Euro-Strip Auto Opening Tool

EURO-STRIP AUTO OPENING TOOL The EURO-STRIP is a flexible auto-opening tool that allows you to bypass doors on Mercedes, BMW, Volvo and other vehicles. Machined cutout with heavy-duty rubber band for extra strength. Another Must-Have for your pro auto opening tool kit.

\$24.95

The UnLocker- Steering Bar Un-locker

Steering Bar Unlocker Used to pick the vast majority of after market steering wheel locking bars. Perfect for when the lock is facing away from you. "The UnLocker" is simple and easy to use. Replacement picks are available.

\$49.95

The Unlocker Replacement Pick

The Unlocker Replacement Pick Replacement pick for LT115 ["The Unlocker"](#). It's a good idea to always have an extra pick on hand...just in case!

\$7.95

Long Reach Tool for Cars

Long Reach Auto- Opening Tool Across the car entry tool. Allows you to reach inside a car to an activator on the opposite side of the car to retrieve the keys. Extends up to 76". Middle section optional. We've just added an [optional accessory kit](#) to the long-reach tool which is ideal for reaching inside pull handles that are located in recessed, tight spots, curved or rounded pull handles. This item is not shipped outside of the USA, sorry.

\$39.95

3 - Cell Hardbody Locksmith Auto Light

Lights are necessary, not optional, when opening today's cars. This hardbody locksmith light allows you to find the linkage rod guard plates, identify sensitive components inside the car door, determine your target area, minimize the chance of damage or wire tangles, make your job go quicker and maximize your ability to open a car professionally. After purchasing one of these lights you'll find MANY other uses for it besides car opening. Safe work, auto repair work, general machine inspection, and confined space illumination are only a few of the wide range of applications for these lights. See what you've been missing. We

designed the Krypton Hardbody light with the locksmith in mind. The machined high-grade heavy-duty aluminum body with a durable, glossy black, powder coat finish is mated with a flexible 18" coaxial wand through a simple RGA connection. The elimination of a switch means a trouble-free light for you. The slim Krypton bulb allows you into tight spots to avoid wire tangles and trouble spots. This light comes complete with a brighter gas filled Krypton slim bulb, suction cup clip and protective storage case. Lifetime warranty through manufacturer(excluding bulb). Batteries not included

\$65.95

Clip Zip Car Door Panel Tool

Clip Zip Door Panel Tool - Removes Car Door PanelsA must have for the automotive locksmith. This tool has changed the way locksmiths remove car door panels. The Clip Zip makes the removal of the panel easy and trouble free. This is a tool that works quickly and effortlessly with no training or practice. Removes clips on the door panel without damage. Separates the door panel from the door body without damage to the panel or the clip. No more broken plastic clips or torn door panels. Every locksmith that services automobile locks should have this tool. All of our [lock picks](#) and lock picking tools are made in the USA.

\$44.95

Pro Auto Tension Tool - RL-10D

Professional Auto Tension Wrench Stainless steel, standard tension wrench. Our superior quality Dino professional Auto Tension Wrench is especially designed for car opening. It is designed to provide the locksmith or recovery agent with very steady tension. The tip of the tension tool features 2 necessary size gaps so it's a fit for every type of car door cylinder. It is very flexible, which sets it apart from most similar tools on the market. We use the newest high technology carbon steel and construction methods to produce an exceptional tension tool! Item #RL-10D

\$19.95

Vent Window Tool - AO14

Vent Window Tool - 2 piece set Operate the vent windows on car, truck and van doors. Comes with 2 tools. Item#AO14

\$15.95

Small Vinyl Auto Tool Case

Small Vinyl Case 3" x 30" vinyl storage case with snap closure. Fits standard slim jim and super slim jim and protects them from the elements. Great case to store your jims in the car or van. Police departments call us asking for something they can keep loose auto opening tools in so they won't get destroyed in the trunk of their cruisers...we'd recommend this as a low-cost option. Need a replacement case for the [AK75 Slim Jim Kit](#) or the [AKSJ Slim Jim Kit](#)? This is the proper replacement case for both!

\$7.95

Large Vinyl Auto Tool Case

Large Vinyl Case 8" x 27" vinyl storage case with Zip-lock type closure. This is a replacement case for the [AK04 lockout kit](#), fits many other slim jim sets as well as other auto opening tools, protecting them from the elements. Great case to store your jims in the car or van. We often receive calls from law enforcement officers asking for something to keep their tools in because the rattling around in the trunk is making them crazy. This would be the case you're looking for guys! Isn't it time to replace your old, worn out jim case?

\$10.95

Long Reach Tool-Accessory

AO42A1 - Long Reach Tool-Accessory Ideal for reaching inside pull handles that are located in recessed, tight spots, curved or rounded pull handles. This tool can be used as stand alone tool or with the [AO42 Long Reach Tool](#) to reach even longer lengths. 2 pc set. This is a great non-destructive tool for security and law enforcement officers that are always helping John Q out of a jam! This item is not shipped outside of the USA, sorry.

\$25.95

Auto Tool Instruction Booklet

Auto Tool Instruction Booklet Resource booklet for understanding different auto's locking systems and how to use our tools on them. This is an excellent resource for the locksmith that concentrates on his lockout business. 42 pages.

\$19.95

Slide Lock Auto Opening Tool

Slide Lock Auto Opening Tool—Two tools in one! This double-ended tool has very broad usage. Opens both horizontal locking devices and vertical buttons. Our wire tools have "memory" which means that they won't lose their shape in the door. Our wire tools are strong and durable, yet small in diameter to allow you easy entry into those vehicles with tight weather-stripping. All of our tools are field tested by our technicians. Made in the USA. Full Color Instructions included. Lifetime warranty against manufacturer's defect. This item ships to the USA and Canada only

\$19.95

Loop-D-Loop Auto Lockout Tool

Loop-D-Loop Auto Opening ToolThis unique double-ended tool offers a new approach to lockouts on many BMW's, Mercedes, Volvos and Volkswagens among other. Fed in under the window, the "loop" is fixed around the straight or mushroom style button head and pulled tight, then lifted up to unlock. Heavy duty coated wire, securely crimped. Our wire tools have "memory" which means that they won't lose their shape in the door. Our wire tools are strong and durable, yet small in diameter to allow you easy entry into those vehicles with tight weather-stripping. All of our tools are field tested by our technicians. Made in the USA. Full Color Instructions included. Lifetime warranty against manufacturer's defect.

\$24.95

2 Cell Hardbody Locksmith Auto Light

2 Cell Hardbody Light Lights are necessary, not optional, when opening today's cars. This hardbody locksmith light allows you to find the linkage rod guard plates, identify sensitive components inside the car door, determine your target area, minimize the chance of damage or wire tangles, make your job go quicker and maximize your ability to open a car professionally. After purchasing one of these lights you'll find MANY other uses for it besides car opening. Safe work, auto repair work, general machine inspection, and confined space illumination are only a few of the wide range of applications for these lights. See what you've been missing. We originally designed the Krypton Hardbody light with the automotive locksmith in mind. The machined high-grade heavy-duty aluminum body with a durable, glossy black, powder coat finish is mated with a flexible 18" coaxial wand through a simple RGA connection. The elimination of a switch means a trouble free light for you. The slim Krypton bulb allows you into tight spots to avoid wire tangles and trouble

spots. This light comes complete with a Brighter gas filled Krypton slim bulb, suction cup clip and protective storage case. Lifetime warranty through manufacturer(excluding bulb). Batteries not included

\$49.95

LAB Auto Disc Tool for Locksmiths Item number LTT005

\$1.95

Back Flip Tool

Double ended auto opening tool. The Back-Facing tip reaches above and behind the plastic guard plates on newer Hondas and successfully opens a variety of new GM cars. The Flip end opens late Toyota models. Xacto-Grip Knurled and Flattened.

\$19.95

Window Crank Tool

Window Crank Tool Slips behind window crank and removes spring clip. Makes manual crank removal easy and risk free. A must-have in the locksmith toolbox for (some) auto unlocks.

\$10.95

Auto Shutter Tool Set

Auto Shutter Tool Set These tools that hold open the dust covers of automotive locks were designed by automotive locksmiths, for the automotive locksmiths! These three quality tools have the following outstanding features: Color coded thick dipped handles not only protect your customers automobile, but the extra weight stabilizes the tool, and very importantly, the bold colors allow you to quickly reach for the tool you need. Double notching allows usage of these tools in normal lock situations, while not ignoring your tool positioning needs with the deeper seated locks.

\$27.95

76" Extra Long Arm Tool

The AO42-LAXL Extra-Long Arm Auto Opening Tool is approximately 76" in length and is designed to enter into the passenger compartment of vehicle through the door using wedges and/or door jack type tools. \$10.00 oversize item charge is automatically added to standard shipping charge. Sorry, this tool is not shipped outside of the upper 48 US states. This tool is not shipped to Alaska or Hawaii. Oversize shipping fee of \$10.00 added to regular shipping charges.

\$49.95

Binder for Car Opening Manuals

MABDBIN - Binder for Car Opening Manuals Replacement Binder for The Best Damn Car Opening Manual Period! Dimensions 8 3/8"(w) x 9"(h) x 3 1/2"(d) D-Ring Black color. Holds 5 1/2" x 8 1/2" page size.

\$19.95

58" Long Arm Auto Opening Tool

The AO42-LA Long Arm Auto Opening Tool is approximately 58" in length and is designed to enter into the passenger compartment of vehicle through the door using wedges and/or door jack type tools. In our opinion is a much easier and safer entry tool than any slim jim, particularly when you have to open late model autos. Sorry, this tool is not shipped outside of the upper 48 US states. This tool is not shipped to Alaska or Hawaii. Oversize shipping fee of \$10.00 added to regular shipping charges.

\$37.95

Universal Gas Cap Key

Universal Gas Cap Key A universal gas cap key, effective for most gas cap applications. Essentially it's a jiggle key for gas caps. These days, with the cost of a gallon of gas rising almost daily you can't be too careful...especially if you live in a major metropolitan area or a busy apartment complex. If you've lost the key to an existing locking gas cap this will do the job nicely!

\$4.95

Chevy Astro Car Opening Tool - GM

Astro Tool - Car Opening Tool for Chevy Astro, GM The AO07, Astro Tool, is a double ended car opening tool designed to open the Chevy Astro Van, Safari Van, and several other GM cars. The hook and reach make this double ended tool extremely useful. Xacto-Grip Knurled and Flattened. Full Color Instructions included. Made in the USA. Lifetime warranty against manufacturer's defect.

\$14.95

PRO-GLO Hands- Free Locksmith Light

PRO-GLO Hands - Free Locksmith Light The Pro-Glo, AL6000, utilizes a hands free suction cup design that rests on the exterior of the windshield of the vehicle illuminating the desired work area and allowing the vehicle entry technician to manipulate the interior locking mechanisms. A great accessory to any Long Reach Tool, the Pro-Glo features 6 powerful and uniquely angled LCD lights. The Pro-Glo is designed to aid with Auto Entry and is a terrific help to locksmiths needing to light a vehicles interior.

\$59.95

Quick Change Long Reach Tool

Quick Change Long Reach Tool The AO42-QC1, Quick Change Long Reach Tool, gives you the versatility to unlock many vehicles on the road. The multi-piece Quick Change tool is designed to enter into the passenger compartment of the vehicle through the door using wedges and/or door jack type tools. The specialty formulated Glow-in-the-Dark tip comes in handy on some openings at night. When extra length is needed, simply use the 18" "extension" between the rigid "handle" and rigid tool "body". Our seamless design, not needing a bulky coupler, can reach up to 67" and can be stored easily. The [AO42-QC2](#) is a convenient accessory offering even more accessibility. Made in the USA. Lifetime Warranty against manufacturer's defect. Sorry, this tool is not shipped outside of the upper 48 US states. This tool is not shipped to Alaska or Hawaii. Oversize shipping fee of \$10.00 added to regular US shipping charges.

\$39.95

Long Reach Tool Accessory

Quick Change Long Reach Tool Accessory Set The Quick Change Long Reach 2 piece accessory tool set are excellent companions to the [AO42-QC1 long reach tool set](#). The thin diameter tool bodies screw directly into the rigid "handle" or 18" "extension" without the use of a bulky coupler. The thinner material may provide less wedging or stress on the vehicle. It is easy to slightly bend the thin diameter bodies to pull or push on the desired unlocking feature. Lifetime Warranty against manufacturer's defect Made in the USA. Please Note: This tool is not shipped outside of the upper 48 US states. This tool is not shipped to Alaska or Hawaii. Oversize shipping fee of \$10.00 added to regular US shipping charges.

\$29.95

Peterson Auto Entry Tools

Three-Wire Auto Opening Kit Peterson Manufacturing has incorporated into three tools an auto opening kit that will not only simplify your auto opening efforts but will make your efforts easier to perform. The tools are made with aggressive intentions. From their angular bends to their point-grabbing teeth, successful openings will occur on horizontal and vertical linkages, bell cranks, and interior locking door buttons. Handles are made of stainless steel, rubberized coatings, and thumb rests for ease of applying gentle linkage leverage. We are proud to add these wonderful 43 inch long opening instruments to our long list of professional locksmithing tools.

\$99.95

GM Ring Clip Removal Tool

GM Ring Clip Removal Tool This tool makes quick work of removing the ring clip on older GM/Chrysler/Jeep steering columns. Instead of juggling an ice pick and a small screwdriver and spending 5 minutes or longer struggling to remove the ring clip, this tool makes clip removal a matter of a few seconds. Place the tool in the shaft spline and underneath the ring clip and pull back to quickly lift the clip out of its seat.

\$16.95

Spring-L Auto Opening Tool

This is one of the most versatile auto opening tools ever made! The Spring-L tool is used to lift and push bell cranks and lazy pawls on many different cars.

\$14.95

Lock Pick Tension Tools - Turning Tools

Tension Wrench - Standard

Tension Wrench - Standard Stainless steel, standard tension wrench. What's a tension wrench used for? Wikipedia tells us that a tension wrench is a tool used in picking locks. Typically shaped like a letter "L" (although the vertical part of the letter is much elongated in comparison to the horizontal part), it is used to apply tension to the inner cylinder of a lock, in order to hold any picked pins in place, while the other pins are shifted. The tension wrench is then used to turn the inner cylinder and open the lock. Our superior quality hand tools are manufactured of tempered stainless steel; deburred and burnished to a soft luster. We use the newest high technology steels and construction methods. Our tension tools are rust proof, full hard spring stainless steel making them some of the highest quality locksmith tools available. All of our [tension tools](#) and are made in the USA.

\$1.95

Tension Wrench - Short Twist Flex

Tension Wrench - Short Twist Flex Stainless steel, short twist flex tension wrench. Interesting Fact: When lockpicking is shown in movies and television shows, the tension wrench is almost always omitted. Picking a pin and tumbler lock without torsion is impossible unless there is a major defect in the lock. In some modern dramas (such as FOX's 24) in which realistic depiction of events is favored, the pick-and-wrench technique is fully shown (albeit often executed in a second or two, which doesn't accurately reflect the luck involved with raking an unfamiliar lock). Our superior quality individual lock picks are manufactured of tempered stainless steel; deburred and burnished to a soft luster. We use the newest high technology steels and construction methods. Our picks are rust proof, full hard spring stainless steel with smooth rivetless construction making them the strongest most durable lock picks available. All of our [tension tools](#) are made in the USA.

\$1.95

Tension Wrench - Long Twist Flex

Tension Wrench - Thin Line Standard Stainless steel, long twist flex tension wrench. Our superior quality individual lock picks are manufactured of tempered stainless steel; deburred and burnished to a soft luster. We use the newest high technology steels and construction methods. Our picks are rust proof, full hard spring stainless steel with smooth rivetless construction making them the strongest most durable lock picks available. All of our [Tension Tools](#) are made in the USA.

\$1.95

Tension Wrench - Thin Line Standard

Tension Wrench - Thin Line Standard Stainless steel, thin line standard tension wrench. Our superior quality individual lock picks are manufactured of tempered stainless steel; deburred and burnished to a soft luster. We use the newest high technology steels and construction methods. Our picks are rust proof, full hard spring stainless steel with smooth rivetless construction making them the strongest most durable lock picks available. All of our [tension tools](#) are made in the USA. If you're wondering what it is exactly a tension wrench does here's a bit of insight from the folks at

Wikipedia: The Tension wrench, or torsion wrench as it is more accurately described, is used to apply torque to the lock plug to keep pins from being pushed back down by springs after they are correctly set at the shear line. A tension wrench is a tool used in picking locks. Typically shaped like a letter "L" (although the vertical part of the letter is much elongated in comparison to the horizontal part), it is used to apply tension to the inner cylinder of a lock, in order to hold any picked pins in place, while the other pins are shifted. The tension wrench is then used to turn the inner cylinder and open the lock. Despite its popular name, the tool provides torsion, not tension.

\$1.95

Tension Tool - Double Wishbone

Tension Wrench - Double sided Wishbone Stainless steel, double sided wishbone tension wrench. Our superior quality individual lock picks are manufactured of tempered stainless steel; deburred and burnished to a soft luster. We use the newest high technology steels and construction methods. Our picks are rust proof, full hard spring stainless steel with smooth rivetless construction making them the strongest most durable lock picks available. All of our [tension and turning tools](#) are made in the USA. If you're unsure what a tension (or torsion) tool is used for here's a brief

explanation from our friends at Wikipedia: A tension wrench is a tool used in picking locks. Typically shaped like a letter "L" (although the vertical part of the letter is much elongated in comparison to the horizontal part), it is used to apply tension to the inner cylinder of a lock, in order to hold any picked pins in place, while the other pins are shifted. The tension wrench is then used to turn the inner cylinder and open the lock. Despite its popular name, the tool provides torsion, not tension. A tension wrench would be, by definition, a tool that stretches something. A torsion wrench would be a tool that twists.

\$2.25

Tension Wrench - Double-ended

Tension Wrench - Double-ended Stainless steel, double-ended tension wrench. Our superior quality individual lock picks are manufactured of tempered stainless steel; deburred and burnished to a soft luster. We use the newest high technology steels and construction methods. Our picks are rust proof, full hard spring stainless steel with smooth rivetless construction making them the strongest most durable lock picks available. All of our [tension tools](#) are made in the USA. If you're wondering what it is exactly a tension wrench does here's a bit of insight from the folks at Wikipedia: The Tension wrench, or torsion wrench as it is more accurately described, is used to apply torque to the lock plug to keep pins from being pushed back down by springs after they are correctly set at the shear line. A tension wrench is a tool used in picking locks. Typically shaped like a letter "L" (although the vertical part of the letter is much elongated in comparison to the horizontal part), it is used to apply tension to the inner cylinder of a lock, in order to hold any picked pins in

place, while the other pins are shifted. The tension wrench is then used to turn the inner cylinder and open the lock. Despite its popular name, the tool provides torsion, not tension.

Spring loaded Circular Tension Tool

Spring Loaded Circular Tension Tool Spring loaded circular tension tool with pressure button, brass.

\$74.95

Feather Touch Tension Tool

Feather Touch Tension Tool Feather Touch turning wrench with coiled spring head applies pressure from a fraction of an ounce up to 4 oz. Tension wrenches called "Feather Touch" wrenches, are coiled into a spring at the bend in the "L", which helps the user apply constant torque. Some users, however, maintain that such wrenches reduce torque control and the feedback available to the user.

\$9.95

Tulip Tension Tool Straight

Tulip Tension Tool- Straight Stainless steel, standard tension wrench. Our superior quality individual lock picks are manufactured of tempered stainless steel; deburred and burnished to a soft luster. We use the newest high technology steels and construction methods. Flat Five Pro Tension Tools

Flat Five Pro Tension Tools The serrated teeth provide a locking grip between your tension tool and the key way -- even with a feather touch! These five tools are built as 3 sets: One tool has no teeth and is a European type that is ideal for smaller locks. The other two are paired -- one thin, one thicker. One end of each is a shallow reach as we would normally like to use, but the other end has a longer reach for recessed locks or mortise cylinder with a protective rim around them. In any case the people who see them at trade shows and touch them inevitably buy them. They have excellent soft and medium tension capabilities. A complete set of FLAT-5 tension tools come standard with our [M2 lock pick set](#) as well as our [E2 pick set](#).

\$39.95

Tension Tool for Everest locks

Tension Tool for Everest Locks This pair of Peterson ET-2 Specialty Tension Tools is designed for picking Schlage Everest cylinders. These heavy duty tools are finely machined and polished to allow a "no drag" high performance fit, and have the strength and optimal design to allow for maximum performance that you expect from Peterson Tools The long finger will lift the Schlage "check pin" located at the rear of the cylinder's key way, while the second finger seats into the top of the key way at a distance that avoids contact with the lock's first tumbler. You can pick in either a clockwise or counterclockwise rotation using these tools. We offer these tools as a pair because of the varied orientations of lock installations encountered.

\$54.95

Double Prong Tension Tools

Double Prong Tension Tools- Sold in a set of 2 Many people like this style of tension tool for better stability. It's also referred to as the 2-Finger Tension Wrench. We offer it in two popular widths: you get one of each. These are tools you will never want to be without.

Peterson Bending Tool

Our "U-Bend-it" TENSION TOOL BLANKS allow the locksmith to make a perfect tension tool in SECONDS. Many of these spring steel selections come with a Peterson Bending Tool, but if you already have a tool select a "refill" which comes without the tool. Keep in mind that the Peterson Steel is not like the common spring steel that breaks when you bend it. While the Peterson Steel is as strong and resistant to bending as the other steels, when you reach the bending point with Peterson Steel you are allowed to make the bend you desire. And our bending tool has a built in radius forming element that will assist you with any steel you may want to bend. The Peterson Bending Tool is made of thick slabs of hardened spring steel laser cut to perfection, de-burred to provide you with the tough hard working tool you deserve. Did you notice the hole in the end of the tool so that you can put it on your key chain? We have provided a wider version tension strip for you in the UBI - Assorted kit. Our panel of locksmiths advised us that this width is not only better for automotive work, but the width has not interfered with any other locks they have tried out with it. And yes they have tried the smaller key way locks. Locksmiths have a reputation for taking an existing tension wrench and adjusting it to meet their personal specifications. With our "U-Bend-it" kit series, the locksmith can make a special personalized tension wrench in minutes, to perfection, every time. Each of our tension wrench sets come with a Peterson Wrench Bending Tool. This special tool will allow the user to place a quality radius in each bend allowing our special steel to take the bend while maintaining the steel's strength and integrity.

