

MODELO COMPORTAMENTAL NUMA VISÃO ASTROLÓGICA

Técnica de Marc Edmund Jones

Catarina Rocha ASPAS 206

Objectivos

- *Marc Edmund Jones no Séc XX*
- *Princípios e Regras básicas dos Modelos Planetários*
- *Exemplos práticos e interpretação*

Astrological Analysis

The most complete exposition of Sabian Astrology based on a whole-new approach using the eleven-point analysis.

• Natural Disposition

• Temperament Type

• Blood

• Bark

• Head

• Location

• Social

• Speech

• Spirit

• Mode of Self-Integration

• Facial Determinants

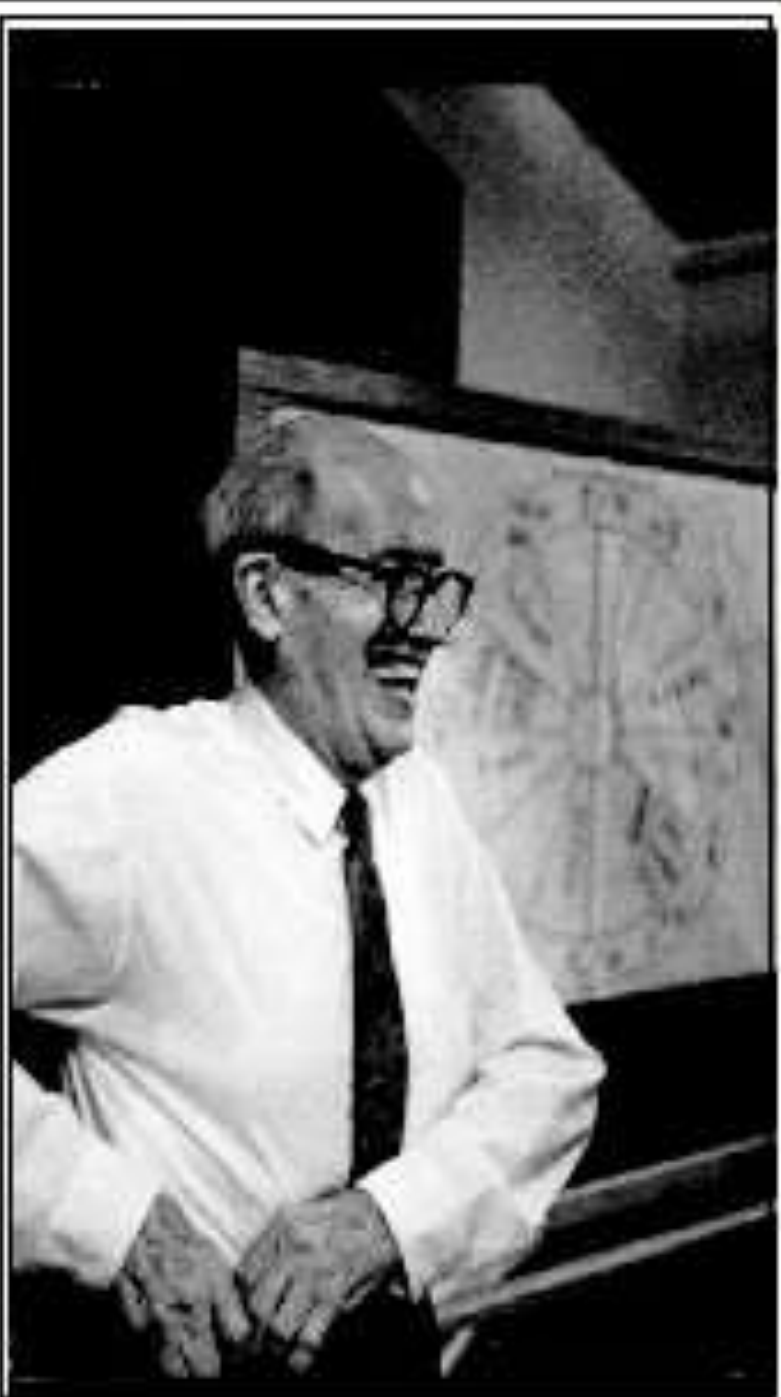

• Comparisons of Horoscopes

• Vocational Guidance

• Glossary of over 200 Terms

Dr. Marc Edmund Jones

- 1/10/1888 – 5/3/1980 (91 anos)
- Pastor Presbiteriano
- Roteirista de cinema e revistas
- Estudos superiores em Teosofia, Filosofia (PhD)
- Astrólogo
 - Graus Sabeus
 - Modelos planetários

