

Exploring Creation with Biology, 3rd Edition – Errata File

This file contains the corrections for the 7th (December 2022) Printing of the **Student Notebook**. The printing for the Textbook and Solutions and Tests Manual may not be the same as the Student Notebook. Corrections for the Textbook and Solutions and Tests Manual are in separate files. (Posted 2025)

Clarifications:

Page 435 – In the Biological Key make the following changes:

1. Change the first line of #9 to: Does it have protective external plates **(exoskeleton)**? Phylum Arthropoda.
2. Change the 2nd line of #14 to: Does it have three pairs of **legs on the thorax**? Class Insecta.

Corrections:

Page 304 - #14.10 – Change poison to **venom** two time and change poisonous to **venomous** at the end of the question.

Page 428 – In the middle of Step 5 it mentions a sample pedigree for earlobes. This can be found in Book Extras for Module 7 (not in the study guide solutions).

Page 437-439 – In the last column add “**D. _____**” as the first line for the identification of the Domain. For the Example, add “**D. Eukarya.**”

Page 479 – Step C.4 both images, change the titles to Dicot **Stem** and Monocot **Stem**.

Page 484 – In the top sentence/box, change the last word to **stems**. “Discuss the difference...Zea mays stems.”