Locksmith Training Tools, Cut Away Locks - Innovative & Affordable

Lock Picking School In A Box

Lock-Picking School in a Box For years, we've said that the easiest way to learn the art of lock picking is to begin by removing a few pin sets from a lock, and one by one, add them back as your picking skills increase. We're pleased to offer a "Lock Picking School in a Box" to help the beginning locksmith develop all the skills needed to master pin-tumbler lock picking. The kit consists of a table-top "door" practice stand with 5 interchangeable brass pin tumbler lock cylinders. Each lock has 1, 2, 3, 4, or 5 pins and is numbered 1 through 5. The set includes five lock cylinders, the first of which has a single pin set in place, with each lock becoming progressively more difficult, the last lock containing a full number of pin sets. All necessary tools and fittings and a learning guide are included with the kit. The progressive learning system utilized is based on positive reinforcement of learned skills as the student progresses rapidly from picking a 1 pin lock up to a standard 5 pin lock. The "Lock Picking School in a Box" is a unique and ideal system for

learning basic lock picking skills as well as being a great testing ground for new lock picks and products. This Progressive Learning System is a proven method of learning and mastering the art of lock picking , and we highly recommend it! Practice really does make perfect! Also included are 4 picks, 1 tension tool, and the instructional book, "Easy Pickings" After you've mastered the Lock Picking School in a Box you may want to pick up a great set of picks. We highly recommend the [MPXS-20 lock pick set](#). It contains sturdy metal-handled picks and a top quality leather case is included free of charge. Please note: This item weighs nearly 5 lbs - it's heavy. It costs more to ship than most of our other products. An additional \$10.00- \$20.00 is added to the shipping charges when it ships outside of the continental USA and \$7.50 is added for domestic shipping. All of our [lock picks](#) and lock picking tools are made in the USA.

Lockout Specialist Locksmith Course

Lockout Specialist Locksmith Training Course - Become a Locksmith Become a bona-fide, licensed, bonded locksmith quickly and easily! How many times have you gone into work thinking "I should be the boss! I do all the work and HE gets all the credit! Certainly I don't speak for everyone reading this, but I hated my boss, and, as a result, I hated my job. I got so tired of being underpaid and under-appreciated that I decided it was time to try something on my own. I had a keen interest in the locksmith trade and a 20 year background in sales and marketing and that's how LockPickShop was born over 9 years ago! We are fortunate to have many of the best locksmith tools, lock picking tools and training videos available today. Recently I came across the Lockout Specialist's Course, a complete locksmith training course to starting, promoting and operating a home and auto lockout specialty business. I was impressed with all the rave reviews my associates in the field gave The Lockout Specialist's Manual. I'd wanted to offer a quality lockout specialist course to our customers but had never been impressed by others that were available. The author and designer of the course, Chris Percy, was kind enough to send us the complete course to review. THIS course far exceeded my expectations! Chris is a professional writer with 15 years experience designing and writing technical instructional material for readers all over the world. He received his first formal training in emergency locksmithing and building entry techniques more than 20 years ago, as a Military Policeman for the U.S. Army. Since then, he's devoured any locksmithing information he could get his hands on, including one-on-one training, books, locksmithing trade publications, emergency locksmithing manuals for police and fire personnel, and even the well-known home-study courses. Chris has thousands of hours of locksmithing experience and from the moment I started studying his course it was clear that this course was worth it's weight in gold. His on-the-job experience as a lockout specialist, the locksmithing courses he's mastered as well as the tricks and techniques learned from other locksmiths are all represented in his manual. I've never seen another locksmith training course or lockout manual that contains as much specialized information as this one. This manual will show you how to: Become a bona-fide, licensed, bonded locksmith quickly and easily; Get easy access to reasonably priced locksmithing tools and equipment; Learn the basics of lock picking and keyless auto entry; Learn techniques for bypassing locks to gain entry; Find customers who will gladly pay a lot of money for the skills you've learned; Get paid more as you gain more experience Set up partnerships with other locksmiths (usually full-time locksmiths) that will be profitable for both of you; and finally Streamline your business so that you automatically get as many customers as you want and do only the work you really want to do. I know that it sounds like a lot of information for one manual but I guarantee that graduates of the course will be able to successfully start lockout services after completing it. The manual is a combination business manual and locksmithing techniques manual, with a lot of "insider" information that you need to know about locksmithing, and, especially lockouts. Chris has included every "trick of the trade" that he's picked up over the years since he's operated his own lockout business. He also includes plenty of resources for anything you might need, whether it be information or tools. The manual flows very smoothly and is organized in the same order as the steps you'll need to follow to get started. Chris takes a step-by-step approach that will allow you to get your lockout specialist business started immediately. Within a very short period of time, as little as 30 days, you'll be able to start your own lockout service and earn between \$60-\$80 per hour! What's Included with the Course? You get a 100+ page manual that is actually two manuals in one: a no-holds-barred locksmithing manual that covers lock picking, lock bypass techniques, and auto openings, combined with a very detailed, full-blown business operations manual. Also, you get a one-hour instructional video that shows the lockout skills and techniques applied in real-world situations. You'll also receive a professional-quality lock pick set, practice lock, along with a Resource Guide that will put you in contact with suppliers for locksmithing tools, equipment, and information. Perhaps best of all, you'll get Chris' personal help by e-mail whenever you need it. Lockout Specialist's Manual Here's just a partial list of what the manual will show you: Basic and advanced lockpicking techniques Car opening techniques Little-known insider secrets and tricks for gaining entry into buildings without picking the lock (lock bypasses) How to become a licensed, bonded locksmith for about \$50 (and get a subscription to a restricted locksmithing journal at the same time, for free) How to get all the restricted locksmithing tools and equipment you need, without the hassles (including the professional auto lockout set I've used for six years) How to expand your business, if you decide to, totally from profits How to locate and enroll in courses on specialty subjects that are restricted to locksmiths only How to establish a free "dial-in help" network for instant assistance or technical info, any time you need it How to make a tool for less than a dollar that will open up to 90% of all vehicles on the road today The secret Chris learned from a locksmith in a golf cart: How to make more than \$1,000 in a single weekend How to get free advertising How to set up a "customer funnel" How to trade the locksmithing work you don't want for big profits and other benefits How to easily sell duplicate keys for \$6.00 or more each to customers who will literally beg you for them How to set up a "back end" business that brings in as much money as your first business The Lockout Specialist DVD Seminar This one-hour DVD will never win awards for fancy effects or slick camera work, but it's absolutely crammed with locksmithing information and techniques. It's literally a locksmithing seminar on DVD. Chris shows you, face to face, how to: Pick locks Open cars Gain entry into buildings without picking the lock Use special picking techniques to open resistant locks Use the "ace in the hole" vibrating pick tool And much, much more! Professional Lock Pick Kit All the basic picks that professional locksmiths use including: Diamond point, hooks, rakes, etc. Tension wrenches Everything you need to learn lockpicking immediately! Practice Pin-Tumbler Lock and Plug Follower Tool This set, with the instructions provided in the manual, will allow you to take the lock apart and reconfigure it for lock picking practice. You'll be able to set up the lock to be as easy or hard to pick as you want, and learn a lot about how locks work in the process. Resource Guide Included are the names, addresses and phone numbers for locksmithing tools and equipment, restricted trade publications, and other locksmithing information that I personally use. The Resource Guide is your passport to all the tools and information you'll ever need to start a high-profit lockout service. So what are you waiting for??? Don't let the chance to start and own YOUR OWN business pass you by. Select one of our easy payment methods, and see how easy it is to enter the fascinating lockout specialty field. Please note: The Lockout Specialist course is not eligible for return unless defective. If either dvd or the tool kit is defective this may be exchanged for replacement only.

The Tactical Lock Opening Course

Covert, FAST, No-Damage Entry Techniques, Tools, and Tactics for Law Enforcement Lock Picking and Lock Bypass Techniques for Police and First Responders About the Entry Course: A few weeks after the United States was attacked by terrorists on September 11, 2001, The U.S. Customs Service conducted training for its agents in covert entry techniques. Customs routinely requires its agents to perform covert entries into buildings, aircraft hangars, aircraft, and other locked areas to install court-ordered listening and recording devices that will later be used in court cases against drug smugglers, terrorists, and other criminals. This manual and the accompanying DVD are the result of that training, and are intended to serve as a training tool for other law enforcement officers, police departments, and first responders who must enter locked areas to perform their duties. Although the information in this course was originally intended to provide instruction in covert entries, the techniques apply equally well to many law enforcement and public

safety situations. Many police, fire, medical, and other emergency response teams could better protect the public if one or more members of each team was an "entry specialist," someone with knowledge and skill in opening and bypassing locks. This course is aimed at training such specialists. "The Tactical Lock Opening Course" is extremely useful and beneficial to Police, Ambulance, Fire, Private Detectives, Military, Undercover Drug Agents, SWAT Teams, Special Forces, CIA, FBI, DEA, NSA, NTA, US Customs and Border Patrol, Homeland Security, etc., Subjects Covered in this Course are: Lock Picking Techniques for Law Enforcement Personnel Lock bypass techniques Auto openings Instant padlock openings Specialized tools and equipment and much more This unique training gives you the skills necessary to quickly and effectively pick locks, bypass locking systems, open automobiles, and gain entry into locked areas without damaging property or leaving any sign that might alert criminal suspects of your passing. The Covert Entry Course was originally developed for federal agents who routinely perform covert entries for intelligence gathering, but the skills taught in the course are important tools for many other areas of law enforcement, including SWAT, investigations, and even routine patrol. The skills taught in the course are relevant to any situation where fast, no-damage entry is required. The instructor is a former law enforcement officer and has trained thousands of civilian locksmiths. He developed the course to be easy to understand, interesting, and effective in the real world, where results count. The course is designed for students with no previous locksmithing training and is easy to understand. You'll get a 100-page course manual that explains all the entry techniques step by step, with plenty of photos and drawings. Also, you'll get a 60-minute training video that shows the techniques in detail, including close-up video sequences with cut-away locks that show you what's happening inside the lock. Many segments of the video were taken from live training at a national law enforcement training center. Every course is backed with the instructor's personal support, either by telephone or e-mail, to ensure that every student gets the most from this training. When you order the course, he'll be happy to answer your questions or help you with any special needs. The following course overview will give you a detailed look at course contents and the subject areas covered. If you have any questions about the course, feel free to contact us by e-mail at customerservice@lockpickshop.com Course Summary The Covert Entry Course includes a 90-minute training video with the same video clips used to train federal law enforcement agents, plus video taken during the training seminar. The Course also includes an easy-to-understand, 100-page course manual filled with photographs and easy-to-understand, step-by-step instructions that make expert entries quick and easy. With the course, you'll also receive a professional lock pick set. The Professional Pick Kit includes all the basic picks that professional locksmiths use, including: Diamond point, hooks, rakes, etc. Tension wrenches Everything you need to learn lock picking immediately! The Covert Entry Training DVD The Course DVD contains every film segment used to train federal agents in covert entry techniques and tactics. This hour-and-a-half-long dvd is crammed with expert entry information and techniques. It's literally the Covert Entry Seminar on DVD. You'll be shown how to: Pick locks Gain entry into buildings without picking the lock Use alternate picking tools for extra-fast lock picking And much, much more! The Covert Entry Manual The manual includes the following sections: Overview of Entry Techniques About the Entry Course Introduction to Entry Techniques The Pin Tumbler Lock Introduction Pin Tumbler Construction Pin Tumbler Operation Lock Picking Tools Introduction Manual Picks Pick Guns and Vibrating Picks Alternate Pick Types Specialized Picks Tension Wrenches Basic Lock Picking Techniques Introduction Five General Rules of Lock Picking Evaluating a Lock for Picking Determining Plug Tension Pick Orientation The Pin-by-Pin Technique Over-Picking a Pin Stack Advanced Lock Picking Introduction The Scrubbing Technique The Raking Technique Combination Techniques The Pick Gun and Electronic Vibrating Pick Introduction The Pick Gun The Electronic Vibrating Pick Picking Locks with the Electronic Pick Wafer Lock Opening Techniques Introduction Wafer Lock Construction Auto Opening Techniques Introduction Auto Entry Points Auto Locking Systems Auto Entry Tools Auto Entry Techniques Padlock Opening Techniques Introduction Using Codes to Open Padlocks Picking Padlocks Rapping Padlocks Shimmying Padlocks Warded Padlocks Lock Bypass Techniques Introduction Lockset Construction and Operation Jimmying a Door Manipulating a Latch Using Wire Tools to Bypass Locks Bypassing Kwikset Locks Resource Guide - Included! The names, addresses and phone numbers for locksmithing tools and equipment. The Resource Guide is your passport to all the tools and information you'll ever need. Upon Completion of Course - Please email us at specialist-testing@lockpickshop.com You must include your order number, full name and address and the agency you are affiliated with. We will then mail you a test to complete along with a pre-addressed and stamped envelope. When you complete the test please send it back to our headquarters. Upon passing the test (we'll notify you with the results) we will send your certification by email in a Microsoft Word document that you may print out. Please note: Only one (1) certificate will be issued per course purchased.

Bump Hammer - Black

Bump Hammer - Black Once you have your bump key, you need to hit the back of the key with something that applies the proper amount of power. It has to be light enough so it won't do any damage to the bump key or the lock. This is what bump hammers aka "Tomahawk" are used for. Bump hammers are made of plastic and have the proper density and right amount of flex in the handle to create sufficient energy to bounce the lock pins while allowing control by the operator.

\$20.95

Bump Hammer - Blue

Bump Hammer - Blue Once you have your bump key, you need to hit the back of the key with something that applies the proper amount of power. It has to be light enough so it won't do any damage to the bump key or the lock. This is what bump hammers aka "Tomahawk" are used for. Bump hammers are made of plastic and have the proper density and right amount of flex in the handle to create sufficient energy to bounce the lock pins while allowing control by the operator.

Bump Hammer Weight Kit

Bump Hammer Weight Kit Two corks and enough lead shot to put under them in both chambers. Here's some info about weighting your hammer: YOUR BUMP HAMMER WEIGHT -- YOUR NATURAL SWING: An important secret to bumping keys is consistency. You want to apply a standard "THUMP" to the key that imparts the correct kinetic energy to raise all the pins at once. On some locks you strike it harder - sometimes softer, but your blows are centralized around some standard swing. Do you need to strike the key more firmly or lightly at times as a normal approach to bumping? Of course! But the comfort of swinging slightly softer or harder than your natural swing can yield great results in bumping. It is pretty simple: Force = Weight x Velocity. So if your natural swing is rarely striking the bump key hard enough, what do you do? Add some weight and let the tool centralize at your "normal" striking speed. In that way you can go slightly greater or softer with your speed, but you start out closer to the normally required "bump". We made our

hammers slightly lighter than the other folks by adding two compartments in the hammer heads. These compartments allow you to precisely match your hammer weight with your natural swing. Tests show that lead shot is the best medium to transmit impact. We have supplied lead shot and "corking" material to let you find YOUR natural hammer weight. We supply two corks and a maximum load of bird shot. Experiment and add our lead shot to the hammer compartments to precisely match your hammer weight with your natural swing. When you are satisfied, glue the corks in permanently.

\$24.95

Flexible Bypass Shim

Flexible Bypass Shim The Flexible Bypass Shim is a very unique and helpful tool. It is not unique with for what it is, rather the material is unique. Instead of a brittle plastic, this tool is a six-inch square made of plastic impregnated fabric. These nifty 6" X 6" squares of plastic filled fiber shims are a terrific solution to opening locks that have only latching features. You've seen it work in movies and tv shows... doors opened with just a small piece of plastic, well there is actually a product manufactured for the purpose and used by most professional locksmiths. They can be worked without breakage around doorjamb opening most latches that do not incorporate a deadlocking feature or where this feature is no longer working. We believe the increased flexibility of this material will provide a strong but more flexible solution to your latch bypass activities. This product will open virtually any sprung live latch bolt. Fits most tight fitting doors and also works on window latches. Once in your hands you will be opening most problem

situations. Each piece lasts longer and performs better than anything you've ever seen before. We think it's better than shim steel. It's sure not much to look at - but it works very well in tight situations!

Our mini knife decodes and/or opens multi-wheeled combination locks such as those found in many padlocks and briefcases. & It also works on General Motors combination glove box locks. Locks that this tool works on include Sesame, Presto, and Master 175. The Mini-Knife also can be used to slip the ratchet and bypass most handcuff locks including pearless type handcuffs. This is possible on single locked cuffs even if they have been retrofitted with another lock system. The Mini Knife Tool comes with an instruction sheet and includes a snapover leather

case.

\$21.95

Adams Rite Deadbolt ByPass Kit

Adams Rite Deadbolt Tool Set - Push Wires The Peterson Deadbolt bypass kit overcomes problems encountered using other tools. The five varying wire designs allow egress into key ways as narrow as 0.035, while the memory in the Peterson quality wire allows extended use of the tools. Named for the short in and out pushing action required to deflect the wires down off the apposing cylinder, these tools plus a little practice can allow entry into a door with an Adams-Rite type hook or deadbolt in as little as 15 seconds! Peterson's tool handles provides the leverage you need to control and manipulate the tool, while the selection of five push wire tools insures you that you always have the right tool for the job. The selection of wires allows the locksmith to fine tune the configuration of the wires to work the way they the locksmiths need them. Learning this valuable lesson about adjustment allows intimate knowledge of these tools, and insures competency in use, and the skill for continued professional success. IT IS HIGHLY RECOMMENDED THAT THE

LOCKSMITH GAINS PRACTICE AND EXPERIENCE WITH THIS FINE SET OF TOOLS PRIOR TO A SERVICE CALL! While they will faithfully perform as advertised, familiarity and practice on a lock and cylinders assembled out of the door is very important, and will lead you to immense satisfaction...and happy customers!

\$85.95

Adams Rite Replacement Trip Wire

Adams Rite Trip Wire Frozen tumblers? Seized plug? No Problem! Peterson's Adams-Rite Latch Trip Wires go right through the keyway and retract the latch with the greatest of ease. No picking; no wrenching! One turn duplicates the action of the cylinder tailpiece, making the lock's design work for you. Made from the highest grade steel available, these professional grade wires are thin enough to fit through the tightest keyway and strong enough to hold their shape, trip after trip. The tools with black composite handles are what we call our Adams Rite Trip Wire. We use the trip wire to enter the keyway and initiate the withdrawal of the locks latch. This initiation actually unlocks the deadlocking feature of the 4700 series lock. Now, if the wire can continue to rotate, you will pull the latch back opening the door. If however, the door is in a slight of severe bind, the wire will release the deadlocking feature allowing the (Adams Rite) Slim Jim (*not included) to move behind the latch, pushing the latch back and opening the door lock. The Adams Rite Slim Jim is also very useful when there is a latch guard covering the latch.

\$23.95

Adams Rite Slim Jim

[The Adams Rite wire tool](#) will trip the locking latch feature of the Adams Rite locks that have screw-in type cylinders. These locks are commonly found on aluminium storefront doors. The Adams Rite Slim Jim will help to retract the latch if necessary.

\$19.95

Adams Rite DL Latch Kit

Adams Rite DL Latch Kit 1 trip wire plus a Adams Rite Slim Jim. Use the Trip wire to trip the locking latch feature of the adams rite door hardware Will independently open an adams rite, but use of the [Adams Rite Slim Jim](#) extends the wire life.

\$38.95

Government Steel Warded Lock Picks

warded locks.

Government Steel Warded Lock Picks - Riveted Finally a small set of by-pass tools for warded padlocks. They easily fold up when not in use. The post type rivet maintains the smallest profile for storage. You may be wondering exactly what warded locks are...here's a simple explanation. A warded lock is a type of lock that uses a set of obstructions, or wards, to prevent the lock from opening unless the correct key is inserted. The correct key has notches or slots corresponding to the obstructions in the lock, allowing it to rotate freely inside the lock. Large warded locks are still in use today in the UK and Ireland for internal and external doors. Warded locks in the US are most commonly used in inexpensive padlocks, cabinet locks, and other low-security applications, since a well-designed skeleton key can successfully open a wide variety of

Euro Thumb Turn - 4 pc Set

There's a new game in town! Narrow profile European style cylinders with a thumb turn on the back side have become common encounters for many North American locksmiths. From storm doors to manufactured security doors, we see them more each day. The inverted layout of these cylinders can make them hard to pick. So why bother? Peterson's Euro Thumb Turn 4 piece set makes quick work of international negotiations. Patterned after our popular [American Padlock Tool](#), our new design features longer stems that reach through the deepest keyways. Two wire thickness choices give you everything you need to get through any keyway and turn the tailpiece with the greatest of ease.

\$83.95

Euro Master DAMES Bypass Kit

Over the past eleven years we have built a solid reputation for providing to security professionals around the world some of the best quality tools available. Our Euro DAMES Bypass Kit is one we are proud to carry. Designed to give our professional customers in Europe and the UK the very best in bypass tools, our specially designed set is perfect for anyone who deals with Euro style security hardware, at home or abroad. This select kit contains [2 Push Wires](#) for Adams Rite Deadbolts, the [Peterson Knife](#), [Mini Knife](#) and Adams-Rite Latch Tools from our popular DAMES Bypass Kit, plus two [2 1/2" x 5" bypass shims](#) in a quality leather bi-fold case. We also include our four-piece [Euro Thumb Turn Set](#) plus the [American Padlock bypass tool](#), and our new two-piece [Silver Bullets" set](#) that enables you to defeat Master Lock model's 1, 2, 3, 4, 5, and 6. (#'s 5 & 6 require you to have [padlock shims](#)). Choose Peterson tools and put the security world at your fingertips!

\$264.95

Super Mica Bypass Shims - 6 Pack

This pack of 6 pieces of "Super Mica" plastic will open virtually any spring live latchbolt. Once in your hands you will be opening most problem situations. Each piece lasts longer and out-performs anything you've ever seen. We think it's better than shim steel! Package of 6

\$23.95

U-Change Bypass Kit

The U-Change Bypass kit allows the user to quickly remedy rekeying failures, or to open a locked door in an emergency. In addition to the ability to open a locked door in the matter of seconds, the included space and depth keys allow the locksmith to recycle the customer's existing change key sets. All of this without having to send locks that became "locked up" by a failed re-key attempt back to the factory.

