

# ORIGAMI ROCKETS

**1**

**Materials Needed:**

**1 Square of origami paper**

**2 Squares of tissue paper**

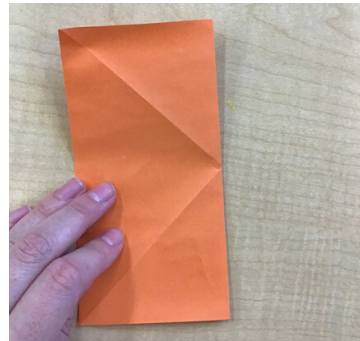

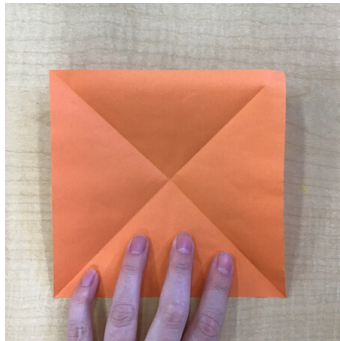

**Tip: If your paper is curled up really tightly, place it under a book and let it flatten before you get started.**

**2**

**Fold your paper in half so that you have a line going through the middle of the X**

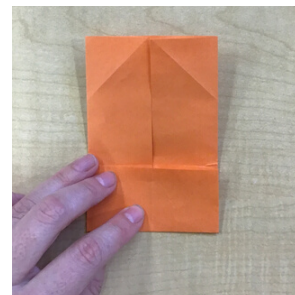

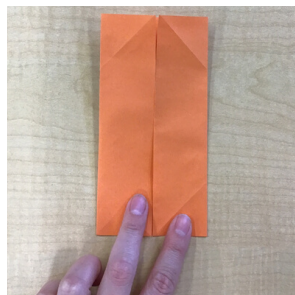

**Fold opposite corners together so that you have an X fold through your paper**

**Tip: As you make each fold, be sure to crease your folds extra flat!**

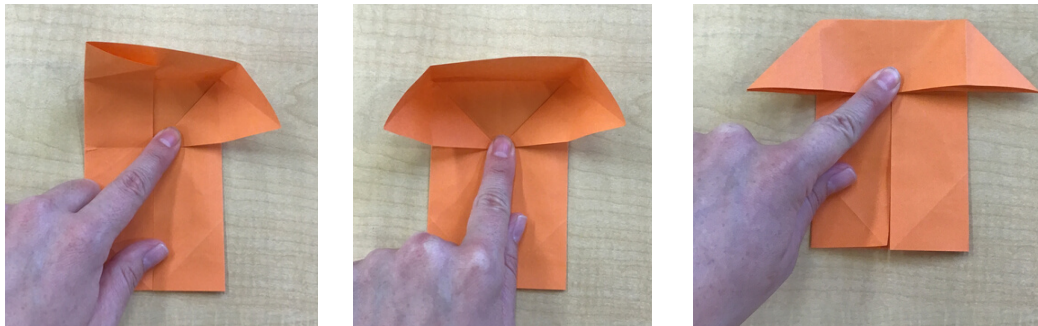

**3**

**Fold both sides of your square into the center crease so that your paper is now shaped like a rectangle. Then fold the bottom of your rectangle to the middle.**

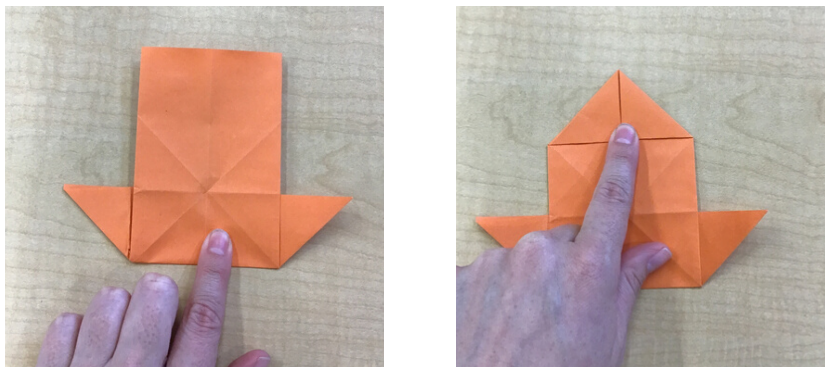

**4**

**Turn your paper upside down. Fold bottom part into two triangles that touch the middle crease. Fold the back flap down.**

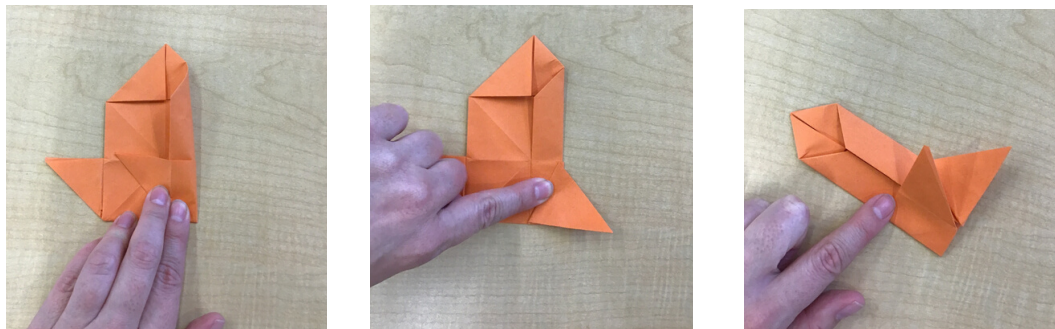

**5**

**Turn your paper over and upside down. Fold the top corners to the center line so that they form a triangle.**

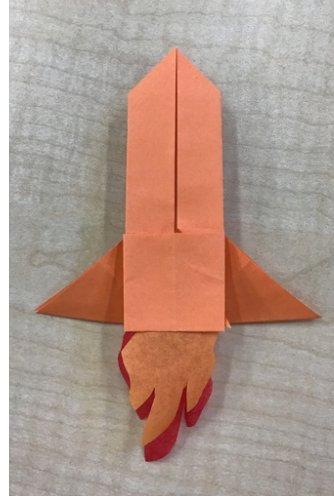

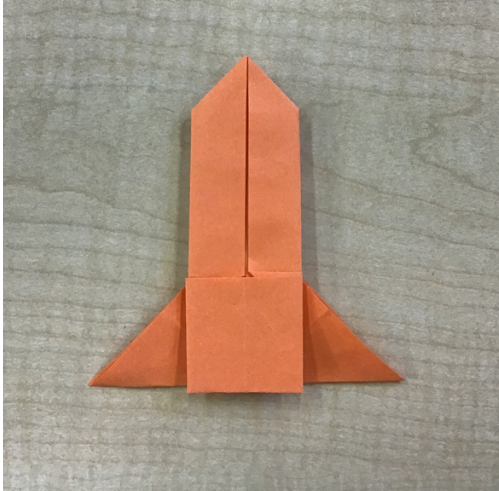

**6**

**Fold one edge of your rocket to the middle line. Then fold the triangle down. Repeat this on the other side**

**7**

**Turn your rocket over and there it is!  
Use the tissue paper to make flames for your ship!**

**8**

**Bonus: If you don't feel like adding flames to  
your rocket, challenge yourself and see if  
you can make a tiny rocket out of the tissue  
paper!**