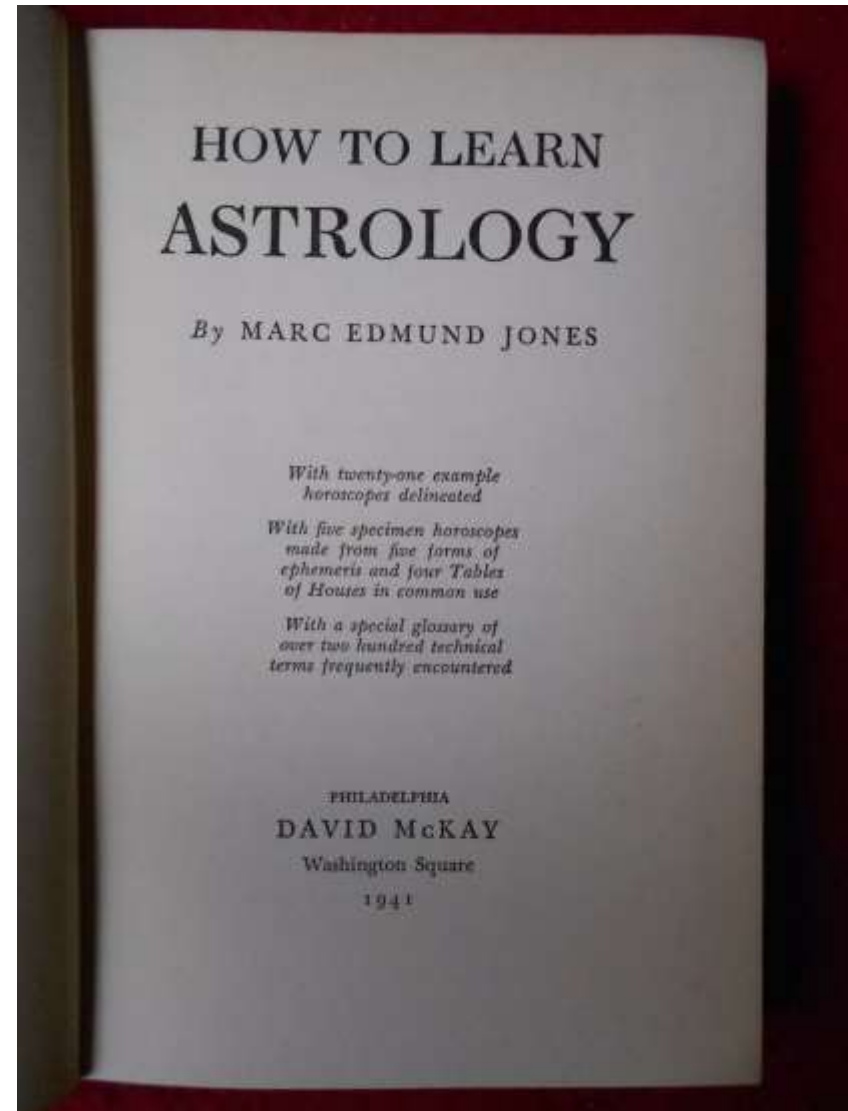

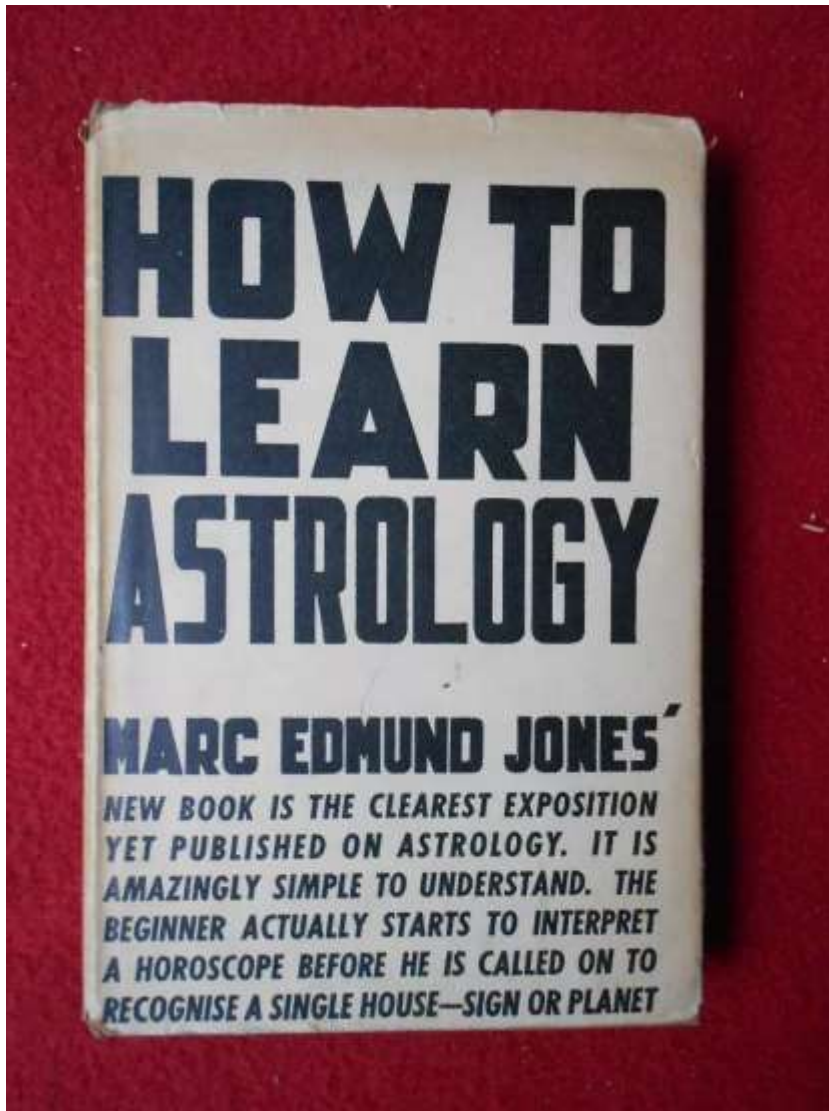

Marc Edmund Jones

- Considerado um dos maiores astrólogos Americanos do Séc XX
- Gestalt, ou Psicologia da Forma, é que o todo é maior do que a soma das partes.
 - Aplicado ao mapa, este princípio revoluciona toda a técnica de leitura, pois desloca o foco de atenção das qualidades isoladas de cada planeta para o desenho geral da carta.
- [Esquerda: Jones numa de suas maratonas de palestras pelos Estados Unidos, aos 75 anos, em 1963.]