\$124.95

Gate Bypass Device

The Gate Bypass Device is designed to bypass most common styles of gates found at many apartment complexes, courtyards, marinas and other low or mid-level security areas. Includes one large tool and one small tool for maximum deployment capabilities. Works in just seconds (see demo video above). Steel construction. Made in USA. [CLICK HERE](#) to watch the video!

Lock Pick Set & Beginners Guide

Complete Lock Pick Set & Beginners Lockpicking Guide We are pleased to offer our best-selling lock pick tool kit, the [PXS-14](#) along with the beginners lockpicking guide [Easy Pickings](#) at the reduced price of \$29.95. We've had many students tell us that they picked their first lock in UNDER an hour simply by following the text and diagrams offered in this booklet! [Easy Pickings](#) is a self teaching manual in the technique of lockpicking. This is THE most simple to understand beginners guide on the market...great for students of the trade! The [PXS-14](#) lockpick tool kit contains everything you need to compromise most pin tumbler locks. Opens deadbolts, doorknob locks, most auto locks, and padlocks. Includes nine picks, a broken key extractor, four tension tools, nine slip on [vinyl sleeves](#), and a FREE top grain snapover leather case.

\$29.95

14 pc Lock Pick Set & Instruction Guide

Complete Guide to Lock Picking & 14 piece Lock Pick Kit Regularly \$55.00! The [Complete Guide to Lock Picking](#) is still one of the most precise, detailed books ever. This illustrated manual has very nearly become the professional locksmith's bible. Locksmiths will find it essential. Hobbyists will find it a joy. Sixty diagrams highlight easy to read text that unlocks the secrets used by professionals. If you're interested in lock picking, this book will be the key to your success! You'll learn how to open all kinds of locks, plus how to thwart tampering with locks (to protect your valuables). Of course, this book is intended for legal entry only, but you'll gain confidence knowing that you can get in through any door without a key! A true classic text in the art of picking locks! The [PXS-14](#) is by far our most popular lock pick set. It contains everything you need to compromise most pin tumbler locks. Opens deadbolts, doorknob locks, most auto locks, and padlocks. Includes nine picks, a broken key extractor, four tension tools, six slip on vinyl sleeves, and a FREE top grain leather case. The combination of these 2 items will have you on your way to learning the art of lockpicking in no time at all! Regularly \$55.00!

\$42.95

7 Pin Tubular Lock Pick & Guide

[KEYS to Understanding Tubular Locks](#) is a self-teaching manual covering three basic tubular locks. The [tubular lock](#), in the form of the regular 7 pin version, has been around for many years; having been invented in the mid 1930's. It was named "tubular" because of its key being a tube with the tumbler cuts cut around it. This type of lock has found great usage on vending machines, coin-op washing machines and dryers as well as coin changers. It is the most common type of tubular lock in use today. If you're new to the trade it would be wise for you to learn about tubular locks by purchasing a [tubular training lock](#) as well as some instructional material that covers the basics of picking a tubular lock. We also carry a dvd "[Lock Picking for the New Millenium](#)" that has a section on picking tubular locks and is chock full of lock picking information.

The (very large) inside storage compartment measures 6 1/2" X 4" X 3".

\$39.95

Stash Stone Diversion Safe

How many times have you wished there was a spare key at your home...just in case? Late last spring I was on vacation with my family, thousands of miles away from home when I received an urgent call from a neighbor. We'd had 2 days of really bad rain and a lot of homes in the neighborhood were getting flooded. "If you have a spare key, I'll go in and check the basement, make sure everything is OK" he said. Unfortunately I didn't have a spare key that was accessible to him. By the time we got home, 5 days later, the basement was destroyed by water damage. We had to hire a professional cleaning company to come in and take care of things. The damage caused by the rain had left a HUGE mess. If only there had been a key hidden outside for emergencies... The Stone Safe is the secret alternative to "under the mat" for your spare key or money. Molded concrete with rugged look and color Special "pop up" display box It's the perfect gift for any homeowner!

\$19.95

CD Diversion Safe

Your CD DIVERSION SAFE® looks exactly like a real stack of CD's because it was remanufactured from original CD jewel cases. All our DIVERSION SAFES™ are designed with security in mind. Conceal your valuables inside the felt-lined hidden compartment secured with a lid. Our CD DIVERSION SAFE® is perfect for dorm rooms, apartments, travel, school, RV's, boats...anywhere you might have cd's! The are the SNEAKIEST Safes a robber will Never Find! Don't be fooled by imitators. We use Genuine USA made products. You will notice the difference...and thieves will never know what they missed!

\$24.95

Candle Diversion Safe - Green

Why do YOU need a Candle Diversion Safe? It's Made of 100% vegetable candle wax with a wick. It has the "look and feel" of a real candle because it IS a real candle. It stands about 5 1/2" tall with a 4" diameter. You can't tell it apart from any other candle - it's indistinguishable. Each Candle Safe is in a shrink wrap package with a four color insert. The Candle safe appears to be un-opened with no signs of tampering Easy to use design allows you to access contents quickly Our Candle safes are weighted to feel the full weight of a normal wax candle. There is a metal container with threaded insert hidden inside candle. Nobody would ever suspect this candle is anything but what it appears to be, an ordinary household candle. The Candle Safe deters criminals and people in search of your valuables Each Candle Safe is available in Red or Green

Broken Key Extractors

Broken Key Extractor Set

Broken Key Extractor Set Most of us have had the unfortunate experience of breaking a key off in a lock. You may have broken a key in your front door lock or your car door lock. Besides being really frustrated you wondered how exactly you'd get the broken key OUT of the lock! If you were lucky you could look into the keyway and see where the broken key was lodged and you knew it shouldn't be all that difficult to get out. At least you probably wouldn't have to call a locksmith. Broken key extractors are THE tools you need for the job. This set will get the broken key out of the lock at less than half the cost it would be if you had to call a locksmith. This set of broken key extractors is simply excellent. Many of our customers agree! Made of hard, thin spring steel with teeth that grip like a pit bull. This extractor kit just what a pro needs to get the job done quickly and efficiently! I just had the opportunity to use the broken key extractors last week when my trunk key broke off in the lock. I had the broken key out of the lock in 10 seconds! These work

great! A MUST-HAVE for your locksmith tool kit. All of our [lock picks](#) and lock picking tools are made in the USA.

\$27.95

3 Piece Extractor Scissor Set

3 Piece EXTRACTOR SCISSOR SET Peterson Extractor Scissors are a one-of-a-kind creation. The task of removing automotive keys has been greatly changed by the aggressive grabbing power of these jawed tools. The handles are dipped in special composite materials making hand slippage nearly impossible. This makes these hard biting, easy handling scissors a must for any locksmith that deals with broken key extraction from double-sided keyways. We have provided three different designs for the varying key profiles that you will encounter in today's marketplace and have wrapped them in a fine snap-over sheepskin case. The ESS-B is a 3 piece set containing one of each of our 3 Peterson extractor pliers: [ICE-1BT: ICE TONGS](#), [SAW-RBT: Right over Left Jaws](#) and [SAW-LPT: Left over Right Jaws](#). Replacement Policy: The manufacturer is so convinced that their scissors are indispensable to the locksmith's extraction arsenal that they make an unusual offer. Should you break, wear out, mangle or destroy one of their scissor extractors Peterson will replace it when you send your worn out scissor extractor to the manufacturer with a \$15.00 check enclosed. They will send the replacement promptly.

\$74.95

Peterson Automotive Extractor Pliers

Peterson Automotive Key Extractors - Double Sided The task of removing removing automotive keys has been greatly changed by the addition of Peterson's (Patent Pending) extraction pliers. Combine this biting edge with our new heavy duty permanently dipped on handle that has a textured finish which provides the all weather grip required for the job and do we have a product you will enjoy. These hard biting, heavy pulling tools are currently available in three configurations which allow for the various key milling profile. Some locksmiths prefer to bend the tips of these pliers so that they are fully apposed, some prefer them "as is". Your choice. These two sided "pliers" or "scissors" are tremendous in terms of the job they do. These patent pending tools will out-grip and outperform any other pliers type product on the market today. Period. And while they were designed for automotive work, we've heard that they also work very well on many single sided key ways. Caution: This tool is designed to help you rotate cocked key tips at the far end of the key way. Due to the slender (fragile) design, you can easily apply more handle pressure than the tips will accept. Use care when using this tool.

\$24.95

Peterson Sidewinder Shim Extractors

Sidewinder Shim Extractors - 3 in tube Named for the sideways movement of the bent finger, this tool is inserted along side the key blade of the broken key. The tapered nose of the 0.004 thick shims lift the lock's pins or wafers up out of the way allowing the bent finger to enter the key cut. With the pins lifted up and the finger woven into the key cut there is nothing left to do but pull the key out! HELPFUL HINT: (Remember that when you are in a situation where the key part is in the back of a keyway, put another key in the lock so that the sidewinder is guided to the broken key part). We've also been told that our original Sidewinder is a valuable tool for high security automotive locks. Works best on pin tumbled cylinders. Set of three in leather case.

\$27.95

3 Piece Peterson Extractor Set - Blue

3 Piece Peterson Extractor Set - Blue Maybe you got a bit too aggressive with your car door or front door lock and broke your key off inside it? Before you call a locksmith, try to extract the broken key yourself. Here's a try-out set of three high quality extractors that will make your life easier. Packaged in a slide together plastic tube. It's sure to include one of our famous Patent Pending Saw Profiles! Peterson Tools has taken the task of broken key extraction very seriously. Because of their designs, the use of better steel and production techniques they have single sided extractors with delightful key gripping power plus the incredible "wet or dry" hands on holding power of the tool handles. They listened to you, the locksmith. Go ahead and order a set. Aren't you tired of using the back door?

\$22.95

6 Piece Extractor Set

Peterson 6 Piece Extractor Set Six high quality extractors that will make life easier for you. Packaged in a Slide together plastic tube at a low price, with the textured grip handles you love! You'll receive 2 of each type extractor pictured.

\$31.95

Two Steel Saw Extractors

Two Steel Saw Tooth Extractors Two spring steel saw toothed extractors with dipped grip handles. Heavy duty! These are terrific for ease of use, gripping power and their ability to reach the top of the broken key blank. They are really excellent locksmith tools! Looking for a set of mini extractors to get into small locks and padlocks? Our [Mini Saw Tooth Extractors](#) are just what you need for the job.

\$29.95

P1 Stainless Saw Tooth Extractor

Stainless Saw Type ExtractorGovernment Stainless Steel Saw-toothed extractor with a dipped grip handle. The folks at Peterson have taken the task of broken key extraction very seriously. Because of their designs, the use of better steel and production techniques they have single sided extractors with excellent key gripping power plus the incredible "wet or dry" hands on holding power of the handles. Due to popular demand, Peterson has just made available their individual saw tooth extractors. Get a [set of two extractors](#) and save BIG!

\$19.95

Broken Drill Bit Extractors

Broken Drill Bit Extractors This innovative tool is three layers thick. Our patent pending saw configuration packed in alternating layers allows significant gripping and pulling power in the case where removal of a broken drill bit is required.

\$44.95

Broken Drill Bit Unwinders

Broken Drill Bit Un-Winders This set of 4 spring steel tools will allow a person to apply reverse force on a wedged broken drill bit. Applying tapping from a LIGHT hammer just might solve the problem! Designed for 3/16 and 1/4 inch drill bits.

\$39.95

Long Drill Bit Extractor

Long Drill Bit Extractor Due to popular demand we have found a way to make longer drill bit extractors! Using our government steel we now offer a tool able to extend your reach to four inches into a drilled hole. (We recommend use of this tool for holes deeper than 1.5 inches only.)

\$54.95

Sidewinder Shim Extractors - Series 2

Sidewinder Extractor Kit Series 2 Peterson has taken a great thing and made it better. The original Sidewinder Shim Extractor provided a powerful method of sliding in along side a broken key and catching the tip of it with the bendable sharp tip as you draw the extractor back out. We have been told that those tools have even been used to remove broken keys from high security automotive ignitions (caution advised). Now there are two additional profiles that target the actual key cuts. Not only do they work well, they solve the problem encountered when the broken key tip is up solid against the back of a closed cylinder and you can't get the original sidewinder's sharp tip past the front of the key. **Price includes 1 SET of 3 Extractors

QUESTION: The Sidewinders are designed VERY thin: when a broken key is pushed back into the keyway, do they have enough strength to lift the cylinders pins out of the way? ANSWER: Simply insert another key into the key way behind the broken piece. This lifts the pins and provides sufficient guidance to allow for immediate success!

\$49.95

Peterson Extractor Kit-2

PETERSON Extractor Kit - 2 Many of you wanted a single kit with all of our extractor tools. We've taken your request seriously and compiled this broken key extractor kit at a true bargain price! Solve your problems with broken keys! By laser cutting these tools from 1095 Carbon Steel you get tools that are tougher, sharper and longer lasting than any our competitors can provide to you. The kit contains our 3-piece double-sided extractor pliers, a set of our three single-sided extractors, our three styles of sidewinder extractors (that slip along the side of a key) plus a free bonus miniature saw blade extractor made just for this set all packaged in our full grain calfskin bi-fold case. We are very pleased with this key extractor kit. It contains fine USA made tools and we

know that you will be very pleased with your purchase.

\$139.95

Broken Key Extractor Set -KE7

Our Mini Broken Key Extractor Set is great for removing broken keys from lock cylinders. The small tips can grip in tighter spaces than conventional key extractors. The extractors in our new Mini Broken Key Extractor Set are excellent for use with both US and internationally made locks.

\$24.95

2 Mini Saw-Tooth Extractors

Peterson's "saw-tooth" broken key extractors are reportedly the best in the world for ease of use, gripping power and the ability to reach the top of the broken key blank. The "Mini" extractor is a smaller version that gets into very small locks and padlocks, but has in the past only been sold in the PEKs (Peterson Extractor Kits). If you're in need of a set of the full size Peterson extractors you'll find them here: [2 Steel saw extractors](#)

\$27.95

2 Pc SawTooth Extractor Set

2 Piece SawTooth Extractor Set - 1 Long and 1 Mini The Peterson "saw-tooth" extractors are reportedly the best in the world for a variety of reasons. We try to be humble, but they are really great. The "Mini" broken key extractor is a smaller version that gets into small locks and most padlocks, but has in the past only been sold in the PEKs (Peterson Extractor Kits). In response to many requests we are making this kit available: Set includes 1 Long Extractor + 1 Mini Extractor.

\$28.95

HOME SECURITY PRODUCTS

Affordable-Security

Affordable Security A Do-It-Yourself Guide to Protecting Your Home, Business and Automobile In this complete, hands-on guide, security expert Steven Hampton, author of [Modern High-Security Locks](#) and [Security Systems Simplified](#), tells you everything you need to know to secure your home, business, car and more - without breaking the bank! Affordable Security offers all the tips and insider advice of the top-notch security seminars at a fraction of the cost, from basic, practical, low-tech security measures that have withstood the test of time to sophisticated commercial perimeter alarm systems and motion detectors. Hampton walks you through a thorough evaluation of your security status, using "security review checklists" that will help you assess your property's vulnerability from every angle, just as a security professional - or a professional burglar - would. Once you've identified the holes in your security, Hampton shows you how to shore it up, from securing doors, windows, yards, sheds and garages using simple but little-known tricks of the trade to creating safe and effective indoor and outdoor lighting solutions to selecting the right type of perimeter alarm system and motion detectors to meet your needs. Finally, he examines the pros and cons of professional versus do-it-yourself alarm installation, including a complete crash course in installing your own system for those so inclined. Steven Hampton became interested in locks and electronics at an early age. At 17 he was making his own lockpicks and was considered a master lockpicker, and at 18 he'd invented the magnetic padlock, which is still on the market today. After a stint in the navy, he studied digital electronics and worked in a variety of technical fields. He is the author of four other books, including our best-selling lock-picking title of all time, [Secrets of Lock Picking](#). Steven Hampton also authored [Improvised Lock Picking](#) and [Advanced Lock Picking Secrets](#). If you're a homeowner, a business owner, a property manager or a landlord that lives off site, or if you have a seasonal vacation property you need to protect - YOU NEED THIS BOOK! 8 1/2 x 11, softcover, photos, illus., 312 pp. Nov, 2004

\$29.95

TV Simulator - Break-In Deterrent

TV SIMULATOR Brand New! What is a "TV Simulator" and why would anyone want such a thing? Well, it's possibly the most effective home break-in deterrent ever invented. This TV simulator, aka "Fake TV" makes would-be burglars think you're home watching TV. It's a fact that 99% of burglars will not attempt to enter a home if they think someone is inside. The new TV Simulator leads even the most experienced burglar to believe that a house is occupied. It accomplishes this by accurately producing the visual effects of a TV when viewed from outside the house. Using super-bright LEDs, it simulates the light and flickering of a real TV while consuming up to 50 times less power. An operating TV leads to an automatic assumption by a potential burglar that there's somebody inside the house. Lights that are connected to timers were a breakthrough burglar deterrent when they came out about 80 years ago, and they still are effective today. But they're so commonplace that they don't fool burglars much. Plus, lights are static; the light

from an operating TV is entirely different- it's dynamic and gives the impression of "alive". A TV that's on clearly says to an aspiring burglar "THIS HOUSE IS OCCUPIED - GO BREAK IN SOMEWHERE ELSE!" When you watch TV, you see images on a screen. But when you look at the light it casts in a room, the light from the screen melds to a uniform glow that changes with the changing images on the TV. The TV Simulator is a result of extensive research and development and is not just a random light source; real TV signals are not random, they are highly characteristic. It utilizes a built-in computer, latest generation super-bright LEDs of various colors, advanced optics and an opalescent diffuser lens to produce light of varying intensity and color that lights up a room just like a real TV does. The light effects of real TV programs- scene changes, camera pans, fades, flicks, swells, on-screen motion, etc. - are all accurately simulated. Just like a real TV, this device fills a room with color changes, both subtle and dramatic, in thousands of possible shades, constantly shifting among more and less dynamic periods, more vivid and more monochromatic, and brighter and darker scenes. The TV Simulator is completely unpredictable, and it never repeats. Its effects viewed from outside the house are essentially indistinguishable from those of an actual TV. Even though the TV Simulator is only a tiny 3"x3"x2" in size and weighs only 2.4 ounces, its advanced technology allows it to produce effects equivalent to a 27" LCD television. But it draws less power than a typical night light! Just plug it into a wall outlet (AC adapter is included), and it's ready to go. In addition to a manual on/off switch, it even has a built-in light sensor option that can turn it on and off automatically according to light levels. Or, since it uses almost no electricity and the LEDs could last for decades, you can just leave it on all the time. The best location to place the TV Simulator is in a dark upstairs room where its light output is visible but the unit itself cannot be seen from outside. For ground floor locations, you should have blinds or drapes that are translucent or are adjusted to allow a little light through. The new TV Simulator is a combination of innovation and technology that can significantly lessen the chances of your home being broken into.

Home Security - Protect your Home from Burglars

Home Security - Protect your Home from Burglars Home Security -How to Select Reliable Locks & Alarms for Your Home, Office or Car by Carl Hammer. This book reveals how burglars actually target and break into buildings and offers proven techniques and tactics for thwarting would-be burglars, from neighborhood vandals to the most sophisticated art thieves and government agents. The advice includes dozens of low-tech, low-cost, low-maintenance measures to safeguard your home or office inside and out. An extensive section on alarms shows you the best way to install a secure system that meets your protection needs, as well as how even the most expensive of these systems can be circumvented if you're not careful.

The last part of the book details reliable home safes, gun storage, vehicle alarms and other special situations, including how you can protect yourself and family members when you are away from home. 5 1/2 x 8 1/2, softcover, illus., 264 pp.

The safe is made from solid steel for added security, has 2 chrome bolts of 3/4" of an inch diameter for extra security, a manual override key, and is easy to program with a changeable 3-8 digit code. Includes 4 bolts to anchor the safe, removable interior shelf, and 4AA batteries to operate the keypad. Shipped to addresses in the continental US only direct from the CA manufacturer via UPS Ground Service. *Extra shipping charges may apply

\$194.95

TV Timer - Burglar Deterrent Device

The TV Timer is a home burglar-deterrent device. This simple device makes would-be burglars think you're at home watching TV. It allows your TV to turn on and off at times of your choosing while you're away from home. Burglars almost never attempt to enter a home if they think it's occupied. Lights connected to timers are so commonplace that they don't fool burglars much anymore. Plus, lights are static, but the light and sound from an operating TV is entirely different - it's dynamic and says to an aspiring burglar: "This house is occupied - go break in somewhere else!" The TV Timer can be easily programmed to provide up to 20 on/off cycles per day, and each day of the week can have its own unique schedule. It also offers a "random" feature, which will automatically turn your TV on and off with no set pattern. It has a manual override button, which allows you to turn the TV on or off normally, without affecting the programming. Installation is simple - just plug the TV Timer

into the outlet and then plug your TV into the TV Timer. It comes with a pre-installed back-up battery to save your programming in case of a power failure and to enable you to program it even when it's not plugged into an outlet. The unit's LCD display always shows the current time. In addition to using this as an anti-burglary device, you can also use it as an alarm clock that lets you wake up to your favorite TV show instead of an alarm or the radio. The TV Timer is 120VAC and can handle any device with loads up to 15 amps/1875 watts. Size: 2" x 2.9".

Carbon Fiber Ventilator

With what appears to be no more than a standard cheap pen in your shirt pocket, you can now have a devastating last-ditch self-defense implement that you can take most anywhere with you. The Ventilator is constructed from ultra-stiff hollow carbon fiber tubing, and has a penetrating point that is protected and concealed by a standard pen cap with a pocket clip. The opposite end is covered with a slightly tacky material to enhance the grip. Carbon fiber is a high-tec material which is completely non-metallic, extremely strong, rigid, and way lighter than fiberglass. It's used in advanced aircraft, boats, sports equipment, etc. where performance is everything and cost is secondary. Length: 6". Weight: 0.2 oz. Color: all black.

