- Inventory Management System Development
- Team Leadership & Code Review
- Agile Collaboration
- Technical Troubleshooting & Problem Solving

TOOLS

- React.js
- Next.js
- JavaScript
- Laravel
- PHP
- Hono.js
- MySQL
- PostgreSQL
- Supabase
- AWS S3
- GitHub Actions
- DigitalOcean
- Stripe Connect
- PayPal
- Xendit
- jQuery (AJAX)
- Git
- SAP Business One
- Claude
- Replit
- Lovable
- Bolt
- Cursor

Results-driven Web Developer with hands-on experience in full-stack application development, specializing in React, Next.js, Laravel, PHP, MySQL, and modern JavaScript frameworks. Proven track record of building and optimizing production-level web applications, integrating secure payment systems, implementing scalable cloud-based solutions, and leading award-winning software development projects recognized at regional and national competitions.

WORK EXPERIENCE

FULL-STACK WEB DEVELOPER

SUpost (California, Remote) | July 2025 – Present

- Rebuilt a campus marketplace platform using React.js and Next.js, enhanced UI/UX, integrated Stripe Connect, PayPal, and Xendit payment systems, refactored backend architecture with Hono.js, implemented advanced search and filtering features, managed PostgreSQL databases through Supabase, and maintained production deployments using AWS S3, GitHub Actions, and DigitalOcean.

LEAD PROGRAMMER (CAPSTONE PROJECT)

STI College – General Santos City | February 2025 – July 2025 (6 Months)

- Led development using Laravel, Inertia.js, and React, designed and managed MySQL databases, and oversaw code quality, system functionality, and team collaboration.

SOFTWARE DEVELOPER

AutoBlitz | January 2025 – March 2025 (3 Months)

- Developed and optimized a web-based text blasting platform, diagnosed and resolved system issues, and implemented SMS functionality solutions.

LEAD PROGRAMMER (CAPSTONE PROJECT)

General Santos City | March 2024 – February 2025 (1 Year)

- Built a motorcycle parts and accessories management system, implemented inventory tracking and order management features, improved operational efficiency for local businesses, and coordinated development activities including testing and code reviews.
