[VIDEO INTERVIEW](#)

[PORTFOLIO](#)

EXPERTISE SKILLS

- Full Stack Development
- Frontend Development
- Backend Development
- RESTful API Development
- AI/ML Integration
- AI Chatbot Development
- Workflow Automation
- Real-Time Data Synchronization
- Middleware Engineering
- Webhook Integration
- Responsive Web Development
- Cross-Platform Development
- Progressive Web App (PWA) Development
- Offline-First Application Development
- Data Parsing & Extraction
- Real-Time Data Visualization
- API Security & Authentication
- UI/UX Collaboration
- Agile Team Collaboration

TOOLS

- Next.js
- React
- Vue.js
- Angular
- Tailwind CSS
- TypeScript
- Node.js
- PHP (Laravel)
- Java (Spring Boot)
- REST APIs
- Firebase (Firestore, Auth, Functions)
- MySQL
- IndexedDB (Dexie.js)
- BigQuery
- Zustand
- Recharts
- Git
- GitHub
- GitLab
- Figma
- Webhooks
- Google Calendar API
- Geolocation API
- n8n
- PWA Technologies
- CSV/PDF Export Tools
- AI/LLM Parsing Systems

Results-driven Web Developer with experience in full-stack development, AI integration, and cloud-based applications, specializing in Next.js, React, Laravel, Node.js, and Firebase technologies. Proven track record of developing AI-powered platforms, automating business workflows, and building scalable web and mobile solutions with real-time synchronization and advanced data processing capabilities. Brings strong expertise in frontend and backend development, API integration, and modern software engineering practices, helping organizations streamline operations, enhance user experience, and deliver innovative digital solutions.

WORK EXPERIENCE

SOFTWARE ENGINEER

SportsPilotAI | May 2025 – Present

- Led full-stack development of AI-powered sports management platforms, built AI chatbot ecosystems with workflow automations, developed AI-driven data parsing systems for tournament data extraction, and engineered real-time athlete tracking solutions using Firebase and AI integrations.

JUNIOR WEB DEVELOPER

Siguro.co | December 2024 – May 2025 (6 Months)

- Developed Laravel and Vue.js automation systems to reduce manual workflows, and built Node.js middleware tools with webhook integrations for real-time synchronization and issue tracking.

COMPUTER PROGRAMMER INTERN

Mega Cellular Network Inc. | November 2024 – January 2025 (3 Months)

- Developed responsive frontend interfaces using Angular, HTML, and CSS, managed source control through GitLab, and collaborated with developers on UI improvements and code reviews.

DEUCE (Badminton Live-Ops PWA)

April 2026

- Developed an offline-first session management engine using IndexedDB, allowing real-time court queuing and match tracking without an active internet connection.

ALLOCATIFY (PRIVACY-FIRST BUDGETING)

March 2026

- Built a 100% client-side budget allocation engine with zero server-side data persistence.
