

EB-5 Programme Education & Curated Project Access

InVisa

InVisa is an independent platform designed to help international investors and their advisors navigate the complexities of the **U.S. EB-5 Immigrant Investor Program**. Sitting at the intersection of immigration law, private markets, and economic policy, InVisa bridges the information gap by providing institutional-grade education, structured briefings, program research, and curated introductions to carefully reviewed EB-5 opportunities.

Our Partnership Model

We collaborate in a strictly complementary capacity with professional advisors, including global mobility experts, investment migration firms, private client advisors, family offices, and wealth managers.

- **Partners retain:** The primary client advisory relationship and all mobility planning services.
- **InVisa provides:** Specialized EB-5 program intelligence, investor education, and curated project introductions.
- **Execution:** All final investment decisions and transactions occur directly and independently between the investor, their immigration counsel, and the EB-5 project sponsor.

Compliance Framework

InVisa operates strictly as an **education and information platform**. To maintain our independence and compliance, InVisa:

- Does not provide investment advice.
- Does not offer or promote securities.
- Does not arrange or participate in investment transactions.

Featured Opportunity: Project Keystone (Confidential)

Project Keystone is a **U.S. infrastructure** investment supporting a major industrial sector. It is currently raising EB-5 capital through a highly experienced, USCIS-designated regional center boasting a 100% historical EB-5 visa approval record.

- **Total Project Size:** Approximately \$40M+
- **EB-5 Allocation:** 25 investors
- **Estimated Job Creation:** 280+ jobs
- **Security Buffer:** The job creation estimate provides a substantial buffer well above the USCIS requirement of 10 jobs per investor.

Note: Additional identifying details have been intentionally omitted. Full project information is available to institutional partners following the execution of a mutual confidentiality and non-circumvention agreement.

Confidential Information Notice

This document contains preliminary information intended solely for discussion with potential institutional partners of InVisa. Certain identifying details regarding projects referenced herein have been intentionally omitted. Full project information may be provided following execution of a mutual confidentiality and non-circumvention agreement.

Contact Information