I-Core Tools

Small Format I-Core Drill Jig

Small Format I-Core Drill Jig You asked for it - You got it! Bill of Plainview, NY complained about needing an I-CORE drill-jig that was easy to use, and would allow him to NOT DAMAGE DOOR HARDWARE, plus it must ALLOW HIM TO DECODE the lock so he could make a control key for larger jobs. Here it is: The small format I-CORE drill jig that beats them all..... Used as directed and you will shear off the I-CORE locking lug from within the "Best Type" I-CORE, with no damage to door hardware or to the pin-stacks. Made of hardened tool steel. Uses any cut or uncut keyblank as a guide. Designed to work on all brands. User cuts off the top of the key's bow. Precise, fast and efficient! Comes with instructions and our top quality drill bits. Packaged in foam filled blow molded case. Includes storage tube for drill bits, guides, and key blanks. Think about all the door hardware and I-Core locks you can save.

\$199.95

I-Core Tension Tools Set II

I-Core Tension tools Set II IC-GS2, A, B & C I-Core Tension tools plus Slender Gem and Slender Reach tool. This is our second grouping of small format I-core tools. We have added the "C" tension tool to help you with those wide open keyways such as the "E Keyway". The "Slender Reach" tool was added because it is so effective on I-Core locks.

\$54.95

Drill Bit and Accessory Set

Drill Bit and Accessory Set Initially intended as a replacement set for the custom drill bits for the drill jig, this kit also refreshes all of your drill jig accessories. Just like the tube of parts in your drill jig box it includes drill bits, locating pin, depth gauge and instructions. The IC-SDS-2 comes with two spacer plates and updated instructions to assist the locksmith in dealing with drill point variations caused by right handed versus left handed bladed keys. The purchase of a spare set of these tools is highly recommended at point of purchase of a [drill jig](#).

\$19.95

Corbin-Russwin Drill Jig

CORBIN-RUSSWIN REMOVABLE CORE DRILL JIG Do you work with Large Format I-Cores? Peterson has expanded their technology which allows damage free removal of small format interchangeable cores aka I-Cores. We now offer the same advantages for large format cores. You can now remove Corbin/Russwin large format cores without destroying the pin stack. This means the core can be decoded and control keys cut for the entire system. Remove damaged cores with ease and precision without doing any damage to the lock! Brilliant!

\$219.95

The LAB Interchangeable Core Annex

LAB Annex Cap Block Kit w/capping, Slideout Code Book, Pin Stack Evictor The LAB Interchangeable Core Annex offers the simplest method for the loading and unloading of interchangeable core pins, springs and caps, using only one instrument for both functions. A second time saving feature is a Slideout Code Book below the area where the core is slid in place. This allows the user to unload the core pins, springs and caps into a confined area without spilling parts in or around the work area. The Slideout Code Book is also used to decode the Core to determine the bitting of the control key when it is not available and also determine the top master key bitting. Includes: Annex with Slideout Code Book Capping Instrument Pin-Stack Evictor

Practice Locks, Cut-Away Locks, Training Locks for Locksmith Students

Seven Pin Tubular Practice Lock

How to pick a tubular lock? You've got to be kidding! It's possible by taking it one step at a time. Our tubular practice lock is the first step to learning how to master tubular locks - the type of lock found in vending machines, pinball games and coin-op washers and dryers. The tubular lock (aka Ace lock) is basically a pin tumbler lock that has its tumblers arranged in a circle. Some of our locksmith friends have difficulty with tubulars, and we tell them the same thing we tell you. It's just like playing a musical instrument, start with simple and work into more complex! Our Seven Pin Tubular Practice Lock offers you a quality lock that just isn't as precise as, say, an Ace-II. Use it as a learning tool and when you have mastered this, you're well on your way to mastering tubular locks. We also carry a great little instruction manual [Keys to Understanding Tubular Locks](#), a self-teaching manual which covers 3 basic tubular locks. All of our [lock picks](#) and lock picking tools are made in the USA

\$19.95

Visible Cutaway Practice Lock

Visible Pin Tumbler Lock Cylinder Cut-away Clear Practice Lock - This specialized lock cylinder was designed for beginning locksmiths in developing critical lock picking skills. This clear pin-tumbler lock is an excellent learning tool. By watching the movement of the pins as you practice your lock picking skills, you will gain a better understanding of how and why a lock can be compromised...and improve your own performance levels. It has a cut-away section that lets you see inside-how the tumblers and springs within the lock react when a key is inserted, and when lock picks are used to compromise the lock. Used worldwide in home, office, hotel, auto locks and padlocks, the mechanism has become known generically as the "Yale" Lock. The Visible Cutaway Clear Practice Lock is a great training tool for the student locksmith and all others seeking to learn the trade. This is an educational tool that is very difficult to find. Not found in any store! The Visible Cutaway practice lock comes with 2 keys: 1 key is the proper "fit" and 1 key that

is incorrect for this lock (you'll get to see what happens inside the lock when you try to open the lock with the wrong key). All of our [lock picks](#) and lock picking tools are made in the USA.

\$34.95

Visible Combination Padlock

Cutaway Clear Combination Padlock Practice Lock It's back in stock and ours exclusively! For nearly a year we've been trying to find a company to produce these locks. Our original fabricator was no longer able to produce them. Locksmith schools, military training officers as well as police and first responders have been calling our office desperate to get hold of this lock. We are very pleased to be able to offer the Visible Combination Lock once again! Learn Locks has done a really great job and we are so pleased to make them available to you. View exactly how a combination padlock works. The back of our exclusively designed lock has been removed and the inside plate replaced with a clear cover. Our practice lock is a modified 1500 series Master combination padlock. This type of lock is commonly used on lockers, storage units, tool cabinets and sheds. It has 3 digit dialing and the dial automatically locks under shackle tension. Our cutaway standard combination padlock allows you to see how the lock actually functions - and helps you to understand how it can be

compromised. The same principles apply to all combination locks, including safe locks. The visible cutaway combination lock makes learning to pick a combination lock easy to understand. You may also be interested in purchasing the book, [Opening Combination Padlocks](#) to gain a better understanding of how combination locks work. A highly recommended locksmith training tool.

Affordable and effective, they are an excellent choice to supplement existing practice kits or in addition to cut-away cylinders.

\$27.95

2 Pin Practice Lock Cylinder

2 Pin Standard Practice Lock Cylinder Our standard pin tumbler cylinders are available pinned with your choice of 2, 3 or 5 tumblers for various degrees of difficulty. Start out with the 2 pin cylinder and move up to the [3](#) and [5 pin cylinders](#) as your lock picking skill increases. Affordable and effective, they are an excellent choice to supplement existing practice kits or in addition to cut-away cylinders. Our 2 pin cylinder is the easiest cylinder to defeat. It is the perfect training cylinder to start with if you're just beginning to learn the art of lock picking, a terrific training aid for locksmith students. After you've manipulated this cylinder it's time to move on to the 3 pin cylinder, the 5 pin cylinder and finally, the [6 pin cylinder](#) - the toughest and most challenging standard cylinder of all. After you've defeated standard practice locks you may want to try a our pick-resistant cylinders with [spool pins](#).

\$27.95

3 Pinned Cutaway Practice Lock

 Pinned with 3 tumblers, our cutaway pin tumbler practice locks are available pinned with your choice of 3 or [5 tumblers](#) for both righties and lefties for various degrees of difficulty. Start out with the 2 or 3 pin standard cylinder and move up to the 3 and 5 pin cutaway cylinders designed with Schlage or Kwikset/Weiser keyways as your lock picking skill increases. We've recently added cutaway practice cylinders with spool driver pins to further challenge the lock picking skills of students of the trade. Affordable and effective, they are an excellent choice to supplement existing practice kits or in addition to cut-away cylinders. The cut-away cylinders are excellent training tools as they allow the student to see inside the lock so he can better understand what makes it work. *This 3 pinned CUTAWAY practice cylinder is available only in the right-handed version.

\$41.95

5 Pin Kwikset Practice Lock - Spool Pins

5 Pinned Standard Practice Cylinder - Kwikset/Weiser Keyway With Pick Resistant Spool Pins Weiser / Kwikset Keyways By popular demand, these standard practice cylinders are now available with pick resistant spool pins to offer a higher level of picking challenge. Recently upgraded Schlage, Yale, and Kwikset deadbolts, sold at major hardware stores, are now using these spool drivers to create a higher level of security. Locksmiths will be encountering pick resistant locks more and more frequently as time passes.

\$37.95

5 Pinned Schlage Practice Lock

5 Pinned Schlage Standard Practice Lock With Pick Resistant Spool Pins Schlage Keyway By popular demand, these standard practice cylinders are now available with pick resistant spool pins to offer a higher level of picking challenge. Recently upgraded Schlage, Yale, and Kwikset deadbolts, sold at major hardware stores, are now using these spool drivers to create a higher level of security. Locksmiths will be encountering pick resistant locks more and more frequently as time passes.**Please note - This is a standard practice cylinder, NOT a cutaway.

Cutaway Keyed Padlock

Cutaway Keyed Padlock Description of our Cutaway Keyed Padlock: FINALLY back in stock!!! Improve your lock picking skills! This tumbler type cutaway practice lock has five-pins and is designed for those developing critical lock picking skills. The lock has a section cutaway that lets you see all of the pin stacks. In addition to this, cuts have been made to show actions of lock plug, locking cam "locking dog", and shackle. The open view of all of the pin stacks makes for an excellent learning tool. By watching the movement of the pins, as you practice your lock picking skills, you will gain a better understanding of how and why a lock can be compromised. Use it to improve your lock picking performance levels and understanding of keyed padlocks. See how the pins and springs within the lock react when a key is inserted, and when lock picks are used to compromise the lock. Padlocks are an affordable, portable way to secure private or valuable items. They are handy and simple to use and provide portable security for movable objects-bicycles, motorcycles, boats

and the like. They are also used in locations such as storage sheds, gates, etc. where traditional locksets are not practical. This cutaway practice lock is a great training tool for the student locksmith, security and law enforcement professionals. Property managers, building superintendents, health club managers and storage facility owners and managers will also find this an invaluable training tool. The cutaway keyed padlock will save professionals a LOT of time and money.

Maxcut Mortise Cylinder - Right Handed

MAXCUT Mortise Cylinder - Schlage Keyway Right-Handed Cut-away lock (cutaway on left side for right-handed users) machined from a mortise cylinder for use in developing critical lock picking skills. In addition to offering a clear view of the pin stacks a portion of the lock plug has also been machined away. Features of the MAXCUT Mortise Cylinder Cut-Away Lock: This cutaway is machined from a mortise cylinder lock and is available with a Schlage type keyway. It is a specialized lock cylinder designed for training locksmiths and is used in developing critical lock picking skills. The open view of all five of the pin stacks makes this an excellent learning tool. By watching the movement of the pins, as you practice your lock picking skills, you will gain a better understanding of how and why a lock can be compromised. Use it to improve your own performance levels. A portion of the lock plug has also been machined away allowing a clear view of the bottom pins. Watch how the pins and springs within the lock interact when a key is inserted, and when

lock picks are used to compromise the lock. The MaxCut can be used with the Learn Locks Lock Stand. This type of lock is commonly found on aluminum and glass door commercial storefronts. You'll have to agree this is an awesome design and you will want to prominently display this unique Cutaway Lock. The lock has additional machining to expose even more than the standard Cutaway Mortise Cylinder. Since much of the lock plug has been machined away stop-pins are used to prevent clockwise rotation. Without this feature the pins would fall out. Not only is it an incredibly effective training tool for locksmith students and professionals alike, but also a truly stunning conversation piece!

\$59.95

Maxcut Mortise Cylinder - Left Handed

MAXCUT Mortise Cylinder - Schlage Keyway Left-Handed Cut-away lock (cutaway on right side for left-handed users) machined from a mortise cylinder for use in developing critical lock picking skills. Cutaway 7 pin Tubular Lock

Cut-away Lock for Locksmith Training This practice lock is an excellent locksmith training aid. Made from a standard seven pin 5/8" round key cam lock, much of the housing has been cut away. The unique design enables you to see how the tubular lock works. Generous machining of the lock allows for a clear view of the cylinder and pins without having to look through plastic like some other types of practice locks. Common uses for tubular locks are bicycle locks, computer locks, and a variety of coin-operated devices such as vending machines and coin-operated washing machines. The tubular lock has other names such as an "Ace lock", "axial pin tumbler lock" or "radial lock". It is a variety of pin tumbler lock in which the pins are arranged in a circular pattern, and the corresponding key is tubular or cylindrical in shape.

8 pin Tubular Practice Lock

Eight Pin Tubular Practice Lock - TULK-8 Pick a tubular lock? You've got to be kidding! How? Well, take it one step at a time. The tubular lock (aka Ace lock) is basically a pin tumbler lock that has its tumblers arranged in a circle. Some of our locksmith friends have difficulty with tubulars, and we tell them the same thing we tell you. It's just like playing a musical instrument, start with simple and work into more complex! Our Eight Pin Tubular Practice Lock offers you a quality lock that just isn't as precise as, say, an Ace-II. Use it as a learning tool and when you have mastered this, you're well on your way to mastering tubular locks. We also carry a great little DVD " [Keys to Understanding Tubular Locks](#), a self-teaching manual which covers 3 basic tubular locks. Our practice locks are engineered to lower tolerances than most tubulars. Highly recommended for those who wish to master the art of picking tubular locks. Eight pins.

Kwikset Cutaway Mortise Cylinder - LH

Kwikset Mortise Cylinder Style Lock - LEFT Handed Mortise cylinder lock cut away on both sides Available with Schlage or Kwikset type keyway Features of this Quality Practice Lock You have a choice of Schlage or Kwikset type keyway, and it is available in right and left handed models This five pin stack cut away is a specialized lock cylinder designed for training locksmiths and is used in developing critical lock picking skills. The open view of all of the pin stacks makes this an excellent learning tool. By watching the movement of the pins as you practice your lock picking skills, you will gain a better understanding of how and why a lock can be compromised. Use it to improve your own performance levels. The lock has a section cut-away that lets you see all pin stacks. The lock even includes a slot allowing a clear top view of the pins located in the lock plug. This new version has even more metal removed to show the shear line. [Virtual interactive object movie of the Mortise Cylinder Cutaway Lock](#) See how the pins and springs within the lock

react when a key is inserted, and when lock picks are used to compromise the lock. The cutaway is machined from a mortise cylinder lock and is available with a Schlage or Kwikset type keyway. The mortise cylinder lock is commonly used on many types of doors including heavy entrance doors, aluminum and glass door commercial storefronts, to apartment buildings and residential doors. The mortise cylinder lock can be combined using commonly available pin kits and key cutting equipment. This cutaway lock is a great training tool for the student locksmith and all others learning pick locks. Specifications Type: mortise cylinder Design: conventional mechanical pin tumbler cylinder lock Number of Pin Stacks: five Rekeyable: yes Brand: generic Material: aluminum Dimensions: 1 in dia.

5 Pinned Schlage Cutaway - RH

 5 Pinned Schlage Cutaway Practice Lock - Right handed Schlage locks are commonly used on residential doors. Learning how to pick a Schlage lock will come in very handy if you're studying to become a locksmith. Our cutaway practice locks are the perfect introduction to lock picking for any beginner, as they clearly demonstrate what goes on INSIDE the lock as picking practice ensues. They are the easy way to learn lock picking, and are recommended for beginners. Practice locks represent a much smarter method than buying complete lock sets or trying to locate used locks for practice. Beginners should start off with one Cut Away Practice Lock, possibly 5-pinned, so you can become familiar with how the lock's tumblers react to lock picking attempts.

\$47.95

5 Pin Radial Double-Cut Practice Lock

5 Pinned Radial DOUBLE CUT Practice Lock Not right OR left handed, as both sides of the lock have been cut away. This is a new variation on the Radial-Cut Cut-Away lock. It has been precisely milled on BOTH sides, giving unprecedented viewing of the insides of the cylinder. It is a fully functional practice lock, can be picked to either side, and is completely rekeyable using standard repinning tools and pin tumblers. PLEASE BE AWARE that this is somewhat delicate as compared to our regular Cut-Away designs, simply because so much material has been removed. Careful handling is all that is needed . . . electric and manual pick guns are NOT recommended (they could cause damage). Supplied with one working key and one incorrect key. RECOMMENDATION: We advise the use of a PRACTICE LOCK STAND such as the [TRI-PIK II](#) or our [Universal Practice Lock Holding Fixture](#) to make your lock picking practice sessions much easier. We have a wide variety of these stands in all price ranges.

\$84.95

5 Pinned Practice Lock - Schlage

5 Pinned Standard Schlage Practice Cylinder The Locksmith and the hobbyist both need to spend a lot of time practicing the skill of lock picking in order to achieve and maintain a high level of expertise. The practice lock cylinder is designed for this purpose. We carry a wide variety of practice locks, including cut-away models. More advanced technicians who employ practice lock picking to improve existing skills will do best with standard practice locks. Practice locks represent a much smarter method than buying complete lock sets or trying to locate used locks for practice. Those with some experience should order Standard Practice Locks, perhaps two or three with various pinnings.

FULLCUT Mortise Cylinder Lock

Cutaway FullCut Kwikset Mortise Cylinder Lock Features of this Cutaway Mortise Cylinder Lock: Kwikset type keyway For Right-Handed Students Partial Rotation of the Lock Plug The Cutaway FullCut Mortise Cylinder Lock is ideal for instructors demonstrating the functions of the pin stacks in classrooms. Use with the key or a lock pick to demonstrate correct shear line alignment. It is the perfect tool for producing training videos and manuals eliminating the use of expensive and time consuming animations and graphics. This lock is similar to the Cutaway Mortise Cylinder Lock but has gone a step further. The cut has been extended deep into the lock plug. This allows for viewing all of the pin stacks including the bottom pins that are located in the lock plug. Watch how the pins and springs, within the lock, interact when a key is inserted and when lock picks are used to compromise the lock. The mortise cylinder lock is commonly used on many types of doors including heavy entrance doors, aluminum and glass door commercial storefronts, to apartment buildings and residential doors. You'll have to agree this is an awesome design and you will want to prominently display this unique Cutaway Lock. The lock has additional machining to expose even more than the standard Cutaway Mortise Cylinder. Since much of the lock plug has been machined away stop-pins are used to prevent clockwise rotation. Without this feature the top pins would fall out. Note: Inverting the lock will result in bottom pins falling out, when in unlocked position. Specifications: Type: mortise cylinder Design: conventional mechanical pin tumbler cylinder lock Number of Pin Stacks: five Rekeyable: yes Brand: generic Material: aluminum Dimensions: 1 inch [25.4 mm] dia.

Cutaway Deadbolt Cylinder - training

Cutaway ProCut Key-in-Deadbolt Cylinder Lock Cutaway key-in-deadbolt cylinder that has a portion of one side of the pin stack machined away. In addition to the pin stack, the lock housing is also cutaway exposing the lock plug. ProCut Style Cutaway Key-in-Deadbolt cylinder lock features This cutaway lock is made from a key-in-deadbolt cylinder and is designed for both practice and demonstration. ProCut's purpose is primarily as a tool to be used in training to pick locks. It is a functioning key-in-deadbolt cylinder with some of the lock housing machined away. The ProCut cutaway lock has a portion of one side of the pin stack machined away. The cut extends partially into the upper cylinders providing a good view of the top driver pins and springs. In addition to the pin stack, the lock housing is also cutaway exposing the lock plug. Shear line principle can be observed by rotating the lock plug. Choice of which side is cutaway include right handed or left handed. Options also include choice of keyway. This cutaway lock is made from a conventional mechanical pin tumbler cylinder lock and is in common usage. It has six drilled pin stacks five of which are pinned with conventional pins. The ProCut cutaway key-in-deadbolt cylinder can be rekeyed or repinned using a standard plug follower. When ordered with the FastPin option the task of rekeying and repinning are made easier. Note: Do not use kinetic opening techniques with cutaway locks e.g. bumping, lockpick gun or vibrating lockpick since part of their structure has been removed and damage could occur. Pick Guns - book

Pick Guns - Lock Picking for Spies, Cops, and Locksmiths By John Minnery The ability to open locks without using keys is one of the few awe-inspiring skills left in a world where mechanical marvels and electronic wonders are boringly commonplace. Yet it is a skill that is no longer monopolized by locksmiths, who jealously guard their secrets. The book "Pick Guns" gives an overview of the mechanical principles of lock pick guns. Many prefer to use a lock pick gun vs. a standard set of lock picks. Traditional lockpick tools take time, patience and some skill to use properly. [Lock pick guns](#) are generally mastered very quickly and are preferred for pin tumbler locks over lock picks for their ease-of-use and speed. For academic study only. 5 1/2 x 8 1/2, softcover, photos, illus., 128 pp. Interested in purchasing a lock pick gun? We've got one right [here!](#) All of our [lock picks](#) and lock picking tools are made in the USA.

Lock Picking Basics

Lock Picking Basics by Mark McCloud This book makes learning the art of lock picking fun and easy. You don't have to waste your time guessing how it's done, reading some amateur's theories, or trying to learn from the movies. (They always get it wrong). Now, you can get accurate information that the professionals use. Their secrets have finally been revealed. Now, you can understand the technology that has kept thieves at bay for centuries. Even in the time of antiquity, within the halls of the great pyramids, tomb raiders found their untold riches behind surprisingly sophisticated locks. Today's locks inherit these same principle designs. We give you the keys to their secrets. How many times have you or someone you know been locked out? Now, you don't have to be helpless in that situation while you wait and rely on a locksmith who is going to charge you a lot of money to do what you can do yourself. You don't have to be a victim of your circumstances. The next time someone forgets their keys, you can be confident with the knowledge that you

can help yourself and your friends and save a lot of money in the process. Lock Picking Basics is perfect for existing locksmiths, auto repossessors, and car dealers. Whether you are interested in becoming a locksmith, need to know how to bypass security locks for your job in law enforcement or emergency services, interested in lock picking as a hobby, just want to be prepared in an emergency, or for whatever reason, Lock Picking Basics will get you started off right! When you've finished learning the basics and want to get more advanced lock picking instruction follow up with [The Visual Guide to Lock Picking](#) and the [companion DVD](#). 64 pages, softcover.

