can emulate a trowel finish at a much lower cost especially in the Structured version. Very useful in case of time constraints: for example stands, events and the like. Available in: Smooth and structured.

Appearance: Mat  
 Material: Clay  
 Thickness: 1 mm  
 Usage: Only inside  
 Wet area: No

# BIO CLAY BY *cement design®*

## Fino

Bioclay is extracted from our natural quarry and is a clay coating consisting exclusively of raw clay and natural additives. It is characterized by its great adhesion, resistance and breathability. It is ideal for indoor areas on walls, ceilings and furniture. It is available in 3 different grain sizes: fine, medium and coarse.

Appearance: Mat  
Material: Clay  
Thickness: 1 mm  
Usage: Only inside  
Wet area: No

## Medio

Bioclay is extracted from our natural quarry and is a clay coating consisting exclusively of raw clay and natural additives. It is characterized by its great adhesion, resistance and breathability. It is ideal for indoor areas on walls, ceilings and furniture. It is available in 3 different grain sizes: fine, medium and coarse.

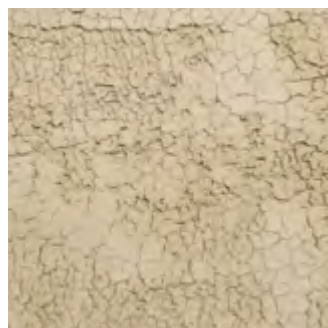

Appearance: Mat  
Material: Clay  
Thickness: 1-2 mm  
Usage: Only inside  
Wet area: No

## Gruseo

Bioclay is extracted from our natural quarry and is a clay coating consisting exclusively of raw clay and natural additives. It is characterized by its great adhesion, resistance and breathability. It is ideal for indoor areas on walls, ceilings and furniture. It is available in 3 different grain sizes: fine, medium and coarse.

Appearance: Mat  
Material: Clay  
Thickness: 2 mm  
Usage: Only inside  
Wet area: No

## Crack

Bioclay craquele is extracted from our natural quarry and is a clay coating consisting exclusively of raw clay and natural additives. It is characterized by its great adhesion, resistance and breathability. It is ideal for indoor areas on walls, ceilings and furniture. It is available in 3 different grain sizes: fine, medium and coarse.

Appearance: Mat  
Material: Clay  
Thickness: 2 mm  
Usage: Only inside  
Wet area: No

# LIME STUC BY LOHO

## Lime finish fine

Lime finish fine can be used in all areas and is particularly suitable for wet areas such as bathrooms or indoor swimming pools.

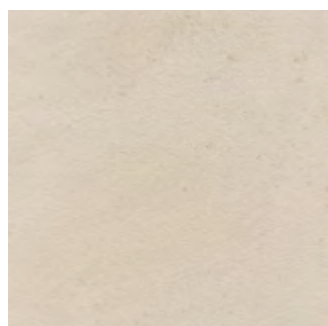

Appearance: Matt  
 Material: Lime  
 Thickness: 1-2 mm  
 Usage: Only inside  
 Wet area: Only indirectly

## Lime finish medium

A refined grainy wall plaster to apply on large indoor surfaces in a short period of time. Easy to process without sacrificing of its natural character or esthetic charm.

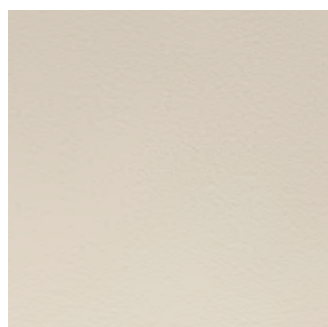

Appearance: Matt  
 Material: Lime  
 Thickness: 1-2 mm  
 Usage: Only inside  
 Wet area: Only indirectly

## Lime finish raw

The ideal raw wall/ceiling plaster to apply on large indoor surfaces in a short period of time. Lime finish raw has an authentic look and feel.

