

On a beautiful Spring day in the park, there were three female cats - Ruby, Spot and Starbuck - walking together and gossiping about their humans. Up ahead, there were three male cats walking together bragging about their conquests. When the two groups met, there were three cupids flying through the air. Next thing you knew, there were three couples walking away in separate directions. The couples began talking and soon found that they had amazing things in common. Well, long story short, we all know what happens to cats that fall in love in the springtime, oh my what a racket! From this information and the following clues, can you determine each females' male companion, her favorite activity and how many kittens she had in her litter?

- Batman chose the female who liked to chase a ball, but she was not Starbuck.
- Dibii's companion liked to chase the laser light.
- Ruby loved to cuddle up to her male for a long afternoon nap in the sun.
- Starbuck had two more kittens than Batman's companion.