Visual Guide Lock Picking-Español

Nuestros amigos de publicaciones corrientes, autores de la popular "Guía visual de las Lock Picking" se han traducido el libro más popular e informativo sobre el tema en español! No podríamos estar más contentos y emocionados como nosotros tienen muchos miles de clientes que hablan español. Este libro es la guía definitiva para aprender el arte de falsear cerraduras. La tercera edición actualiza todas las ilustraciones con nuevos gráficos computarizados. Más de 100 páginas nuevas abarcan las cerraduras, de discos, tubulares y de palanca, y los candados de combinación. Esta guía aclamada revela los secretos del oficio y hace que el aprendizaje del arte de falsear sea ameno y sencillo. No es necesario perder tiempo adivinando cómo se hace, leyendo teorías amateurs o tratando de aprender en las películas (que siempre lo hacen mal). Ahora puede obtener la información precisa que usan los profesionales para ponerse en ventaja. Lo que realmente hace destacar este libro es la gran variedad de ilustraciones que facilitan la comprensión. El enfoque visual hace que se vea con facilidad cómo trabajan las cerraduras. Cada tipo se muestra en detalle, exponiendo todas las piezas móviles. Se brindan instrucciones paso a paso para falsear cada tipo de cerradura. En un proceso guiado, se le presentarán las herramientas necesarias y se le explicará las diferentes técnicas que lo lleven a la satisfacción de escuchar el clic la cerradura cuando se abre. Este libro es una guía autorizada sobre la apertura de cerraduras. Si ya sabe cómo falsear algunas cerraduras, este libro incluye consejos y técnicas que puede utilizar; y ejercicios para perfeccionar su destreza. Abarca casi todos los tipos de cerraduras modernas, desde las cerraduras simples hasta las de alta seguridad, por lo que es el compañero perfecto para el cerrajero.

Visual Guide to Lock Picking - Instructional DVD With 3D Animation! The Visual Guide to Lock Picking is THE DVD to own if you want to learn the art of picking locks without having to sit in a classroom! This DVD explains several types of locks and lock picking techniques. Modern computer 3D graphics and animations allow for cutaway views that were never before possible. This DVD not only makes lock picking possible, but clearly shows you how, so that you can get started today! It explains what all of the tools are and for what they are used. What really sets this DVD far above the competition, however, is the vast assortment of illustrations that make everything easy to understand. This really is a "visual guide" with graphics and animations that will instantly show you how locks work, and exactly what to do to bypass them. You can start immediately! To download the trailer click here for mov or avi You will learn locksmiths closely guarded secrets from this DVD...tips and techniques that are extremely valuable. The Visual Guide to Lock Picking

introduces warded locks, pin tumblers, wafer tumblers, master locks, even some high security pins. It dissects the locks, showing every moving part, making it easy to see how they work. Step-by-step instructions are given for picking each type of lock. You will be lead through the entire process, introducing the necessary tools and covering several techniques leading you to that satisfying click as the lock springs open. DVD approximately 1 hour running time. If you prefer to read the [Visual Guide to Lock Picking](#) rather than viewing the dvd you'll find it [here](#).

Master Pinning Locksmith Course -CD

MASTER PINNING - The Principles Revealed Finally! A fully illustrated, easy to understand eBook in .PDF format teaches you the basics of Master Pinning. Our Master Pinning course is a highly informative, richly illustrated eBook on CD-ROM in the popular .PDF format that starts at the basics and takes the student through progressively more involved sections, covering all that is required to learn how to set up and design Master Keyed lock systems. It also discusses the tools and equipment needed to set up a rekeying/master keying station and gives guidance as to where to purchase what you'll need to get started. Both photos and graphics are used to illustrate the process, one step at a time. This kind of information is exceedingly difficult to find, and up to NOW has required purchasing very costly printed manuals, which are almost impossible to acquire due to constraints placed on security information. Understanding how to master key locks is a basic requirement if one is serious about learning the craft of locksmithing . . . and is equally important for building maintenance personnel who are charged with lock and key responsibilities. Sections include designing systems, determining proper pinning, and there are even exercises for the student (with the answers). Works with PC or MAC Many illustrations and graphics help to acquaint the student locksmith or professional needing a brush-up on the basic principles and the accepted procedures in designing master keyed systems of from 2 to 4 or more levels. Not intended to be a comprehensive master keying course.

Professional Lock Picking - DVD

Professional Lock Picking: Basic and Advanced Techniques (DVD) This DVD is arguably the most successful DVD ever produced to teach basic and advanced lock picking. The producer of this DVD has trained thousands of locksmith apprentices, not to mention state and federal law enforcement agents, how to pick locks using basic and advanced lock opening techniques. Most students are able to open a majority locks effectively in just a few hours, and with regular practice can become masters at lock picking in a very short time. If you'd like to develop and practice your own lock picking skills along with the DVD we'd recommend purchasing a complete (but inexpensive) lock pick set like the [MPXS-14](#) which works well with standard USA-made locks or the [C1510 lock pick set](#) which works well with European and Japanese locks as well as USA manufactured locks. You'll also learn how to use [lock pick guns](#) and [vibrating picks](#) (aka electric lock picks) when you encounter a difficult lock that is resistant to picking with standard lock

picks. These tools are amazingly effective once you understand the tricks and techniques that make them most effective. This DVD will give you that knowledge. Many of the techniques and tricks revealed on the DVD are performed with cutaway locks so you can see exactly how the techniques work inside a lock. This will give you an instant understanding of how the methods work. This type of training is infinitely better than learning to pick locks by just "following the motions" that are taught in many other training materials. Why waste time and money learning the hard way when you can have a true expert show you the lock picking techniques and closely-guarded secrets of master locksmiths? Let the Basic and Advanced Lock Picking Techniques DVD prevent countless hours of frustration and boredom trying to learn the art and science of lock picking the hard way. Learning to pick locks is fun and easy with this fascinating, information-packed DVD. This is the BEST professional lock picking training DVD we've ever come across. Did you know that Professional Lock Picking: Basic and Advanced Techniques was produced by the same expert who's trained thousands of law enforcement & military personnel as well as thousands of locksmithing students over the past 20 years? He's also authored and developed the [The Tactical Lock Opening Course](#) as well as the hugely successful [Lockout Specialist Locksmith Course](#). Please note: Our DVD's should be played on current DVD players or they may not play correctly. Sometimes customers have DVD players that are too antiquated to play many new DVDs. Before contacting our sales department about a "defective" DVD please try playing it in your computer instead of your home DVD player if it is an older model. You may find that the DVD works fine and that the problem is being caused because you own one of the older players. If this is the problem replacing the DVD won't have any effect.

Air Fighter Pro-Auto Opening Kit

seen in photo.

\$69.95

Air Fighter Pro - Auto Opening Kit The Auto Wedge Kit (aka "Air Fighter Auto Opening Kit") is the ideal car opening tool kit for locksmiths, law enforcement, firefighters and other emergency/rescue personnel, as well as repo people, wrecker drivers, auto repair shops and car dealerships. You should have this tool kit on hand to help open car doors more efficiently. The pump wedge (6 1/4in.L x 5 1/2in.H x 0.08in. thick) slips easily between the car door and weather stripping, and inflates to 2 3/4 in. thick by squeezing the bulb. The inflated pump wedge separates the car door from the frame enough for the car-unlocking tool rods to be used (INCLUDED!). A release valve deflates the wedge. The [pump wedge](#) can also be used to hold windows and doors in place while leveling for easier installation. Wedge made of heavy-duty vinyl and is locksmith quality. The pump wedge will not scratch glass or paint. Air Fighter kit includes 2 long reach tools and a spring grabber. Regular sized version. Manipulation rods included as

58" LONG ARM Auto Opening Tool Kit

58" LONG ARM TOOL KIT - Auto Opening Kit This kit includes the [AO42-LA 58" Long Arm Tool](#), the [AO65 Inflatable Pump Wedge](#), the [AO67 Mini Rubber Wedge](#) and the AO42SL Plastic Protection Sleeve. The AO42-LA Long Arm Tool is approximately 58" in length and is designed to enter into the passenger compartment of vehicle through the door using wedges and/or door jack type tools. 4 piece set. \$10.00 oversize item charge is automatically added to standard shipping charge. This tool kit is NOT shipped outside of the USA nor to Alaska or Hawaii due to the fact that it is nearly 6 ft in length. It costs much more to ship than most other items because of it's unusual size and shape.

Ultra Combo - Deluxe Auto Lockout Kit

Ultra Combo Kit - Deluxe Auto Lockout Kit The Combo Kit is a mix of the most popular traditional car opening tools snugly fit into the lid of the case as well as our assortment of 5 "Quick Change" Long Reach Tools custom fit into the bottom of the specialty molded case. The selection of traditional tools includes our most popular stainless steel round edged Slim Jim, and a variety of tools featuring Xacto-Grip technology. Simply choose the "Tool Body" that will best suit the vehicle and opening method that you are performing. Screw the chosen "Tool Body" directly into the "Handle" which creates a seamless design without the use of a bulky coupler. In some instances, if you need a little extra tool length, screw the 18" "Extension" between the "Handle" and the "Tool Body" to allow for a 67" reach. The specialty formulated glow in the dark tip of the 1/4" tools body comes in handy on some openings at night. Tools included in the AKUC Ultra Combo Kit: [AO25](#), [AO35](#), [AO38](#), [AO39](#), [AO42-QC1](#), [AO42-QC2](#), [AO42-M1](#), [AO42-M2](#), [AO42-M3](#),

[AO42SL](#), [AO65-A1](#). Book: [AO95](#). Wedge: [AO65](#). Set of [AO64](#), and 2 [AO67](#) Lifetime Warranty against manufacturer's defect About the AKUC Ultra Combo Kit There are a wide range of vehicles which require a range of opening tools and methods. The [QUICK CHANGE Long Reach Tool](#) has many unique characteristics; making it one of the most versatile car opening tools available. The patented pending features on this new tool provide the locksmith with a variety of choices that are not available with any other tool or kit. The [QUICK CHANGE Long Reach Tool](#) is inserted between the window or door and the weather stripping. The end of the tool is then guided into the passenger compartment of the vehicle. Depending on the vehicle, either depress the unlock button, pull the handle, lift the lock button or retrieve the keys as if you were sitting inside of the vehicle. The Ultra Combo Kit is housed in a rugged and durable patent pending custom molded case, measuring 29 X 9 X 4 1/2. Not just for easy storage in a truck or car but also providing a custom place for each tool. The custom molded case is complete with a handle so locksmiths can take the Ultra Combo Kit almost anywhere their services are needed. The heavy duty custom molded case eliminates searching for lost tools and prevents tools from tangling together. Pro Lok's patent pending design does not require a coupler. A coupler is commonly used to screw 2 pieces of tool together to make one longer tool. A coupler needs to be made of a considerably thicker diameter than the material making up the two tool pieces. The Pro-Lok design does not use couplers. One half of the tool screws directly into the other half (without a coupler). This feature allows for a smooth and smaller diameter tool. This is a very important feature because this reduces the amount of space the locksmith has to wedge the door or window to allow room for the coupler. The patent pending tool is unlike any other; giving the locksmith a choice of tool. Different vehicles and opening methods may require, or at the very least are easier to perform with, the right shape or designed The 1/4" diameter provides firm and stiff tool control and attaches to your choice of 3 different and one longer reaching. Simply choose the that will best suit the vehicle and opening method and screw it directly into the handle. The choice of tool bodies include: 1/4" rigid diameter body, 1/8" thin diameter hook bendable body, and 1/8" thin diameter bendable body. Some vehicles require extra length from a [long reach tool](#). Reaching the locking button, the console, or across the car is impossible with some tools. The QUICK CHANGE Long Reach Tool provides the best of both worlds. The shorter long reach tool (just the handle and body) is used for most openings; providing better control and use of the tool and can reach up to 49". When faced with a vehicle that requires a little more length, simply screw the 18" extension between the handle and the body to make the QUICK CHANGE Long Reach Tool 67" long. The rubber protective tip on PRO-LOK's 1/4" tool body is made of a specialty formulated glow in the dark material. This feature comes in handy on some openings at night. The specialty formulated makes it easy to see the tip of the tool guiding it inside the vehicle while pushing or pulling the desired unlocking feature. The Kit features the 5 piece QUICK CHANGE Long Reach Tool, a variety of 5 specialized wedges, including the [Pump Wedge](#), and Protective Tool Sleeve, which are housed in the base of the custom molded case. Also included are commonly used tools to properly unlock vehicles that consist of horizontal linkage, vertical linkage, as well as new cable locking systems, which are housed in the lid of the custom molded case. Also included in the lid are the [AO65-A1 Wedge Starter and Window Protector](#) and the [AO95 Tool Usage and Instruction Booklet](#). Many of the auto entry tools included in the Ultra Combo Kit feature Pro-Loks patented Xacto-Grip technology, which assists in more successful vehicle openings. These patented tools are knurled and flattened to provide a stronger, yet thinner tool with a knurled edge to "bite" rod linkage."With the tools that we have put into the Ultra Combo Kit, you can unlock most vehicles on the market" Shipping weight: 8lb, 2oz - Dimensions: 28.75 x 9.5 x 5

\$249.95

Ultra Long Reach Auto Lockout Kit

Mortice Cylinder Drill jig - 1 inch

MORTICE CYLINDER DRILL JIG OPEN A/R TYPE DEADBOLTS AND LATCHES (including those protected by high security cylinders). NEED TO OPEN AN ADAMS-RITE SWING-BOLT THAT HAS A HIGH SECURITY LOCK INSTALLED IN IT? This drill jig serves several functions: (1) you can drill the set screw out of almost any mortise lock allowing an easy removal of the cylinder with out damaging the door or lock. (2) In commercial doors using A/R type swing bolts drill a small hole then use our "POKE TOOL" to release the swing arm. It is simple to cover the hole with our washers. (3) In commercial doors using A/R type latches, use the second hole to drill a differing hole in the door for those lacks, and again use our poke tool to release the double locking feature of the lock, then slip the latch. This drill jig works on doors with or without protective escutcheons. And you know the set screw is not protected on even the best high security locks! COMES WITH 1 PUSH TOOL, 4 ASSORTED WASHERS AND A #12 DRILL HSS

Lock Pick Sets - Over 50 High Quality Sets to Choose From!

5 pc Lock Pick Set - how-to booklet

PXS-05L Beginners Lock Pick Set & Guide This little lockpicking guide & lock pick set combination was designed for police officers and is capable of opening virtually all pin tumbler locks. The instructional guide "[EASY PICKINGS](#)" normally sells for \$9.95 alone! You'll receive the Easy Pickings Lockpicking Guide as well as the PXS-05L five piece lock pick set. All four basic lock pick designs are included: hook, ball diamond, and rake, plus a tension tool, neatly housed in a top quality snapover leather case. A great beginner or hobbyist set of lockpicks! You'll be able to pick your first lock in about an hour! We've had HUNDREDS of emails from students telling us so! Three Things you must know: International customers should purchase the [C500EZ](#) slim line lock pick set with instruction booklet. The lock picks in the PXS-05L are designed for US made locks and may not be suitable for use on locks manufactured outside of the US. Both sets are manufactured by SouthOrd and are made of high quality steel, leather case IS included. All of our

[lock picks](#) and lock picking tools are made in the USA.

\$16.95

PXS-14 - SouthOrd Lock Pick Set

What a Bargain! The PXS-14 is by far our most popular beginner lock pick set. It represents quality and value, and contains everything you need to compromise most pin tumbler locks. The PXS-14 opens deadbolts, doorknob locks, most auto locks, and padlocks. This lock pick set includes nine lockpicks, a broken key extractor, four tension tools, slip on vinyl sleeves, and a FREE top grain leather case. Our Best-Selling, complete "starter" lock pick set! Please note: The PXS-14 is designed to open US made locks. Our international customers should purchase one of our [slim line lock pick sets](#) designed to open locks manufactured in the UK, Australia and Japan. Many of these locks have smaller, more narrow keyways and standard picks may be too large to use. Note: [slim line lock pick sets](#) are designed to open all US made locks as well as those locks manufactured in the UK or Japan. The slim line set that is most comparable to the PXS-14 (and also an EXCELLENT bargain) is the [SouthOrd C1500](#). Looking for an inexpensive, easy to follow

instruction manual that will teach you how to use these lock picks? We highly recommend [The Visual Guide to Lock Picking](#). This book is THE top-selling book in the country on the subject of lock picking. It will teach you basic techniques (and then some) and the graphics are really amazing. Available in paperback for \$24.95 (in English and Spanish), also available in DVD. PXS-14 - Regularly \$37.95

All of our [lock picks](#) and lock picking tools are made in the USA.

\$149.95

Lock Picks - Double Sided

Double Sided Lock Picks Hate to get called out to open a disc tumbler lock? You know, one of those locks that is frequently used to secure display cases. You'll find these types of locks used in jewelry stores as well as many stores that have locked display drawers, doors and wall mounted cases. Wikipedia defines disc tumbler locks as follows: A disc tumbler lock is a lock composed of slotted rotating detainer discs. A specially cut key rotates these discs like the tumblers of a safe to align the slots, allowing the sidebar to drop into the slots, thus opening the lock. Unlike a wafer tumbler lock or a pin tumbler lock, this mechanism does not use springs. From a security standpoint, the disc tumbler lock cannot be bumped. Without double sided lock picks, it's an almost impossible task to open disc tumbler locks. We're here to make your life easier! So, go ahead. Add a set of double sided disc tumbler lock picks to your inventory of locksmithing tools! And why not?! At under \$30 they're quite a bargain! All of our [lock picks](#) and lock picking tools are made in the

USA.

\$25.95

[Individual replacement picks](#) are also available. All of our [lock picks](#) and lock picking tools are made in the USA.

\$39.95

Picks for Warded Padlocks

Picks for Warded Padlocks Warded picks are for, of course, warded locks. A warded lock (also called a ward lock) is a type of lock that uses a set of obstructions, or wards, to prevent the lock from opening unless the correct key is inserted. The correct key has notches or slots corresponding to the obstructions in the lock, allowing it to rotate freely inside the lock. Warded locks are commonly used in inexpensive padlocks, cabinet locks, and other low-security applications, since they are among the most easily circumvented by lock picking. Warded locks are pretty common, and they are easily opened with the proper tools- warded picks! Our warded picks are used for warded locks; they are a necessity if you intend on opening warded locks. This compact pick set efficiently opens warded padlocks. This set of 5 picks comes on a key ring and helps to avoid costly destruction of padlocks. These picks are a must have for your toolbox. And at this low price, you can't afford not to own a set! Compact enough to fit in your pocket Contains 5 Picks with Key Ring Made of the finest US spring steel

\$9.95

Padlock Shims - SPS-20

Padlock Shims How do I Pick a Padlock? Padlock Shim Picks Set What are padlock shims? Our friends at lockpicking101 have this to say: "Padlock shims are formed pieces of thin yet stiff metal designed to take advantage of mechanical imperfections and tolerances in the latching design of some popular brands/models of locks. In other words, padlock shims are a bypass tool, not a pick." An easy way to open many padlocks is to utilize Padlock Shims; it's a great alternative to picking. In many circumstances shims are the only way to open a padlock in mere seconds. They are designed to open laminated type padlocks, the most common variety of padlock used today but they will open any lock that has a spring operated lever latch. Made of very thin spring steel, our padlock shims come in several sizes to fit the contour of the hasp of the lock. Just push one down between the hasp and the body of the lock and twist to disengage the locking mechanism. Pretty slick!

Our 20 piece shim assortment for padlock opening comes with 5 each of the 4 most common shackle diameters, enabling the shims to open a wide variety of locks. Want to know how to pick a padlock using padlock shims? Visit Lock-Picking.org, our informational website and [take a look at our article on padlock shims](#). Keep in mind that padlock shims are very effective for opening nearly all cheap padlocks in record time. While padlock shims are inexpensive and easy to use, they have limited effectiveness on high-quality locks. Anyone truly interested in safeguarding valuables would never rely on a padlock alone to do the trick, as these models offer only minimal protection against thieves. Padlock shim sets are available with several different-sized shims, which are slender pieces of spring steel. These ends are inserted in the gap where the lock meets the hasp so that the tips disengage the locking mechanism inside the housing. The base of the shim is cut to fit the contours of the exposed U-shaped latch, giving you greater control in maneuvering the end.

\$24.95

Schlage Wafer Pick Set

Schlage Wafer Pick SetYears ago, Schlage developed a lock that was thought to be un-pickable - the Schlage Wafer. They are no longer sold and installed, but they still show up in older offices and hotel/motel complexes. Although they can't be picked with conventional tools, they are a snap to open with the Schlage Wafer picks. You can tell a Schlage Wafer Lock by looking into the locks keyway. Look inside the keyway and if it seems like the key should be shaped like the letter "C", there is a strong possibility that you're looking at a Schlage wafer lock. Highly recommended if your business takes you into older buildings, or if you are a property owner/building manager of an older property. **Standard lock picks cannot be used on Schlage wafer locks - they will not work.

Slim Line Lock Pick Set - 37 Piece

Slim Line Lock Pick Set - Thirty-seven Piece Made for European and Japanese locks, and U.S. locks with small or narrow keyways, our Slim Line thirty-seven piece lock pick set includes fifteen premium lockpicks with metal handles, fifteen standard lockpicks, and seven different tension tools, housed in our luggage quality zippered top grain leather case. Take a look at all the [Slim Line lock pick sets and kits](#) we keep in stock! All of our [lock picks](#) and lock picking tools are made in the USA.

\$85.95

Slim Line Lock Pick Set - 74 Piece

Seventy-four Piece Slim Line Lock Pick Set Our top of the line Slim Line Euro/Japanese lock pick set, is also excellent for opening U.S. locks, especially those locks with narrow or small keyways. Included are thirty lock picks with metal handles, thirty standard lockpicks, five warded picks, and nine tension tools. There are a whopping seventy-four pieces in all! And these high quality stainless steel lockpicks are complimented by the luggage quality, top grain zippered leather case. This set is the equivalent to our [MPXS-62 lock pick set](#) designed for standard size keyways. All of our [lock picks](#) and lock picking tools are made in the USA.

