POLICY BRIEFS

JUNE 2020 | **Post-Pandemic Economic Recovery** joint with Lucciano Villacorta
The historical evidence shows that, in the face of major recessionary shocks, the economic recovery process tends to be slower, possibly due to hysteresis in the labor market, other non-linear phenomenon associated with the destruction of production chains and labor relations, and complications in financial markets deriving from this destruction.
Details: [Full monetary policy report \(IPoM\)](#), BOX V.1 - [Technical report \(Spanish\)](#) [*Recesiones: persistencias y no linealidades*]
