# *Herbivores*

- ✦ Herbivores are animals that eat ONLY plants.
- ✦ They need a lot of energy to stay alive.
- ✦ Many have to eat all day long to get enough energy.
- ✦ Some herbivores have a special digestive system so they are able to eat grasses.

Let's see what type of animals are herbivores.

# Manatee

- ✦ A manatee is a mammal that lives in the water.
- ✦ They are herbivores.
- ✦ They eat 150 pounds of plants each day!
- ✦ Manatees live in ocean waters off the coast of Florida.

# Omnivores

- ✦ Omnivores are animals that eat both plants and other animals.
- ✦ Many will eat the eggs of other animals.
- ✦ Some omnivores are scavengers which means they eat dead animals.
- ✦ Most will eat plants that produce fruit and vegetables. They also eat the fruit and vegetables.

**Let's explore some omnivores!**

**A pig eats fruit, eggs, corn, and earthworms.**

# Great Job!

# *Way To Go!*

# *Let's Try Again*

**Remember:**

**Herbivores eat plants.**

**Carnivores eat meat.**

**Omnivores eat both.**