\$159.95

GM Auto Rocker Lock Pick Set

General Motors Automotive Rocker Lock Pick Set These picks are called "Rocker" picks because of their special shape and method of use. Their unique shape allows them to be rocked up and down inside the lock cylinder keyway. There are 12 double-ended, single sided GM rocker picks in this lock pick set. This gives you 24 combinations covering the one thousand plus possible key cut configuration for General Motors side bar locks. Each GM rocker lock pick will save you time by replacing hundreds of "try out" keys. Before attempting to use these picks carefully read the instructions enclosed with the set regarding the GM PassKey system and 8 & 10-cut ignition locks. This set works on most G.M. (Buick, Cadillac, Chevrolet, Oldsmobile, Pontiac, and GMC trucks and vans) steering column, door, and trunk locks. G.M. side bar locks are the most difficult U.S. automotive locks to pick, but with this set and practice, patience, and more practice, you can learn to master these locks. Not for use on VAT (PASS) system ignition locks (the G.M. keys with

the built-in microchip).

Government Series 3 Lock Pick Set

Peterson Government Elite 3 Professional Pick Set The Government Elite III Professional Pick Set has a wonderful tri-fold sheepskin glove leather case that is jam packed with over \$325 of Peterson's quality tools. The featured lock picks are made from moly-stainless steel, (which is the highest tensile strength steel made. Peterson added their DAMES (4P-BS) bypass set which includes 4 Peterson By-Pass Tools, an upgraded moly extractor, their slender pick set, and even their enhanced serrated tension tools to this professionals only grade pick set. While this set is not priced for the timid, due to its value, the high quality tools included and the overall capability of this set, these are quickly becoming a customer favorite! The Government Elite III pick set has Peterson's best stainless steel lock picks, Broken key extractors, and By-Pass Tools.

\$329.95

Government Series 4 Lock Pick Set

Peterson Government Series 4 Lock Pick Set This set has it ALL! All of our current [bypass tools](#) plus our two types of serrated tension tools plus our proprietary "Government Steel" picks in both the standard rubber and as the "Stainless Slender's" that work so well in small places. In short the Government Series 4 pick set is our [G-3 set](#) plus our new [Pro-Dames bypass set](#) with a smattering of other neat stuff. There have been so few problems associated with these picks that we find it easy to extend a limited lifetime warranty on them: Send any of our broken Government Steel Picks (G-S) back to Peterson Manufacturing, Inc. with a check for \$12.50 and we will happily send you back a new G-S pick, of your choice; no questions asked, postage pre-paid.

\$525

Credit Card Lock Pick Set

Credit Card Lockpick Set This is the first credit card size lock-pick set. Straight out of a James Bond movie, it's an actual lock-pick set concealed inside a credit card housing. The back portion of the card slides off to reveal 4 individual picks and a double-sided tension tool. At 1/8" thick, it's about twice as thick as a normal credit card, but will discreetly fit in your wallet along with your other credit cards. The picks are top quality, solid stamped stainless steel, 4 piece credit card pick set.

This unique kit assures that you always have a back-up when you need it. Length and width are the exact size of any standard credit card. The cover looks similar to a real credit card. This is about the coolest thing I've seen in a long time! There is actually a hidden compartment under the lid that houses the mini pick set. Comes with one tension wrench, small diamond pick, snake (C rake) pick and an L rake. Very I-Spy! Please note: This is a working lock pick set but it is a novelty item. It is not intended to replace a full sized lock pick set nor to be used all-day every day

on the job. If you are just learning the skill of lock picking we would advise you to purchase, practice, and learn to use a full-sized standard pick set.

\$29.95

Pocket Pen Lock Pick Set

Pocket Pen Lock Pick Set The Pocket Pen Lock Pick Set includes nine assorted lock picks (housed within the handle) and a tension tool, engineered to the size of a ballpoint pen. The tension wrench is actually the clip of the pen and is made of flexible hardened carbon steel. A unique design with quality throughout. Total weight: only 38 grams! Imported. Please note: This is a fully functional lock pick set but it is a novelty item. It is not intended to replace a full sized lock pick set nor to be used all day, every day on the job. If you are just learning the skill of lock picking we would advise you to purchase, practice, and learn to use a full-sized standard pick set in addition to this item. The Pocket Pen lock pick set is great in a tight spot or emergency situation for sure! IMPORTED

\$54.95

Gov't Elite Stainless Lock Pick Set

Government Elite Stainless Steel Lock Pick Set Our wonderful sheepskin glove leather case just jam packed with tools. Our featured picks are moly-stainless, which is the highest tensile strength steel made. Reports are coming back from users that these rubber handled picks have an enhanced "feel" due to the tensile strength that seems to aid in lock picking. This was our first Government quality pick set. Contents are valued at over \$220.00, But our price is only \$189.95. We are starting to see locksmiths buy this compact quality set in greater numbers again, but they are teaming is up with our newly released "Pro-Dames" set found in our "By-Pass Tools" page. Add some serrated tension tools and some "Just Picks Slender Stainless" and you have the equivalent of our G-4 pick set in two easy to manage cases. There have been so few problems associated with these picks that we find it easy to extend a limited lifetime warranty on them: Send any of our broken Government Steel Picks (G-S) back to Peterson Manufacturing, Inc. with

a check for \$12.50 and we will happily send you back a new G-S pick, of your choice; no questions asked, postage pre-paid. Contents: 1 ICE-1 Scissor Extractor, 2 Wire cut Extractors, our I-Core 3 piece set, Our Peterson Bending tool and Tension Tool Strips

\$221.95

KEN'S Lock Pick Set

Ken's Mid-Range lock pick set This Peterson mid-range 15 piece lock pick set is every bit the superb quality of our larger lock pick sets. We've picked some of the very finest picks from our larger sets including our [Deep Cut Access Picks](#), one of our [saw tooth extractors](#), several of our Slender gem picks and combined them with a complete set of our [Flat-5 tension tools](#), giving you a set of picks that is extremely portable and will fit right in your work shirt pocket. While we have succeeded in putting out some of the highest quality and most inclusive pick sets in the world to serve the needs of the high end locksmith professional needing to be prepared for any challenge, we realized that we also needed to appropriately select some of our powerful tools and put them into a smaller snap over case for those not needing that full arsenal sitting in their shirt pocket as a first line of attack.

\$89.95

City Lites Pick Set

City Lites Lock Pick Set A cheaper version of the same concept as "The City". On the plus side, we use our new "Texture Grip" handle coating. This is for our friends who like a smaller handle like some "other brands". But we do it with comfort. On the minus side? Only 5 picks, 1 cheap Extractor, One Tension Tool. All included with our Quality Leather snap over case great for general use, or for beginners. Contents: 5 Textured Gripped handled picks, 1 Extractor, One tension tool. With quality leather snap over case.

\$39.95

Allisons Lock Pick Set - Pink Handles

Allisons Lock Pick Set - with Pink Handles While we were determining what tools we would put into our new small, but powerful KPS-15 pick set, we received a request for a set of picks with pink handles. Allison, a locksmith from Alabama, desired them because she liked pink and very importantly because the guys in the shop would then stop carrying her bench tools away. We agreed, and so the KPS-15 is also available in Pearled Pink for all those who desire them. In appreciation for her help, the set bears Allison's name.

\$99.95

The City Lock Pick Set

Designed for our friends in New York City who wanted a small - High Quality set for normal daily use - without over filling pockets. Contents: 6 Rubber Handled picks, 2 wire cut extractors, and one tension tool. With quality leather snap over case

\$56.95

Masters Lock Pick Set

Master Tri-Fold Lock Pick Set - 2nd Edition This is one of our preferred pick sets for the new locksmith or trainee at work. It has a case that has plenty of extra room (so you can add to it in the future), a nice set of our texture grip handles, a grouping of our U-Bend It tension tools plus our famous [FLAT-5 tension tools set!](#) This is a lock pick set with great potential for the user. It's complete with everything you need to get the job done right. A great selection of our top tools at a really great price!

\$114.95

Professional II Lock Pick Set

Professional II Lock Pick Set This is a very high quality lock pick set by Peterson inside a bi-fold case combined with our plastic handled picks, a grouping of U-Bend-it tension tools, and our 3 bent "STT" tension tools. A lot of people prefer our plastic handles for the "feel" they get, and many folks like this simple and supple bi-fold case - so here it is!

\$94.95

Elite II Lock Pick Set

Elite II Lock Pick Set The glove leather case is only 3 and 1/4 inches wide, and has all 9 Peterson picks plus two wire cut extractors, 1 Slender gem for Para-Centric locks, and our trademark group of U-Bend IT tension blanks with a Peterson bending tool. The Elite II Lock Pick Set fits perfectly in the shirt pocket, and the leather is so nice! Compact well-designed case with some of the finest lock picking tools available...and you're getting real value for your money. NOW you're all ready to take on lots of new customers! Another fine set of tools made right here in the USA!

\$114.95

Elite 4 Bypass Pick set

Elite 4 Bypass Pick set Our Elite 4 set is nearly the same as the [G-4](#), but not exactly. The case is the same and the tool count is the same, but the rubber handled picks are made from our high grade spring steel, not our Government grade Stainless Steel. You still get the powerhouse array of tools you need to do the job right! This set is POWERFUL! All of our current bypass tools plus two types of serrated tension tools and the "Stainless Slender's" that work so well in small places. The Peterson Elite 4 bypass pick set is our G-3 set plus our new Pro-Dames bypass set with some other really cool tools.

\$349.95

4 Piece Rivet Chicago Wafer Picks

4 Piece Rivet Chicago Wafer Picks Here's a good set of wafer picks that fold up when not in use. The post type rivet maintains the smallest profile for storage. Sturdy, compact and very economical. You need a set of these in your toolbox! You don't know what a wafer lock is? Wikipedia defines a wafer tumbler as a type of lock that utilizes a set of flat wafers to prevent the lock from opening unless the correct key is inserted. This type of lock is similar to the pin tumbler lock and works on a similar principle. However, unlike the pin tumbler lock, the wafer is a single piece. The wafer tumbler lock is often incorrectly referred to as a disc tumbler lock, which uses an entirely differently mechanism. If you need to pick a desc tumbler lock you'll need a set of [double sided picks](#) designed specifically for them. Wafer tumbler lock configurations

vary with manufacturer. The most common is the single-bitted, five-wafer configuration most commonly found on desk and cabinet locks and some key switches. Some wafer tumbler locks utilize a stack of closely-spaced wafers designed to fit a specific contour of a double-sided key and works on the principle of a carpenter's contour gauge. Wafer tumbler locks can utilize single-bitted or double-bitted keys. Though wafer arrangements within the plug may vary, such as automotive locks, where the wafers are arranged in opposed sets, requiring a double-bitted key, the operating principle remains the same.

High Yield 20 piece MAX Lock Pick Set

M2000 MAX High Yield 20 piece Lock Pick Set The M2000 High Yield Lock Pick Set consists of ten metal handle picks, two double ended picks, eight tension tools, and an oversized zipper case made of the finest Valentino leather. About SouthOrd MAX Lock Pick Sets: SouthOrds new line of lock picks, SouthOrd MAX, brings to you the strongest, most durable picks available from anyone at any price. Building dies that can withstand the intense wear and abuse caused by stamping high yield steel has always been a problem. Type 301 High Yield Stainless Steel is often used for applications requiring extra high strength. With a minimum tensile strength of 270,000 PSI, High Yield is much harder than Full Hard, which has a minimum tensile strength of 185,000 PSI. Laser cutting was the only viable option - and a very expensive option - until now. After more than a year of building, testing and refining, SouthOrd has developed dies that can withstand the intense characteristics of high yield. The result is the world's strongest lock picks at reasonable prices.

The guarantee is simple - if you break a MAX pick under normal use, return it to SouthOrd and it will be replaced for FREE.

\$129.95

M3000 High Yield Lock Pick Set

M3000 MAX High Yield 30 piece Lock Pick Set The M3000 High Yield Lock Pick Set consists of fifteen metal handle picks, two double ended picks, twelve tension tools, including a feather touch, and an oversized zipper case made of the finest Valentino leather. About SouthOrd MAX Lock Pick Sets: SouthOrd's new line of lock picks, SouthOrd MAX, brings to you the strongest, most durable picks available from anyone at any price. \$34.95

Houdini Lock Pick Set

Credit Card Lock Pick Set - Special Houdini Version Harry Houdini was famous for his ability to hide lock picks in plain sight until he needed them to effect an escape. There weren't any credit cards in Houdini's day, but if there were he probably would have invented an item like this to hide his escape tools on his person. The first thing you'll notice on this card is the haunting, ghost-like image of Houdini in the background. Not so noticeable is that the credit card number, if converted to the text letters on a telephone, spell out "Nothing Can Hold Me". Finally, the "member since" and "valid through" dates represent Houdini's birth and death dates. This special limited-edition version of the Credit Card Lock Pick Set is a collectible tribute to the greatest escape artist in history. This is an actual lock-pick set concealed inside a credit card housing. The back portion of the card slides off to reveal 4 individual picks and a double-sided tension tool. At 1/8" thick, it's about twice as thick as a normal credit card, but will discreetly fit in your wallet along with your other credit cards. The picks are top quality, solid stamped stainless steel, 4 piece credit card pick set. This unique kit assures that you always have a back-up when you need it. Length and width are the exact size of any standard credit card. The cover looks similar to a real credit card.

\$31.95

Access Card

Our new ACCESS CARD is the hottest-selling and most unique lock picking product we've seen in a long time! The ACCESS CARD is a discreet new professional lockpick set that's always available when needed. Perfect for emergencies; its extremely low-profile design allows it to be hidden amongst the credit cards in your wallet. In fact, at a mere .016" thick, it's even thinner than your credit card. Manufactured from stainless steel, the ACCESS CARD features a feeler pick, ball pick, diamond pick, hybrid feeler/diamond pick, and a tension wrench which also doubles as a handcuff shim pick. Each tool can be snapped off the matrix as required. Since once removed they cannot be reattached, design features enable detached components to be fastened to a keyring or even be sewn into clothing for future deployments. Color: copper. Includes black carry sleeve. Size: 2.10" x 3.36". Thickness: 0.016". Weight: .345 oz. Ultra-thin, ultra-light, and ultra-concealable- it could be the most useful card in your wallet.

\$19.95

M4000 High Yield Lock Pick Set

Our new SouthOrd MAX Lock Picks are manufactured of 0.031 inch thick High Yield Stainless Steel, the strongest and most durable stainless available, and feature lightweight ergonomic ABS handles. Type 301 High Yield material is often used for applications requiring extra high strength. It is much harder than Full Hard material, having a minimum tensile strength of 270,000 PSI, compared to 185,000 PSI for Full Hard. Question: That all sounds very impressive - and it IS...but why is that good for YOU? Answer: This type of steel meets the exacting requirements of the aircraft industry. It is exceptionally tough and corrosion resistant. The M4000 is an investment in very high quality lock picks that will last for a very long time. The M4000 High Yield Lock Pick Set consists of fifteen picks with molded handles, two double ended picks, eleven tension tools, and an oversized zipper case made of the finest Valentino leather. Oh, you may be wondering about the warranty on this lock pick set - The guarantee is simple - if you break a MAX pick under normal use, return it to SouthOrd and it will be replaced for FREE.

\$199.95

On Sale - Lock Picking & Locksmith Tools

Dyno Kwick Lock Pick- lock picking Tool

Kwick Pick The Kwick Pick was recently featured in WIRED magazine! Our very own Dyno Kwick Lock Pick was picked to be in WIRED's Guide of "The Best Gadgets & Gizmos on the Planet" Pretty Cool, huh?The Dyno Kwick Lock Pick - Lock Picking Tool - Lowest Price on the Internet! Locked Out? Now You Can Open Virtually Any Lock In Just Seconds with Kwick Pick! Professional-quality Dyno Kwick Lock Pick gets you in - in a flash! The Kwick Pick fits comfortably in your hand, and opens everything from padlocks to file cabinets, from desk drawers to toolboxes, from luggage to gas caps. Kwick Pick even opens some car doors and front door locks. Easy to use design has spring-loaded sure lock, retractable pick, and tough aluminum alloy design with combination tension wrench/pocket clip. The Dyno Kwick Lock Pick was invented by a professional locksmith. Patented. Don't know how to pick a lock? This is a great little tool to have around the house or office! With the Dyno Kwick lock pick tool you don't need to know how to pick locks.

Naturally, your Kwick Pick comes with full instructions. It's always a good idea to [have an extra rake](#) and [tension tool](#) on hand. In our experience the Kwick Pick is so versatile it gets a lot of use. After repeated use (normal wear and tear) both may need replacement. The tip of the Dyno Kwick rake is small enough to be effective with many different USA made as well as European and Japanese manufactured locks. Though one tool cannot take the place of a complete [lock pick set](#) the Kwick Pick comes close! What makes the Kwick Pick most appealing is its all-in-one design and ease of use. Lost the instructions for how to use your Dyno Kwick Lock Pick? We had so many requests that we posted the instructions on SCRIBD. Follow [this link](#) and you'll find a complete instruction sheet for reference.

Peterson Picks

Deep Cut Access Picks

Deep Cut Access Picks Deep cuts close to the bow of a key help to add security because if they come to sheer before the pins behind them, thick picks cannot pass through the barrier created. Our DCAP picks have shorter shank heights to allow them to work through these reduced windows of access. Made from Government Steel, they provide greater strength to you than most picks with full height shank designs. These picks are also excellent for use with EURO Keyways. Limited Lifetime Warranty: If you break one of these wonderful picks simply return it to Peterson Manufacturing and they will replace it for only \$7.00 (plus shipping and handling).

\$24.95

Just Picks- Stainless Slender

JUST PICKS- Stainless Slender This set of 0.015 slender picks provided in popular profiles provides a powerful arsenal to you. (Made of our government steel of course). No frills, just top quality lock picks!

\$39.95

Peterson Slender Reach Pick

Peterson Slender Reach PickThe Slender GEM stainless steel pick is a natural companion for Peterson's [Small Format Interchangeable Core Tension Tool](#). The Slender Peterson Reach Pick is another natural companion for Peterson's Small Format Interchangeable Core Tension Tool. Also at 0.015 it's slenderness plus it's unique reaching ability allows this precision pick to penetrate freely into the I-core lock design.

\$9.95

Peterson Slender Gem Pick

Peterson Slender Gem Pick The Peterson Slender GEM stainless steel pick is a natural companion for [Peterson's Small Format Interchangeable Core Tension Tool](#). At 0.015 it is only 60% of the thickness of your standard picking tools, and less than 75% of the thickness of other 0.022 "thin" tools. Because of it's slenderness this precision pick allows easier access for picking of locks with narrow keyways, or those keyways approaching the Para centric design. And the GEM tip allows a greater pin access.

Pick Guns, Electric Lock Picks - Save Time & Money

Electric Lockpick Needles -10 Pack

"E" Series Electric Lock Pick picking needles Ten pack of replacement picking for the [Southord E500XT](#) high performance 4.5 volt electric pick. These needles will also work in the [LAT-17 EZ snap lock pick gun](#). All of our [lock picks](#) and lock picking tools are made in the USA.

\$9.95

EZ Snap & Pick Guns manual

EZ SNAP & PICK GUNS manual The [Lockaid pick gun](#) was developed decades ago to allow police officers who were not skilled in the art of lock picking to open locks with minimal instruction. The [Lockaid](#) pick gun does many of the same jobs that a traditional lock pick set accomplishes in just seconds. Rather than opening locks by the traditional raking techniques, a snap gun uses a primary law of physics, the transfer of energy, to compromise locks. Comes with picking needles, tension tool and instructions. [PICK GUNS](#), by John Minnery is an instructional text which gives an overview of the mechanical principles of pick guns- how they work and how to use them- and traces the development of the pick gun from its inception in the 1920s to today's revolutionary devices. Included (as well) are instructions for pick guns used by the FBI and federal intelligence agencies. The [Lockaid tool](#) has been a boon to the pro locksmith and a terrific aid to law enforcement and even national security. Because of the potential for abuse, however, this book is offered

for informational purposes only.

\$64.95

Lockaid Lock Pick Gun - The Original

LockAid Tool - Lock Pick Snap Gun LIFETIME GUARANTEE The LOCKAID lock pick gun was specially designed to pick pin tumbler locks over seventy years ago as an aid to law enforcement agencies and locksmiths. The Lockaid lock pick gun is the ORIGINAL, often copied but never duplicated. It is constantly being checked and evaluated for improvements by the manufacturer. There are many copies of this tool on the market, but not one imitator has been able to duplicate the precision action, reliability, and quality of the Lockaid Tool. The Lockaid lockpick gun allows you to pick a wide variety of commercial and residential locks in seconds! This pick gun can be used to open most pin tumbler locks. It can work as fast as a few seconds to a few minutes. Some beginners tell us that it takes a bit of time to learn how to use this tool, but with more practice they are able to open the lock much quicker. The

Lockaid tool is made of cold rolled steel with a brass knurled adjusting nut to control the tension on the needle. You Have Our Guarantee - FOR LIFE. All legitimately purchased LOCKAID TOOLS registered with the manufacturer are guaranteed for life if defective or broken during normal use The LOCKAID TOOL comes with: 1 Offset Needle (.025) ON-25 1 Straight Needle (.025) SN-25 1 Straight Needle (.035) SN-35 1 Tension Wrench TW-20 1 Each Screw, Nut & Washer

High Output Electric Lock Pick

High Output Electric Lock Pick -E500XT SouthOrd began manufacturing electric lock picks in 1992 with the E100C, followed by the E100HO, and both were remarkable successes. As time passed, improvements were made and in 2006, the E110 Series of electric lock picks was introduced. We've taken the volume of knowledge gained in the past 15 years of manufacturing high quality electric picks and the result is the new fifth generation E500XT Electric Lock Pick. This pick provides high power in a compact tool: comfortable, easy to use, and covered by a six month warranty for both parts and labor. The powerful long life motor is designed for the E500XT for optimum performance. Like our previous models, the E500XT can be powered by rechargeable Ni-Cad or [NiMH batteries](#) or standard Alkaline cell batteries, so you never need worry about replacing expensive battery packs or throwing the tool away when it will no longer take a charge. Includes 4 picking needles, 3 tension tools, hex wrench, and a top grain leather case to protect

your investment. The [NiMH battery charger](#) is available for only \$19.95. Our high output electric pick features aircraft aluminum and hard steel construction. Electric picks require some skill to use, but we find them easier to use than lock pick snap guns or conventional lockpicks. The electric pick allows you to duplicate exact raking motion at many times per second. The gun rakes open pin and disc tumbler cylinders using a rapid up and down striking movement, which causes the top and bottom pins to separate, meeting the shearline. Full instructions for using our electric lock picks can be found on the [lock picking information website](#). It's a good idea to purchase a [replacement pack of picking needles](#); you'll need them sooner or later particularly if your electric pick sees a lot of use.

