

A FREEBIE by @MRSCHALMERSCHERUPS

DONUT

Number Builder!

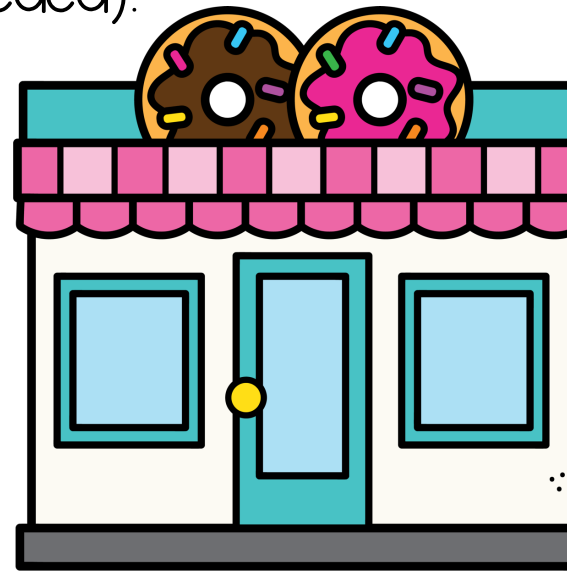

ABOUT

This resource was designed to be as open-ended as possible! The intention behind it, is that students use a combination of cards to represent a target number (the sprinkle numbers). For example, students might pair the number '10' and a hand representing '5' to make '15'. Additionally, students can also use this resource to represent numbers. E.g., sourcing all the cards that show '5'.

What's included:

- Donut box building mat (2 options: print as many as needed).
- Sprinkle number cards.
- Math Donuts (combine to create the target number).
- Optional recording sheet (print or laminate).

Here

A large black number 14 is centered on a white background. Surrounding the number are several colorful, rounded rectangular shapes: a pink one to the upper left, a light blue one to the upper right, a yellow one to the lower left, a green one to the lower left, a purple one to the lower right, and an orange one to the lower right. The entire scene is enclosed in a thick black border.