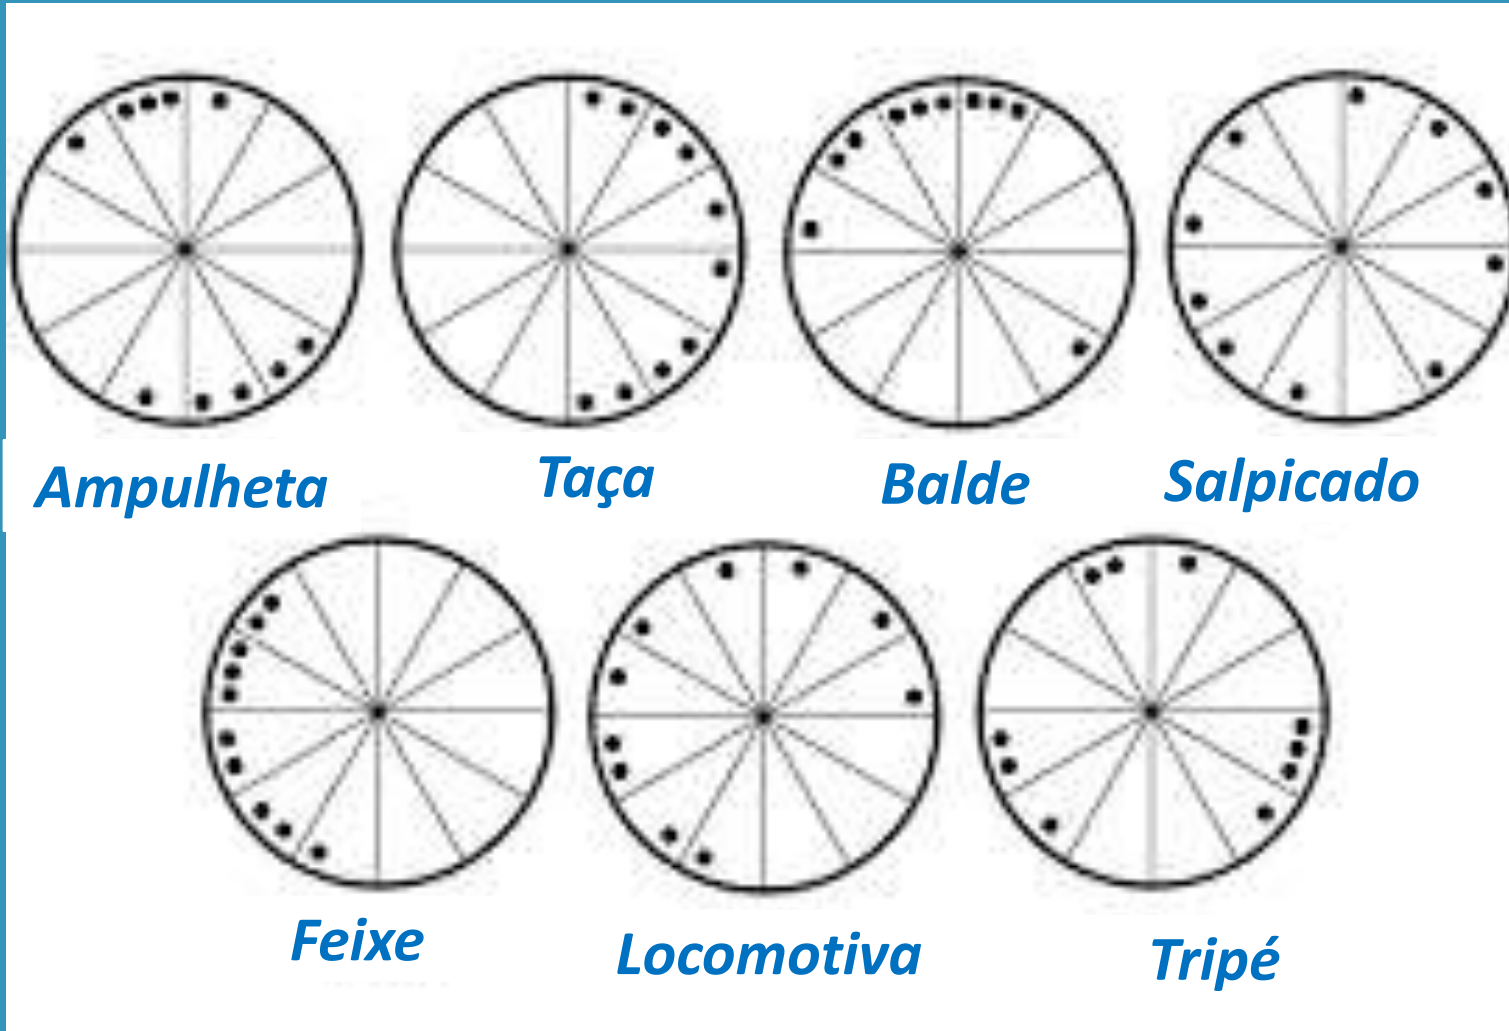

Do Micro ao Macrocósmo
Os padrões que se desenham
São similares a réplicas ... padronizáveis!

Divisão básica dos modelos

- I) Bipolares
 - Taça
 - Balde
 - Ampulheta
- II) Tripolares
 - Locomotiva
 - Tripé
 - Feixe
- III) Mistos
 - Leque
 - salpicado

GUIAS/REGRAS

Catarina Rocha ASPAS 206

Taça	Balde	Ampulheta	Locomotiva	Feixe	Tripé	Salpicado
<p>* planetas num arco de 180° e distar entre si < 60°.</p> <p>* Frequente uma oposição de borda;</p> <p>* Planeta focal = o planeta guia (o 1° em sentido horário);</p>	<p>* 9 planetas em 180° e distar < 60° e o 10° no lado vazio (a alça);</p> <p>* Frequente oposição de borda;</p> <p>* O planeta alça > 12° da oposição de borda;</p> <p>* Planeta alça = planeta focal;= é o 1° em sentido horário da oposição de borda;</p>	<p>* Planetas em 2 blocos;</p> <p>* Modelo ideal: 3 oposições sendo 1 de centro e 2 de fronteira;</p> <p>* Há 2 planetas guia: os primeiros no sentido horário de cada bloco;</p>	<p>• 10 planetas em 2/3 da roda, o outro 1/3 vazio.</p> <p>* 2 planetas extremos fazem 1 trígono;</p> <p>* Existindo 1 grande trígono a energia estará muito voltada para o ponto médio do 1/3vazio;</p>	<p>• planetas em 130°;</p> <p>* planeta focal = planeta guia, o 1° no sentido horário;</p>	<p>* reunidos 3 blocos distintos;</p> <p>* Entre cada bloco deve existir 1 área aberta > 60°;</p> <p>* Se 1 vértice tem apenas 1 planeta este será 1 ponto focal => ponto rédea, i.e, aquele que direciona as energias dos outros 9 planetas;</p>	<p>Os planetas parecem estar salpicados em redor do mapa</p> <p>Os 2 planetas extremos da área ocupada formam 1 trígono;</p>