\$169.95

NiMH Rechargeable Battery

MH4500 NiMH Rechargeable Battery Our new NiMH batteries are a perfect companion to our [E-Series Electric Lock Picks](#). Each C-cell battery holds 4500 mAh of power, giving far longer life between charges than either alkaline or NiCad batteries. These high quality energy cells can be recharged approximately 300 times, making them very cost effective and economical. Listed price is for one battery. If purchasing replacement batteries for the [E500XT High Output Electric Lock Pick](#) you'll need 3.

\$8.45

NiMH Battery Charger

NiMH Battery Charger The SouthOrd MH110C Battery Charger is made specifically for [NiMH batteries](#) like those used in our [High Output Electric Lock Pick](#). Utilizing either quick or slow charge, it will handle all popular size batteries...D, C, AA, AAA, and 9-volt.

\$19.95

Electric Lock Pick Combo Kit

Electric Lock Pick Combo Kit Combo Kit includes part numbers: [E500XT](#), [MH110C](#), and [MH4500](#) This combination set includes SouthOrds fifth generation E500XT Electric Lock Pick, 3 SouthOrd [NiMH batteries](#), [battery charger](#), 4 picking needles, 4 tension tools, hex wrench, and a top grain leather case to protect your investment. This pick provides high power in a compact tool...comfortable, easy to use, and covered by a six month warranty for both parts and labor. Like all previous SouthOrd Electric Lock Pics, the E500XT will run standard alkaline batteries, but our NiMH batteries will save money charge after charge!

\$189.95

Manual Lock Pick Gun

\$74.95

Replacement Picks for PKXGUN

Replacement picking needles for Manual Pick Gun [PKXGUN](#). Included are 3 picking needles and 1 tension tool.

\$7.95

Snap Gun - LockPick Gun

The Pick Gun was designed for law enforcement agencies to quickly pick pin tumbler locks. Unlike conventional hand picks that activate only one or two cylinder pins at a time, this tool is designed to span all the pins at once. The needle, powered by trigger action, strikes all the cylinder bottom pins simultaneously. As the force is transferred to the upper pins, they momentarily rise in the chambers and create a wide gapping shear line. At precisely that moment, with pressure applied on the tension wrench, the plug turns to the opening position! Various amounts of pin striking action is achieved by merely adjusting the knob. Comes complete with 3 steel needles and tension wrench. Made in China

Plug Spinners

Dino Gun Plug Spinner

DINO PLUG SPINNERThe highest quality gun plug spinner on the market. It is specially designed to help locksmiths save time. Sometimes locks resist picking and will open in the opposite direction. The Dino Gun Plug Spinner is used when you pick a lock in the wrong direction and need to move the plug to the other side of the shear line without picking it again. The spinner's heavy duty torsion spring and loading pin allow for rotating in either direction at varying strengths and speeds, making sure you only have to spin once. The easy to hold gun-like grip allows for perfect control when spinning the plug on a picked lock is required. This tool is especially well suited for spinning locks that include the extra pressures supplied by plug return springs. Very high quality. Made of precision cast alloy and steel.

\$124.95

Peterson 2 Tip Plug Spinner Set

Plug Spinner Set-Comes with both commercial and automotive tips We are very happy with the new Peterson Plug Spinner. This spinner may seem a little pricey compared to most models out there, BUT the controlled power of the coil spring action, the one handed ease of use, it's durability and compact size and it's fit in your hand comfort and control set it apart from the others. Take special note of the oiling port in the center of the handle and the replaceable tips which prepare it for a life time of use. It utilizes a coil spring and allows rotation in either direction. It can develop sufficient torque to effectively turn virtually any plug rapidly enough to cross the shear line without dropping pins or wafers. The blade that is inserted into the keyway can be easily replaced and will allow a sufficient link to the keyway to transfer rotational energy.

The tip shown is our longer thicker tip for automotive use, and the overall length with this longest accessory is only FIVE INCHES! (Do not attempt to use the Automotive tip for commercial work, this tip is too thick for most commercial applications). The thinner standard version for residential commercial work is almost a half of an inch shorter. The width across the shoulders of this spinner is 1 & 1/8 with a maximum thickness of less than 1/2 inch. Yes this will easily fit in a pick set! Please note that the production products were requested in a dark blue, but may be shipped in blacked as shown based on availability of colors. Comes with 1 each of commercial & automotive tips, plus a spare spring...just in case.

\$59.95

Automotive Plug Spinner

Automotive Plug Spinner The plug spinner shown has Peterson's longer thicker tip for automotive use. The overall length with the tip is only FIVE INCHES! The automotive spinner (PPS-1A) has a 0.060 thick blade: that is definitely too thick for most commercial applications. Perhaps the best plug spinner that is now available is produced by Peterson Manufacturing. It utilizes a coil spring and allows rotation in either direction. It can develop sufficient torque to effectively turn virtually any plug rapidly enough to cross the shear line without dropping pins or wafers. The blade that is inserted into the keyway can be easily replaced and will allow a sufficient link to the keyway to transfer rotational energy. Take special note of the oiling port in the center of the handle and the replaceable tips which prepare it for a life time of use.

\$64.95

TWO Automotive Tips

TWO Automotive Plug Spinner Tips The tip pictured above is Peterson's longer thicker tip for automotive use, and the overall length with this longest accessory is only FIVE INCHES! Don't try to use the Automotive tip for commercial work. This tip is too thick for most commercial applications. The width across the shoulders of this spinner is 1 & 1/8 with a maximum thickness of less than 1/2 inch.

\$14.95

1 each of 2 assorted tips

1 each of 2 assorted Peterson plug spinner tips The best of both worlds! You'll receive one each of our auto plug spinner tip and commercial tip so you'll have one for residential commercial work and one for automotive work. Perfect!

\$14.95

TWO Commercial Tips

Two Commercial Plug Spinner Tips The commercial version of the Peterson Plug Spinner ([PPS-1C](#)) has a more standard blade thickness and will be well enjoyed and used by locksmiths not specializing in automotive work.

\$14.95

Over-The-Key Plug Spinner Tip

Picking a lock in the wrong direction can be frustrating. Bumping the wrong way can be even worse. Longer pins can capture the bump key, making it impossible to insert a plug spinner. So it's back to the shear line and start bumping again, right? Not with the Peterson Over-The-Key Spinner Tip. Mounting in seconds to the Peterson Plug spinner, this tip fits over the bow of virtually any bump key. No need to insert another tip in the keyway. The Bump Key IS the Plug Spinner Tip!

\$20.95

2 Plug Spinner Replacement Springs

Here at Lockpickshop, we know how rigorous a workout security professionals put our tools through. You expect our tools to be tough, and we try to make sure they are exactly the way you expect. Made from the highest quality spring steel these Plug Spinner Springs will last far beyond any other available model. Because we built our Plug Spinner to get decades of hard use, we offer our Plug Spinner Replacement Springs...just in case! Replacement springs come in sets of 2.

Slim Jims - Lockout Tools - Broad Selection

Slim Jim - SJ-100

Slim Jim Buy an imported slim jim? No way! Lockpickshop buys USA-made lock picks whenever possible and this slim jim is no exception! Our US supplier has been manufacturing locksmithing and auto opening and recovery tools for years, and we refuse to lower our standards. We use only the finest spring steel in all our tools including the Slim Jim. And we go the distance to give you a Jim with rounded edges and a top quality vinyl handle. It's simply the best there is! Not familiar with using a slim jim? It includes a complete instruction booklet so you can learn how to use a slim jim, the proper technique. You may also want to purchase our [Super Slim Jim](#) to add to your tool kit. This item is not shipped outside of the USA, sorry. Item# SJ-100

\$19.95

6 Piece Economy Slim Jim Kit

6 Piece Economy Slim Jim Kit The Economy Slim Jim Kit is a great starter jim kit or inexpensive way to accumulate additional spare car opening tools. Compact [slim vinyl snap top case](#) allows easy storage behind the seat for those emergency calls. This kit includes: Super Slim Jim, Round Jim, Slide Jim Tool and a 30" Long Slim Jim. Sorry, this item is not shipped outside of the USA unless you are a licensed locksmith or law enforcement personnel. International customers- order at your own risk.

\$49.95

Clamp On Slim Jim

Clamp On Slim Jim What is a clamp on slim jim? It's a slim jim with a twist. Unlike a standard slim jim the clamp on slim jim enables you to "lock" it into place allowing for better control. Push the end of the slim jim tool onto the linkage to lock on automatically. Made of stainless steel. 1" x 25" -.40 thickness This item is not shipped outside of the USA, sorry.

\$19.95

Super Slim Jim - AO11

Super Slim Jim All Slim Jims are not created equal. All of our Slim Jims are manufactured of round edged stainless steel. They will hold the bend desired and they won't rust! Our Super Slim Jim can be used on a wide variety of vehicles with horizontal or vertical linkages. Wider and stiffer Slim Jim than the original 1 1/4" x 25" - .032 thickness. Our traditional Slim Jim, another great USA made product, can be found [here](#). Item #AO11 This item is not shipped outside of the USA, sorry.

\$15.95

EZ Slim Jim - A025

EZ Slim Jim - A025EZ-Jim All Slim Jims are not created equal. All of our Slim Jims are manufactured of round edged stainless steel. They will hold the bend desired and they won't rust! Our EZ Slim Jim can be used on a wide variety of vehicles with horizontal or vertical linkages. The EZ Jim is a medium thickness slim jim. Measures 1 x 25, .040 thickness. An excellent addition to your lockout kit. Another fine tool made in the USA. Item #A025 This item is not shipped outside of the USA, sorry.

\$19.95

30 Inch- Extra Long Slim Jim

30" - Extra Long Slim Jim Be able to reach even the deepest linkages. 3/4" x 29 1/2" .032 thickness.*Slim jims used to be the preferred method of opening locked car doors. Many cars manufactured after 1999 are equipped with side airbags that can be triggered by a slim jim while the user tries to release the lock. Whether you are a professional locksmith or car dealer or just a buddy trying to help a friend...know that if you attempt to open a car door with a slim jim and you set off the air bag, YOU bear responsibility for the cost of having the air bag reset. Also, you should be aware that using a slim jim can disconnect the linkage rod inside the car door, and that can be costly to repair as well.

\$19.95

Double Ended Slim Jim

Double Ended Slim Jim Double ended slim jim. Has a notch slim jim at one end and a comb at the other end. Opens a variety of vehicles. 3/4" x 22 1/2" x .032" thick stainless steel. Slim Jims are used to unlock automobile doors without keys or lock picks. They work on the levers and interconnecting rods that operate the car door, avoiding the complex lock mechanism itself. The hooked end of the tool is slipped between a car's window and the surrounding rubber seal, catching the rods that connect to the lock mechanism. With careful manipulation, the door can be opened very quickly. Sorry, this item is not shipped outside of the USA

\$16.95

The Original Slim Jim - AO10

All of our Slim Jims are manufactured of round edged stainless steel. This Jim will hold the bend desired and it won't rust! May be used on a wide variety of vehicles with horizontal or vertical linkages. This is the Original Slim Jim. 3/4" x 22 1/2" - .032 thickness This item is not shipped outside of the USA, sorry.

\$19.95

Round Slim Jim

The AO12, Round Slim Jim, is specially designed to unlock vehicles with exposed bellcranks. Ideally used for Volvo 960, S90/V90, Porsche Boxter/911, as well as other vehicles with bellcranks. Xacto-Grip flattened. Full Color Instructions included. Made in the USA. Lifetime warranty against manufacturer's defect.

\$19.95

Slide Jim Tool

The AO20, Slide Jim Tool, is a double ended auto opening tool designed to unlock many cars with exposed horizontal lock linkages. The "L" end is used to manipulate bell cranks while the "U" end is used to manipulate horizontal rods with a stepped or offset angle. Xacto-Grip Flattened. Full Color Instructions included. Made in the USA. Lifetime warranty against manufacturer's defect.

\$16.95

Long Slim Jim

Long Slim Jim - Auto Opening Tool Our brand-new line of SouthOrd slim jims features this extra long slim jim made of 100% stainless steel Jim. Because it's all stainless it can really put up with bad weather and will last a lot longer than other jims (for sure!) And at 30 inches long you will be able to reach even the deepest linkage. Sorry, this item is shipped to the US and Canada only.

\$14.95

Wide Slim Jim

Wide Slim Jim Our brand-new line of SouthOrd slim jims features this extra wide jim made of stainless steel. It is specifically designed for car openings and will unlock many foreign and domestic vehicles. It measures 1 and 1/4 inches wide and 24 and 1/2 inches long. Sorry, this item is shipped to the US and Canada only.

\$14.95

Lock Out Jim

Lock Out Jim Our brand-new line of SouthOrd slim jims features this lock-on jim made of stainless steel. The lock on jim is designed for auto opening and unlocks horizontal locking devices by pushing the end of the tool onto the linkage to lock on automatically. The Lock On Jim is 24 inches long and 1 inch wide. Sorry, this item is shipped to the US and Canada only.

Tubular Lock Picks, Specialty Lock Picking Tools

Tubular Lock Pick - 7 Pin

7 Pin Tubular Adjustable Manipulation Lock PickThe 7 pin tubular (aka "ACE" lock pick) pick is a precision tool designed to easily open any standard 7 pin center tubular type lock. Tubular locks are more sophisticated than standard pin tumbler locks. Tubular locks are high security pin tumbler locks arranged on a circular plane. One of the big differences between a tubular lock and a conventional pin tumbler lock is that all of the pins on a tubular lock are exposed to the eye. That doesn't mean a tubular lock is easier to pick, quite to the contrary. The pick used for this lock is the tubular cylinder pick. You need the right tools and time to pick a tubular lock. If you're new to the trade it would be wise for you to learn about tubular locks by purchasing a [tubular training lock](#) as well as some instructional material that covers the basics of picking a tubular lock. We also carry a dvd "[Lock Picking for the New Millenium](#)" that has a section on picking tubular locks and is chock full of lock picking information. Offered in both seven and eight pin configurations, our

brand new tubular lock picks allow adjustment of picking needle pressure, giving them the versatility to pick even tubular locks with higher spring pressures. Each pick has a comfortable, slip resistant rubber handle. Set tension insert and rotate back and forth until the cylinder turns. Simple to use. Our USA made Tubular Picks are sized right to give you both feel and control. *The 7 & 8 pin tubular picks allow you to open most vending machine locks including coin-operated washers & dryers, coin boxes, candy, soda and snack machines, cigarette machines, and jukeboxes. Want to learn how to pick a tubular lock with our picks? We recommend this brand new dvd: [Lockpicking for the New Millenium](#). Manufacturers part #TPXA-7

\$79.95

8 Pin Tubular Lock Pick

8 Pin Tubular Adjustable Manipulation Lock PickThe 8 pin Ace (aka "tubular") pick is a precision tool designed to easily open any standard 8 pin center Ace-type lock. Tubular locks are more sophisticated than standard pin tumbler locks. Tubular locks are high security pin tumbler locks arranged on a circular plane. One of the big differences between a tubular lock and a conventional pin tumbler lock is that all of the pins on a tubular lock are exposed to the eye. That doesn't mean a tubular lock is easier to pick, quite to the contrary. The pick used for this lock is the tubular cylinder pick. You need the right tools and time to pick a tubular lock. If you're new to the trade it would be wise for you to learn about tubular locks by purchasing a [tubular training lock](#) as well as some instructional material that covers the basics of picking a tubular lock. Comes in a custom wooden storage box specially designed to protect your tool to last a lifetime. Similar to the old "Lee Pick".

\$325.95

Peterson Pro-1 Tubular Pick - 3 Tips

Peterson Pro-1 Tubular Pick - 3 Tips The Peterson Pro-1 Tubular Lock Pick is the most universal tubular lock pick we have found. The revolutionary design represents the only new advancement in tubular lock picking in many years. Because of the interchangeable tip design, the pick can be converted to manipulate a number of cylinder diameters and configurations. The special tip design also allows the tool to enter and manipulate shrouded bicycle lock cylinders. The Pro-1 Tubular Lock Pick operates from the "full locked" position of the pins, to find and decode the "blocking pins" in whatever order they must be picked. This psychology bypasses the traps, reduced diameter pins, spool and mushroom pins that cause other picks to fail. The pick finger adjusting thimbles neutralize the problems encountered with locks that have strong and light driver springs mixed in the same cylinder. The Pro-1 product comes with two keytips (7-pin and 8-pin) with the choice of a free 3rd keytip of your choice (Small Kryptonite or American Padlock) mailed to you upon our receipt of your registration card. Additional keytips or other spares can be purchased for either product at a later date. How the Pro-1 works: While applying bias to the cylinder, tap each of the pick element control buttons individually, with the tip of your finger. You are feeling each to find the primary locking pin. One or more of the pins will resist being pushed down. The rest will be bouncy, because of the action of the cylinder springs. While holding the pick vertical to the lock cylinder and biasing the pick to maintain the pressure on the primary locking pin, slowly turn the pick element thimble down. This will cause the pick element to extend, pushing the combination pin downward. When the pin reaches the shear line, you will hear / feel a click. The pin is picked to a shear line. It may be a false or true shear line, we cannot tell. It makes no difference at this point. The pin is picked. Relax the turning tension and then re-bias the pick in the opening direction. Test the control buttons again, to find the next primary locking pin or pins. Perform the screw down operation to find the shear line for each position, and release the turning tension. Continue testing to find the binding pins. As each pin is picked, another will bind. Continue this operation until the cylinder turns. (Robert Seiveking 2001)

\$398.95

10 Pin Tubular Lock Pick

Adjustable 10 Pin Tubular Lock Pick The new Stainless Steel SouthOrd Tubular Lock Picks allow adjustment of picking needle pressure, giving them the versatility to pick even tubular locks with higher spring pressures. The BRAND-NEW 10 pin tubular pick is designed for the 10 pinned tubular locks which are very common in Europe and the UK but not very common in the USA. Each pick has a comfortable, slip resistant rubber handle and is available in [seven, eight](#), or ten pin configurations ([seven and eight pin configurations available as a set](#)).

Technical Manuals

E-Z Lock Picking Manual

E-Z PICKING - Lock Picking Instructional Manual This lock picking manual is written for Security Professionals who desire to have a basic understanding of the process of lock picking. We at LPS hope that it will inspire you to develop your skills. When starting in the locksmithing business, the first thing many want to learn is how to pick a lock. For a long time there wasn't very much good information available and much that was available was far too technical for the beginner to understand. This manual has broken down the process of lock picking and displayed it graphically. The intention of this book was to make lock picking as simple as possible. E-Z Picking is a complete instruction manual written by a group of professional locksmiths with many combined years of real-world experience. An easy to understand EXCELLENT training guide. Packed with full color cut-away illustrations and detailed step by step instructions. Included are over 100 pages of the best information ever written on the subject. Used by students of the locksmithing trade

around the world. In a hurry to improve your lock picking skills? We suggest combining the E-Z Picking manual with our [lock picking course on DVD](#) for a complete...and quick, training program. Need a good set of lock picking tools? We suggest the [PXS-17 lock pick tool kit](#). It's a good, solid, complete pro set in a rugged leather zip-up case. This manual is clearly written, an easy to understand text on the science of lock picking.

Unique & Unusual Items

Handcuff Shim Pick

Handcuff SHIM PICK - pick single-locked handcuffs Law enforcement officers, prison officials and security personnel purchase our handcuff shim picks in large quantities to assist in training their officers. They have to know how to pick handcuffs, how to open them without keys. It's a necessary part of the job. The Handcuff Shim Pick can (pick) open most handcuffs if the lock has jammed or even if the key has broken off inside! No more having to saw or use bolt cutters to release a prisoner locked in a pair of inoperable handcuffs. This handy little shim slides between the pawl and the ratchet to quickly release the cuff. The simple procedure can be most easily viewed and conceptualized by using the Clear Cuff ([see Clear-Cuff Handcuff Cut-Away](#)). Keep one of these on your keychain or in your wallet and avoid the embarrassing situation of having a "stuck" prisoner. Works only when cuffs are single- locked.

\$5.95

Prison Pen

Prison PenA pen is a potentially dangerous weapon in the hands of a prisoner. So why would you give them one? The Prison Pen is made with a soft rubbery material that bends under the slightest pressure, making it nearly impossible to do lethal damage with it. It's as close to a stab-resistant, non-lethal weapon you can get, while still providing the subject with a workable ballpoint pen to write with. It's ideal for use in interview rooms, holding cells, and in any prison or jail environment. You go to great lengths to confiscate any potential weapon when taking a prisoner into custody, so why would you want to hand him one afterward? This pen is now in use in most U.S. federal prisons. Each pen will write for over 3500 feet. Length: 4.5".

\$1.95

Standard Handcuff Key -UHK1

Standard Handcuff Key These universal handcuff keys are designed to fit all leading brands of professional handcuffs. All styles have a back pin for double-locking handcuffs. Standard size handcuff key. Length: 1.75". Color: silver.

\$2.45

Oversize Handcuff Keys These universal handcuff keys are designed to fit all leading brands of professional handcuffs. All styles have a back pin for double-locking handcuffs. Oversize 3" long handcuff key whose larger size provides increased ease of use, even with gloved hands. Color: silver.

\$5.5

Handcuff Pen Keys

Handcuff Pen Keys These universal handcuff keys are designed to fit all leading brands of professional handcuffs. All styles have a back pin for double-locking handcuffs. 4.5" long pen-style key is particularly convenient for those who need to use their key frequently. Includes pocket clip. Color: black.