Appearance: Matt  
 Material: Lime  
 Thickness: 1-2 mm  
 Usage: In and outside  
 Wet area: Only indirectly

## Lime paint

Lime paint is developed as an addition or alternative to Lime finish. Surfaces subject to heavy wear such as rails, cabinets, objects etc will be better of with Lime paint.

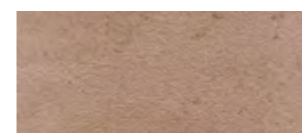

Appearance: Mat  
 Material: Lime  
 Thickness: 1 mm  
 Usage: Only inside  
 Wet area: No

Porocret

# NATURTEX BY *cement design®*

## Hebra

With a minimum thickness and without any type of joints, Hebra is a medium-grain coating with aggregates of plant origin fibers, as natural as elegant.

Appearance: Mat  
 Material: Cement  
 Thickness: 1-1,5 mm  
 Usage: In and outside  
 Wet area: Only indirectly

## Quercus

Inspired by the forests, this continuous medium-grain size coating stands out because of its unique and captivating style, provided by the incorporation of recycled particles of wood.

Appearance: Mat  
 Material: Cement  
 Thickness: 1-1,5 mm  
 Usage: In and outside  
 Wet area: Only indirectly

## Raphia

Handcrafted, natural and exotic Cement Design's Raphia is a medium-grain continuous coating with natural recycled aggregates

Appearance: Mat  
 Material: Cement  
 Thickness: 1-2 mm  
 Usage: In and outside  
 Wet area: Only indirectly

## Rattan

Seamless decorative concrete, this medium-grain coating shares properties with the original rattan as it is a light and flexible product, applicable on any surface.

Appearance: Mat  
 Material: Cement  
 Thickness: 1-2 mm  
 Usage: In and outside  
 Wet area: Only indirectly

Colours and materials as shown may vary from the original. No rights can be taken from this. For real colours, request samples. Some products may have more possible colours, ask us for all the possibilities. All information in this brochure are subject to errors and changes reserved.

Quercus

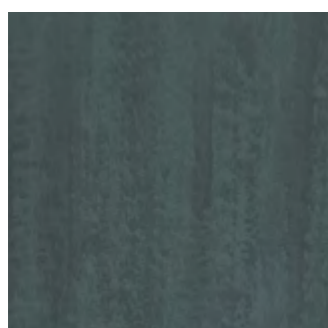

# ALLURE

## Allure

Allure is a classic glossy Italian plaster based on a lime/marble base. Allure can be applied with a light shine, but by continuing the polishing process also with an extreme almost reflecting shine.

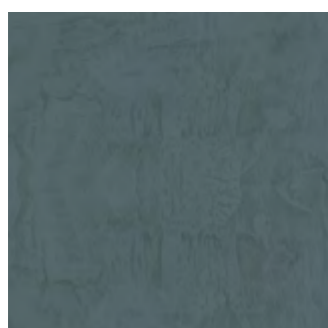

Appearance: Glossy  
 Material: Chalk/marble  
 Thickness: 1 mm  
 Usage: Only inside  
 Wet area: Only indirectly

## Allure rustic

Allure rustic is a classic glossy Italian plaster based on a lime/marble base. the application technique of Allure rustic creates a striped weathered effect.

Appearance: Glossy  
 Material: Chalk/marble  
 Thickness: 1 mm  
 Usage: Only inside  
 Wet area: Only indirectly

## Allure fresco

Allure fresco is a classic glossy Italian plaster based on a lime/marble base. The application technique creates an effect like that of old italian fresco walls.

Appearance: Glossy  
 Material: Chalk/marble  
 Thickness: 1 mm  
 Usage: Only inside  
 Wet area: Only indirectly

## Allure striped

Allure striped is a decorative technique in which raised lines are applied that are later polished. This creates a nice matte/gloss contrast.

Appearance: Mat  
 Material: Cement  
 Thickness: 1 mm  
 Usage: Only inside  
 Wet area: Only indirectly