\$8.95

TV Terror -TV Remote Code Interceptor

TV Terror - TV Remote Code Interceptor TV Terror is a new device that can automatically intercept a TV's remote control coding information, enabling it to function as a "clone." It allows the user to turn the TV on or off, change channels, control the volume, mute, etc. It can even "grab" the coding information while the target TV is turned off! You now can have the ability to control what you see and hear wherever you go - bars, waiting rooms, the neighbor's house - anywhere there's a TV. Or use it at your own house; it's great for harassing your TV-addicted family members. But use only with appropriate discretion - using during the Super Bowl at a sports bar would definitely not be recommended. The TV Terror automatically scans nearly all of the TV codes in existence, and when it determines the correct one for the target TV, it captures and stores it. Most TVs take less than 10 seconds, a few can take up to 60 seconds. But after the initial time, it's always instantaneous. It's simple to use. If the target TV is turned off, just aim it at the TV

and hold the red "on" button down until the TV turns on. That's it - you now have control over that TV! If you want to intercept the code discreetly while the TV is turned on, then hold down the TV Terror's mute button until "mute" appears on the TV screen. It's easy to re-program for use on a different TV - just aim it at the new TV and repeat this process. Very compact size for discreet deployment (it's only 2.25" x 1.5" x .25"). But don't let its small size fool you; it's actually a sophisticated digital micro-computer. Works on 85% of all TVs. Powered by one CR-2032 3-volt battery (included).

\$19.95

Counterfeit Detector Pen

Counterfeit Detector Pen The Counterfeit Detector Pen can instantly indicate the authenticity of all U.S. currency. The pen's patented chemical formula recognizes and reacts with the unique fibers used in U.S. paper currency, enabling this unique new instantaneous analysis possible. Simple to use - just make a small mark with the pen on any U.S. bill. If the mark is yellow, the bill is genuine; if it is black, the bill is suspect. A yellow mark will disappear from the bill in a day or two, a black mark will remain on the bill. The Counterfeit Detector Pen provides a realistic preliminary screening tool for all cash transactions. One should be kept at every point of purchase and teller window. You can now protect your cash with just the stroke of a pen! Each pen can be used up to 1000 times. The Counterfeit Detector Pen is virtually foolproof; it works on all papers used by counterfeiters to approximate U.S. currency, although it may not work on obviously inappropriate counterfeiting paper such as porous newsprint.

\$5.95

Prison Pen - with Red Ink

Prison Pen - Red ink A pen is a potentially dangerous weapon in the hands of a prisoner. So why would you give them one? The Prison Pen is made with a soft rubbery material that bends under the slightest pressure, making it nearly impossible to do lethal damage with it. It's as close to a stab-resistant, non-lethal weapon you can get, while still providing the subject with a workable ballpoint pen to write with. It's ideal for use in interview rooms, holding cells, and in any prison or jail environment. You go to great lengths to confiscate any potential weapon when taking a prisoner into custody, so why would you want to hand him one afterward? This pen is now in use in most U.S. federal prisons. Each pen will write for over 3500 feet. Length: 4.5". [*Also available in black ink](#)

\$1.95

Russian KGB Disappearing Ink Pen

RUSSIAN KGB DISAPPEARING INK PEN The very rare Russian KGB disappearing ink spy pen is now available for sale in the U.S.! The unique ink is based on a secret formula developed by KGB scientists during the Cold War period, and has been recently adapted into a modern gel pen format. This is the genuine disappearing "spy ink" pen - don't confuse it with the fabric marking pens (usually having purple ink and a felt-pen tip) or novelty pens that others sell as disappearing spy ink pens. Despite its unique capabilities, this pen looks and writes exactly like a regular pen and writes in a standard dark blue ink. Since it's a gel pen, it writes smoothly with a continuous flow, and has a long shelf life. It has a popular 0.5mm point size. It requires almost no downward pressure to write on the paper, so it's not necessary to leave indentations on the paper that could possibly be used to reconstruct what was written. Once on paper, the ink appears normal for about 15 minutes. Then it begins to slowly deconstruct. After about an hour, it will have mostly disappeared, but will still be slightly visible. After about 24 to 48 hours it will have completely vanished! Even an inspection under ultraviolet light will come up with nothing. (Fade time and characteristics may vary depending on ambient environmental conditions.) Now you can write confidential or sensitive notes on documents and be assured that they will be gone later. Great for those occasions that you want to say something - temporarily. **WARNING:** Do not use on any legal document or financial instrument. Made in

Russia. NOTE: Very limited supply, once our initial inventory sells out, it's uncertain if we can obtain any more of these.

\$14.95

Ultraviolet LED Flashlight

ULTRAVIOLET LED FLASHLIGHT This new flashlight brings LED technology to the ultraviolet spectrum. Finally an ultraviolet light source that's robust enough for demanding field use, and one that provides significantly increased output and effectiveness. Its 8 ultraviolet LEDs are housed in an aluminum body and produces more ultraviolet light than most ultraviolet incandescent or fluorescent bulbs. Designed to work ideally with our [Ultraviolet Thief Detection Powder](#). Push-button on/off switch. Powered by three AAA batteries (included). Color: pewter. Length: 4".

\$15.95

UV Thief Detection Powder

ULTRAVIOLET THIEF DETECTION POWDER Ultraviolet Thief Detection Powder is designed for thief detection and the identification of stolen or altered items. For example, an article can be marked so that it is invisible to the eye, but under ultraviolet light the item and anyone who touched it can be identified. Powder, once touched, remains on fingers and hands, invisible except under UV light. Tampering, theft, substitution, etc., can be revealed as well as evidence against a suspect provided. Fluorescence is the phenomenon by which certain materials absorb ultraviolet energy and re-emit this invisible radiation in the form of visible colored light. Fluorescence occurs only while the material is being activated by the UV rays. Once the source of the UV radiation is removed, the fluorescent glow ceases. The best fluorescent responses occur in darkness or under low-level lighting conditions. This fluorescent tracer powder readily transfers to the fingers and hands when touched, leaving the subject "glowing" when put under UV inspection. Powder

is recommended for indoor use; paste is recommended for most outdoor use. To make an ultraviolet paste, simply mix the powder in Vaseline. Ultraviolet powder and paste can be applied to locks, fire alarm boxes, off-limits door knobs, computer keyboards, etc.; the list is unlimited, depending upon your security requirements. Non-toxic. 2 oz. container. Recommended for use with the [Ultraviolet LED Flashlight](#).

\$16.95

Check Guardian Pen

Check Guardian Pen - by Fisher Pen Co. If you aren't familiar with "check washing", you ought to be. It's a rapidly expanding crime in which thieves steal checks, often from outgoing mail in people's mailboxes, and then apply a chemical solution (we won't reveal what it's made with, but it uses common household products) which can erase ("wash") the desired portions while leaving your genuine signature intact. Typically the "washers" take your payments for utilities, etc., since they're in an envelope that they recognize will probably contain a check. Then they "wash" the desired portions, make the check payable to themselves, and usually alter the check amount. It can prove to be a real nightmare for the victim. The new Check-Guardian Pen now allows you to prevent this from happening to you.

Extensive research by Fisher Pen Company (famous for the Space Pen®) has resulted in their new Cellu-Lock™ ink technology. This special ink actually creates a molecular bond with the cellulose fibers of the paper, making it impervious to all

known fluids used by criminal check washers. And since it's a genuine Space Pen®, it has all the same features found in every Space Pen®, including its unique pressurized cartridge that allows you to write upside-down, underwater, or in extreme temperatures. Ink color: blue

Covert Coin - Half Dollar

During the Cold War, spies from both the East and West utilized specially modified coins to covertly transport messages, microfilms, poisons, etc. In our high-tech age, the clandestine "covert coin" may seem to be merely an historical or nostalgic relic. But although the technology of the covert coin is not new, the data media is new. The MicroSD memory card, which can store up to a massive 16 gigabytes of information, can be hidden inside of a nickel! Your most private, confidential, and personal information can now be secured in a place where no one would ever locate it. Even a professional warrant search will not succeed in finding your most private information. Covert Coins are expertly precision hand-machined from actual coins to create a secret interior compartment. Once closed, they are absolutely indistinguishable from regular coins to the naked eye. They can be handled normally without any chance of an accidental opening. An opening device is supplied with each covert coin, without which it's next to impossible to open up the coin. Made

in USA. Available in 3 models: Quarter, Half-Dollar (microSD card can fit inside) and Nickel (designed to precisely hold a microSD card).

LockWrite Pen - For Police Officers

LockWrite Combination Pen/Handcuff Key As Seen In AMERICAN COP MAGAZINE!!! March/ April 2009 Designed for Police Officers by a Police Officer Detailed description: LockWrite is a writing utensil that features a built-in handcuff key, which provides police officers and prison guards with a safe and efficient way to carry a handcuff key. This tool is designed to appear and function as a standard style ink pen would. The stainless steel material, retractable pen notes a clip enabling attachment to a shirt pocket or other location on the person. When extended, the 5/16" writing tip, along with the flag lock tip, work together to function as the main key to lock and unlock a pair of handcuffs. The extended tip alone will lock and unlock the smaller, double lock found of the cuffs. LockWrite is a clever and discreet tool that provides of the most necessary functions in law enforcement. LockWrite combines two of the most common and often used tools in Law

Enforcement into one patented, high quality device. LockWrite is a fully functional writing utensil utilizing replaceable ink cartridges that also acts as a handcuff key. This tool is made specifically to provide law enforcement personnel with a concealed key that can be carried easily. LockWrite is a uniquely designed combination writing utensil and handcuff key created to provide law enforcement officials with a safe and convenient way to conceal the tool. This dual-purpose product provides two items necessary for performing the duties required of any law enforcement official. Cleverly styled as a fully functioning writing pen, this understated handcuff key offers safety to the bearer in that it can be carried and used without drawing attention. Prison guards and police officers routinely utilize handcuffs, which means that a handcuff key must be kept on their person at all times. In the form of a key, most likely carried on an easy to access keychain worn at the waist, this tool can put the officer in danger should the cuffed suspect attempt to get it. Prisoners anticipate the guard wearing a key and can use this knowledge to their advantage in an attempt to escape. Keeping this important and powerful tool within reach is important; yet being able to carry it in a more discreet manner would increase safety. Designed by an Officer - Travis Roemmele is a police officer with the Riverdale Police Department in Riverdale, NJ. He is the inventor of the LockWrite pen. LockWrite was designed from start to finish by Officer Roemmele to help increase the safety and convenience of officers around the world. From the patent process, to all manufacturing standards, to the finished product; each step of the creation of the LockWrite pen was meticulously watched closely by Officer Roemmele, and he stands by his product 100%. Travis stands by his product so much in fact, that he uses it in the field, like many other officers in his department and around the United States. *LockWrite will unlock all brands of standard handcuffs except for ASP*

\$24.95

Road Stars -For Law Enforcement

ROAD STARS Road Stars are devices designed for use in securing private property and law enforcement applications in which an immediate vehicle-disabling roadblock is required. Don't let their compact size, portability, and field-expediency deceive you- nearly any vehicle's tire driving over a Road Star will experience a rapid tire blow-out. Constructed from heavy gauge 5/16" hardened round steel with Class Four tip, industrial grade welds, and .3" razor edge, each has four 2" long spikes. Based on the design of the ancient caltrop, no matter how one is thrown on the ground, one spike will always land straight up. Road Stars can be deployed to create instant roadblocks, stop a pursuing vehicle, prevent parked vehicles from fleeing, protect private property, etc. Use only with extreme caution and discretion in a legal and appropriate manner; you are responsible for each usage and its consequences. For private property protection, use

only with proper warning signage as specified in the instructions, warnings, and sample signage supplied with the product. Color: rust. Sold in boxes of 4 Road Stars.

\$24.95

Mossad Covert Spy Pen

Mossad Invisible Ink Spy Pen The unique new Mossad Pen is an amazing breakthrough in covert ink technology. Its ink has the capability to quickly transform into a non-visible format. Your confidential written documents can disappear for high-security storage or during clandestine transport. Re-constructing the original material can also be accomplished quickly and easily whenever required. To transform into the secured, non-visible format, just run a hot blowdryer over the paper. It will seem to "vacuum" the ink right off the page! Whenever you want the original writing to re-construct, just place the paper in your kitchen freezer and the ink will re-appear in its original form. The transformation process is actually quite astonishing to observe. The ink can be alternated back and forth between visible and non-visible formats as often as required. The Mossad Pen allows you to attain a very high level of privacy and security for your confidential notes, writings, drawings, etc. Even a law enforcement-level search is unlikely to divulge documents written with the Mossad Pen. The possibility of interception is remote, and can be decreased even further by writing in places that wouldn't even be looked at (for example, on the back of printed sheets of paper). For communications purposes, this pen could re-invent the old-fashioned "letter in the mail" as a secure, below-the-radar mode of sending sensitive information, one which is not subject to electronic interception. The Mossad Pen utilizes the latest gel pen technology to provide smooth, quality writing performance. It's

designed to require very little downward pressure on the paper when writing, so telltale indentations on the paper can be avoided. The ink color is black. It features a quality ergonomic housing for comfort. The writing tip is a popular 0.7mm fine point. Note: this ink has been engineered to work on white paper only. Refill cartridges are available.

\$29.95

Spy Paper

This "spy paper" looks like ordinary paper, but is unique in that it dissolves in just seconds when contacted with liquid, resulting in a useless, non-reconstructable mulch which is far more secured than the output of any standard shredder. You can write on this paper normally, but contact it with any liquid, even saliva, and it transforms into a secure mulch. It's ideal for those confidential notes that may have to "disappear" quickly with little advance notice. Spy paper comes in one pad of 32 sheets, each sheet is 2.75" x 4.25" in a sealable storage bag.

\$5.95

LASER Surveillance Defeater

The Laser Surveillance Defeater is a unique new countermeasure device against laser surveillance. How does laser surveillance work? It's quite sophisticated, but in a nutshell, an invisible laser beam is focused on a window. Voices and sound from within the target area are absorbed by the window and transmitted onto the laser beam (called "modulation"). The receiver (at the other end of the beam) then demodulates, processes, and amplifies the signal. The result-- your private conversations inside your office or home can be secretly listened in on and recorded by a spy a mile away! Since these systems are expensive and sales are restricted in the U.S., they are used primarily by government agencies. The new Laser Surveillance Defeater was developed to meet the security requirements of certain U.S. federal agencies (those who best know the capabilities of a technology are usually the first to realize the importance of protecting themselves from it). This unique countermeasure device was designed to be effective, inexpensive, compact, and portable. It interrupts, masks, and jams the laser demodulation by transmitting human voice frequencies to a window to "drown out" typical conversation. Most laser receivers have a "notch filter" to isolate and enhance human voices; this device was engineered to defeat such filters by centering its frequency output at the middle of the human voice range so that if the notch filter is used, it will also filter out a major portion of the human voice range, making the results useless. The Laser Surveillance Defeater is ideal for government offices, corporate facilities, high-rise buildings, even homes-- any location that has a window which can be seen from a spy's location is at potential risk of laser surveillance. This device is completely portable; it installs and un-installs on windows instantly with its integral suction component. Powered by one 9-volt alkaline battery (included), which provides approximately 500 hours of operation. Equipped with on/off switch and bright blue LED power indicator. Deploy one unit per window.

\$69.95

Ultraviolet Pen

These ultraviolet pens are ideal for marking currency or personal property, writing covert "invisible" communications, taking sensitive notes, etc. The markings remain invisible until examined under an ultraviolet light source. (Recommended for use with the Ultraviolet LED Flashlight). Available in two models - standard felt-tip pen, and the new "UV Space Pen" (utilizes pressurized UV ink cartridge and writes at any angle, even upside-down, underwater, over grease or fingerprints, under any weather conditions.) NOTE: These pens may not work well on some white papers; recommended to use on colored paper.

\$5.95

Devil Drive

The new Devil Drive elevates the office prank to a new level of sophistication and maddening effectiveness. It looks like a regular USB thumb drive, but it's actually a devious device of electronic harassment. Its use should be strictly limited to deserving subjects only. The Devil Drive has three functions: (1) it causes annoying random cursor movements on the screen, (2) it types out random phrases and garbage text, and (3) it toggles the Caps Lock. It allows you to select any combination of these frustrating functions, or all of them. It also allows you to set the time interval between events (ranges from 5 seconds to 15 minutes; the longer intervals are recommended for the most maddening effects). Note: the Caps Lock toggle function does not work on Macs. To deploy the Devil Drive, just discreetly insert it into any unused USB port on the victim's computer (no drivers are needed).

The Devil Drive never hits the "Enter" key and it never clicks the mouse button, but still you should not use it on anyone's computer who is doing critical work where

any disruption could cause serious consequences; like any prank, exercise prudence and judgment before deploying. Seriously...if you want to make someone absolutely barking mad you NEED one of these!

\$24.95

Survival Flask - SM

These current issue Israel Air Force air crew survival water flasks are the only water containers that meet stringent test criteria for durability, abrasion resistance, etc. They are constructed of multi-layered laminated plastic film that meets FDA standards for food packaging. Each flexible flask is refillable and has a screw-top cap. They can withstand heat in excess of 212 degrees F, so even boiling water can be added to the flask (makes a great body warmer in cold survival situations). Available in two sizes: Small - holds 500 ml (about 1 pint). Color: white. Cap size is 12 mm. This is the size that is carried in the air crew survival vest, and also works well in combat and assault vests. Large - holds 3 liters (over 3 quarts). Color: clear. Cap size is 20 mm. Has holes so that a cord may be attached to form a carry handle. Water not included. Made in Israel.

Envelope XRAY Spray

Envelope X-RAY Spray turns opaque paper temporarily translucent, allowing the user to view the contents of an envelope without ever opening it. 30 seconds after the application, the envelope will return to its original state, leaving absolutely no markings, discoloration, or other indications of use. Each can treats several hundred square inches. Non-conductive and non-photochemically reactive. Environmentally-friendly (contains no Freon). Size 6.25" x 2". Net weight: 5 oz. WARNING: Not to be used on U.S. Mail, except by, or with the express permission of, the addressee. This product cannot be shipped by Air - sold ONLY to US customers by UPS Ground Service.

\$11.95

Covert Handcuff Key - Non Metallic

This is the best hide-out handcuff key available. Constructed of a special durable composite, this universal key can be there for you when you need it most. Tiny, lightweight and non-metallic, it can be hidden on or about your body or clothing so that it can not be easily detected, yet be ready for your use if needed. The design features a lanyard hole so that it can be sewn into or suspended in your clothing or gear. A must-have item for anyone working undercover or operating in a hostile environment. Color: black. Size: 0.5" x 0.8". Weight: 0.014 oz. Made in U.S.A.

\$4.95

Escape Saw - -Survival Tool

The Escape Saw can be a vital piece of gear that should be in every adventurer's survival kit. This small, discreet, and lightweight cutter could be just the tool you need to extract yourself from an undesirable situation. It's a great little item to have in the glovebox of your car or truck too - just in case of an emergency. Take it on your next camping trip. Bottom line is that this little tool comes in handy in many situations. It can cut metal, wood, plastic, rope, etc. It cuts on the pull stroke. Saw length: 2.25". Closed size: 3.25" x 0.625" x 0.375". Weight: 0.4 oz. Color: black.

\$10.95

Zipper-Pull Hidden Handcuff Key

This could be one of the ultimate HIPS (Hidden-in-Plain-Sight) items - one of our covert [non-metallic handcuff keys](#) disguised as a simple zipper pull. These can be attached to any zipper on your jacket, pants, etc. The key remains completely hidden, and is simply pushed out from its housing when required in an emergency. Since the key is attached to its cord, it will not become lost even during the most demanding situations. Includes key. Patent Pending. Made in USA.

\$8.95

Covert Coin Handcuff Key

You've never seen anything like this! I guarantee it. This innovative new handcuff key was designed for a specialized elite U.S. unit whose members are at high risk of being taken captive and require improved odds of escape. It can also be a valuable, potentially life-saving, device for undercover law enforcement operatives and even street officers. This device is based on the proven theory that things often are most securely hidden when in plain sight. The most ignored things that people carry are coins. Rarely does anyone pay the slightest attention to a bunch of coins, even during searches. Who would have ever thought that a handcuff key could be concealed inside of nickels? Keep this device, along with some regular coins, in your pant's back pocket, so that you can easily access it while handcuffed behind your back. To deploy, just run your finger along the coin's edge, and its integral handcuff key smoothly pivots out, ready for use. The coin itself serves as an oversize handle, providing increased control while under stress. Patent pending. Made in USA.

\$54.95

KILLER KEY - KWIKSET

The Killer Key can instantly and permanently disable a lock. Once inserted into a lock it can not be removed, making it impossible to unlock the door. The door can still be opened from the inside, so no one can be locked in, only locked out. The only way in is to drill the lock. Simple to deploy - just insert into the keyway and then push sideways on the bow which will easily break off. The Killer Key can be a valuable tool for law enforcement as an instantly deployable access denial device. It's also a useful tool for property management to prevent return of evicted tenants before the locks can be changed. About 90% of the locks used in the USA use one of two key styles - Schlage® or Kwikset®, so a Killer Key version is available for each.

Auto Wedges

Pump Wedge - Auto Lockout Tool

Pump Wedge - Auto Lockout Tool Locksmith window pump wedge for locked cars, auto opening. The Pump Wedge is a necessity for any auto opening. The pump wedge is an inflatable wedge made of heavy duty non-marring vinyl material. It is designed for locked vehicle entry. Our inflatable wedge is made of non-marring vinyl material and has rounded corners for easy entry. Other uses may also include door and safe installations for leveling or holding in place while installation is being done. The Air Wedge slides between the vehicle door and the weather stripping on the door frame, then the pump is squeezed, inflating the Air Pump Wedge and separating the vehicle door from the frame. This provides enough room to insert a car opening tool. This is most definitely one item any pro should have in his auto opening tool kit! Inflatable pump wedge (approx 6.5"x6") is constructed of a heavy duty vinyl which will not scratch or chip paint. Simply slip the wedge into place and inflate using the attached pump to spread the door for tool insertion. Our pump

wedge is the ideal car open tool for police, firemen, other emergency personnel, as well as repo people, wrecker drivers, auto repair shops and car dealers. When the unit is positioned between car door and the door frame and inflated, the door is pulled away for the frame allowing an opening tool to be inserted and the door opened. Full Color Instructions included. Lifetime warranty against manufacturer's defect.
